

Snowy Mountains Scheme List Of Workers

Egon F. Kunz

"White Russians, Red Peril" Sheila Fitzpatrick, 2021-05-12 Over 20,000 ethnic Russians migrated to Australia after World War II – yet we know very little about their experiences. Some came via China, others from refugee camps in Europe. Many preferred to keep a low profile in Australia, and some attempted to ‘pass’ as Polish, West Ukrainian or Yugoslavian. They had good reason to do so: to the Soviet Union, Australia’s resettling of Russians amounted to the theft of its citizens, and undercover agents were deployed to persuade them to repatriate. Australia regarded the newcomers with wary suspicion, even as it sought to build its population by opening its door to more immigrants. Making extensive use of newly discovered Russian-language archives and drawing on a lifetime’s study of Soviet history and politics, award-winning author Sheila Fitzpatrick examines the early years of a diverse and disunited Russian-Australian community and how Australian and Soviet intelligence agencies attempted to track and influence them. While anti-Communist ‘White’ Russians dreamed a war of liberation would overthrow the Soviet regime, a dissident minority admired its achievements and thought of returning home.

Immigrant Industry Anoma Pieris, Mirjana Lozanovska, Dr Alexandra Dellios, Andrew Saniga, 2024-08-02 After the end of the Second World War, migrants were critical to the spatial making of modern Australia. Major federally funded industries driving postwar nation-building programs depended on the employment of large numbers of people who had been displaced by the war. Directed to remote, rural and urban industrial sites, migrant labor and resettlement altered the nation’s physical landscape, providing Australia with its contemporary economic base. While the immigrant contribution to nation-building in cultural terms is well-known, its everyday spatial, architectural and landscape transformations remain unexamined. This book aims to bring to the foreground postwar industry and immigration to comprehensively document a uniquely Australian shaping of the built environment.

Mud, Sweat & Snow Noel Gough, 1994 The human story of the first decade of building the great Snowy Mountains Hydro-Electric Scheme, with adventures and anecdotes told by the workers themselves, and illustrated with unusual photographs. Appendices give further information about the project and list the workers named in Snowy records. The author began his 10 years with the Electrical and Mechanical Division at the age of 20.

Congressional Record United States. Congress, The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States* (1789-1824), the *Register of Debates in Congress* (1824-1837), and the *Congressional Globe* (1833-1873)

Australia's Boldest Experiment Stuart Macintyre,2015-06-01 In this landmark book, Stuart Macintyre explains how a country traumatised by World War I, hammered by the Depression and overstretched by World War II became a prosperous, successful and growing society by the 1950s. An extraordinary group of individuals, notably John Curtin, Ben Chifley, Nugget Coombs, John Dedman and Robert Menzies, re-made the country, planning its reconstruction against a background of wartime sacrifice and austerity. The other part of this triumphant story shows Australia on the world stage, seeking to fashion a new world order that would bring peace and prosperity. This book shows the 1940s to be a pivotal decade in Australia. At the height of his powers, Macintyre reminds us that key components of the society we take for granted – work, welfare, health, education, immigration, housing – are not the result of military endeavour but policy, planning, politics and popular resolve.
