Defending NATO’s Northern Flank Lon Strauss, Njord Wegge, 2023-11-01 This book investigates several aspects of military power and security in the North Atlantic and Arctic regions. NATO’s northern flank is a large maritime and littoral theatre, where NATO directly borders Russia’s Northern Fleet Military Administrative Territory, which is the location of some of Russia’s most potent air, sea, and land power capabilities. While military tensions on the northern flank had been relatively low for years, the Ukraine war and increased great-power rivalry have altered that dynamic, with heightened geopolitical tensions. This has increased the focus on military-strategic competition in this northernmost region of the alliance. This book presents new assessments of several aspects of military power and security in the North Atlantic and Arctic regions. With an analysis of the security and political climate in the High North and of developments in Western military strategies, capabilities, doctrines, and operational concepts, the volume seeks to bring together an holistic understanding of the strategic challenges and opportunities facing the North Atlantic states and NATO in this dynamic area of responsibility for the alliance. In doing this, the book provides key insights into the role of branch-specific and joint approaches to power projection and operations in the High North, which also include selected country case studies. This book will be of much interest to students of NATO, military studies, security studies, and International Relations.

Military Veteran Psychological Health and Social Care Jamie Hacker Hughes, 2017-05-12 When servicewomen and men leave the armed forces, their care transfers to the statutory and third sector where the quality and provision of services can vary enormously. This edited book, encompassing a range of perspectives, from service user to professional, provides a comprehensive overview of services available. Each chapter, in turn, examines the policy underpinnings of systems and

services covering the psychological health and social care of military veterans and then focuses on the needs of a discrete number of types of military veterans including early service leavers, veterans in the criminal justice system, older veterans and reservists, together with the needs of the children of veterans' families. This is the first UK book to examine the whole spectrum of contemporary approaches to the psychological health and social care of military veterans both in the United Kingdom and overseas. The book is edited by Professor Jamie Hacker Hughes, a former head of healthcare psychology within the UK Ministry of Defence and all contributors are experts in policy, service provision and academic research in this area. It will be of special interest to those designing and planning, commissioning, managing and delivering mental health and social care to military veterans and their families

The Encyclopedia of Middle East Wars Spencer C. Tucker, 2010-10-08 This in-depth study of U.S. involvement in the modern Middle East carefully weighs the interplay of domestic, cultural, religious, diplomatic, international, and military events in one of the world's most troubled regions. The monumental, five-volume *The Encyclopedia of Middle East Wars: The United States in the Persian Gulf, Afghanistan, and Iraq Conflicts* is a must-have resource for anyone seeking to comprehend U.S. actions in this volatile region. Under the expert editorship of Spencer C. Tucker, the encyclopedia traces 20th- and 21st-century U.S. involvement in the Middle East and south-central Asia, concentrating on the last three decades. Beginning with the 1980-1988 Iran-Iraq War, it covers the 1979-1989 Soviet occupation of Afghanistan, the 1991 Persian Gulf War, allied punitive actions against Iraq during the 1990s, the Afghanistan War, the Iraq War, and the Global War on Terror. Many smaller military actions against Iran, Iraq, Libya, Afghanistan, and other regimes that have been involved in international terrorism are also included. Diplomacy, religion as it pertains to Middle East conflict, and social/cultural developments are other key subjects of analysis, as is the interplay of politics with military policy in the United States and other nations involved in the region.

THE ROYAL MARINES ULTIMATE CIRCUIT BOOK gives structured fitness programme, designed to keep exercising time down to a minimum, with hints and motivation tips and advice from experts on diet and avoiding and coping with sport injury. The book starts with an 8 week beginner course leading to a basic level of fitness which can then be maintained indefinitely using the maintenance and specialisation circuits. The section on sports specific circuits shows how to concentrate on individual requirements for a wide range of games and sports, and also tells you how to design your own individual circuit. There are self-assessment tests throughout and the final section gives a four week course designed to bring you up to a peak of physical and mental fitness for a tough challenge based on SBS selection procedures which even those who achieved total fitness will find daunting.
