Volker Janssen (Historian)

Seeing Like a State James C. Scott, 2020-03-17 “One of the most profound and illuminating studies of this century to have been published in recent decades.”—John Gray, New York Times Book Review Hailed as “a magisterial critique of top-down social planning” by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—New Yorker “A tour de force.”— Charles Tilly, Columbia University

Counting Like a State Philip Rocco, 2025-06-17 The census plays a foundational, if all too easily ignored, role in the operation of the American state, shaping everything from congressional representation to the allocation of trillions of federal dollars. While census taking aspires to the high-modernist goal of “seeing like a state”—centralizing, standardizing, and homogenizing knowledge about a polity—it is subject to far more conflict and negotiation than final tabulations, maps, or technical documentation make apparent. This is especially true in a large, decentralized polity like the United States where the Constitution entrusts the ultimate authority for the census in the legislative branch. In *Counting Like a State*, Philip Rocco shows how the production of the US Census now crucially hinges not only on what happens in Washington but also on a series of intergovernmental partnerships. State and local officials, though not formally responsible for census taking, figure importantly in the implementation of the decennial count. These officials are essential partners in the construction and maintenance of address lists, as well as in outreach and promotion campaigns in hard-to-count communities. The 2020 Census compounded these challenges with new crises. Intergovernmental partnerships played a key role in preventing President Trump from adding a citizenship question, as state and local officials mounted a coordinated legal counteroffensive. Many local officials also simply refused to cooperate with the Trump administration’s efforts to exclude undocumented immigrants from the apportionment count. The census also took place in the context of a global pandemic that stretched administrative resources to the breaking point. While these partnerships allowed the Census Bureau to adapt to ever-changing conditions on the ground, state and local governments also sounded the alarm when the Trump administration sought to rush the census. These efforts helped preserve the quality of the data collected in the 2020 count. Rocco’s illuminating study of the 2020 Census pulls back the curtain on the administrative state to reveal how something as complex

and centralizing as a census takes place within a decentralized, federalist system. Drawing on analyses of interviews with hundreds of public officials and quantitative analyses of state and local census activities, *Counting Like a State* allows scholars and practitioners to better understand what facilitates as well as what impedes effective intergovernmental partnerships for census taking.

Acting Like a State Gözim Visoka, 2018-06-13 How do emerging states obtain international recognition and secure membership of international organisations in contemporary world politics? This book provides the first in-depth study of Kosovo's diplomatic approach to becoming a sovereign state by obtaining international recognition and securing membership of international organisations. Analysing the everyday diplomatic discourses, performances, and entanglements, this book contends that state-becoming is not wholly determined by systemic factors, normative institutions, or the preferences of great powers; the diplomatic agency of the fledgling state plays a far more important role than is generally acknowledged. Drawing on institutional ethnographic research and first-hand observations, this book argues that Kosovo's diplomatic success in consolidating its sovereign statehood has been the situational assemblage of multiple discourses, practiced through a broad variety of performative actions, and shaped by a complex entanglement with global assemblages of norms, actors, relations, and events. Accordingly, this book contributes to expanding our understanding of the everyday diplomatic agency of emerging states and the changing norms, politics, and practices regarding the diplomatic recognition of states and their admission to international society.

Afghanistan Musa Khan Jalalzai, 2019-10-01 Afghan civil society is deeply upset with disunity and detachment of Taliban groups - those who are tied to regional states agendas. This detachment has also left negative impacts on their fighting capabilities and public support. Regional states, the United States, NATO, Russia, China, Iran and Pakistan are active stakeholders who want peace on their own terms, while Taliban are not an independent entity to decide the future of Afghanistan, or outline long-term peace proposals. This has created a deep problem in finding a solution to the peace problem in Afghanistan. This book is a collection of various articles written by eminent researchers on the aspects of finding a solution to the peace prospects in troubled Afghanistan.

International Law's Objects Jessie Hohmann, Daniel Joyce, 2018 International law's rich existence in the world can be illuminated by its objects. International law is often developed, conveyed, and authorized through its objects and/or their representation. From the symbolic (the regalia of the head of state and the symbols of sovereignty), to the mundane (a can of dolphin-safe tuna certified as complying with international trade standards), international legal authority can be found in the objects around us. Similarly, the practice of international law often relies on material objects or their image, both as evidence (satellite images, bones of the victims of mass atrocities) and to found authority (for instance, maps and charts). This volume considers these questions: firstly what might the study of international law through objects reveal? What might objects,

rather than texts, tell us about sources, recognition of states, construction of territory, law of the sea, or international human rights law? Secondly, what might this scholarly undertaking reveal about the objects-as aims or projects-of international law? How do objects reveal, or perhaps mask, these aims, and what does this tell us about the reasons some (physical or material) objects are foregrounded, and others hidden or ignored. Thirdly what objects, icons, and symbols preoccupy the profession and academy? The personal selection of these objects by leading and emerging scholars worldwide will illuminate the contemporary and historical fascinations of international lawyers. By considering international law in the context of its material culture the authors offer a new and exciting theoretical perspective on the subject. With an image of each object reproduced in full colour, the book will make an engaging and interesting read for scholars, practitioners, and students alike.

The Power of New Urban Tourism Claudia Ba, Sybille Frank, Claus Müller, Anna Laura Raschke, Kristin Wellner, Annika Zecher, 2021-07-21 The Power of New Urban Tourism explores new forms of tourism in urban areas with their social, political, cultural, architectural and economic implications. By investigating various showcases of New Urban Tourism within its social and spatial frames, the book offers insights into power relations and connections between tourism and cityscapes in various socio-spatial settings around the world. Contributors to the volume show how urban space has become a battleground between local residents and visitors, with changing perceptions of tourists as co-users of public and private urban spaces and as influencers of the local economies. This includes different roles of digital platforms as resources for access to the city and touristic opportunities as well as ways to organise and express protest or shifting representations of urban space. With contemporary cases from a wide disciplinary spectrum, the contributors investigate the power of New Urban Tourism in Africa, Asia, the Americas, Europe and Oceania. This focus allows a cross-cultural evaluation of New Urban Tourism and its dynamic, and changing conception transforming and subverting cities and tourism alike. The Power of New Urban Tourism will be of great interest to academics, researchers and students in the fields of cultural studies, sociology, the political sciences, economics, history, human geography, urban design and planning, architecture, ethnology and anthropology.

Reclaiming economics for future generations Lucy Ambler, Joe Earle, Nicola Scott, 2022-01-25 Today's economies fail to recognise that we are in a rapidly worsening crisis, reproducing and often worsening vast and harmful inequalities between people and countries. The current models are unsustainable, and at a time when global temperatures are rising and divides are deepening, humanity is left in a rapidly worsening situation of its own making, the destruction of the living world, which will make large parts of the earth uninhabitable. Without access to the knowledge, skills or tools to build a better future, local, national and global economies will continue to fail to address the interlinked challenges of systemic racism, inequalities faced by women, the Covid-19 pandemic and the nature and climate emergency. Across the world, economics students are coming together under the banner of the student movement, Rethinking Economics, to create a better economics – one which

can help to create a world where all our children can flourish regardless of their gender, background or birthplace. Drawing on over sixty interviews with students and professionals from identities and backgrounds marginalised in economics and a wide range of global and historical research, this book illustrates the ways in which the discipline is currently not fit for purpose and sets out a vision for how it can be diversified, decolonised and democratised. The struggle to reclaim economics could not be more crucial - our futures depend on it. This book explains how it can be done.

Where Minds and Matters Meet Volker Janssen (Historian), 2012 The American West—where such landmarks as the Golden Gate Bridge rival wild landscapes in popularity and iconic significance—has been viewed as a frontier of technological innovation. *Where Minds and Matters Meet* calls attention to the convergence of Western history and the history of technology, showing that the region's politics and culture have shaped seemingly placeless, global technological practices and institutions. Drawing on political and social history as well as art history, the book's essays take the cultural measure of the region's great technological milestones, including San Diego's Panama-California Exposition, the building of the Hetch Hetchy Dam in the Sierras, and traffic planning in Los Angeles. Sichtbarkeitsregime Leon Hempel, Susanne Krasmann, Ulrich Bröckling, 2011 Sicherheits- und Überwachungstechnologien etablieren Sichtbarkeitsregime, die sich ihrerseits der Einsehbarkeit und damit der Kontrolle entziehen. Während Bevölkerung und Individuen in neuer Weise lesbar gemacht werden – als Gefahrenträger, die kontrolliert, als Gefährdete, die geschützt, als Konsumenten, deren Präferenzen erhoben, als Angestellte, deren Leistungen evaluiert werden –, bleibt die gesellschaftliche Funktionalität der Technik zu dechiffrieren. Im Zeichen von Prävention vollzieht sich ein radikaler Innovationsschub, der die Verfasstheit liberaler Gesellschaften in Frage stellt und traditionelle Grenzziehungen auf dem Feld der Sicherheit untergräbt. Kriminalität, Terrorismus, Krieg und Naturkatastrophen werden zu einem Kontinuum der Bedrohung verknüpft. Neben den staatlichen Organen treten private Sicherheitsagenturen, Anwender von Sicherheitstechnologien wie Verkehrsunternehmen, kommerzielle Datensammler und die Think Tanks der Sicherheitsforschung. Der Sonderband nimmt dieses Zusammenspiel von Akteuren, Technologien und strategischen Wirkungen ebenso in den Blick wie die gesellschaftlichen Bewegungen, die Privatheit als Residuum gegen Überwachung und Kontrolle neu entdecken.
