**Ethical Omnivores** Samantha Noll, 2025-02-25 This book provides a detailed overview of ethical omnivorism, as well as the philosophical foundations of this movement and diet. Many eaters are concerned about the impact that their food choices have on the environment, animals, and human health. Ethical omnivorism is at once a new food ethic, diet, and global movement aimed at providing a flexible path for eaters committed to bringing about lasting change one meal at a time. While publications in food ethics are largely dominated by vegetarian titles, this book explores the viability of omnivorism, a dietary choice which is not devoid of animal products, but one which embraces eating local, eating organic, and eating humanely raised food products. In doing so, this diet builds on the local food movement's desire to know where food comes from and stresses the importance of maintaining high animal welfare and environmental standards. Overall, this book provides a foundational overview of ethical omnivorism as a food movement and guidance for those interested in eating ethically, while recognizing that many factors influence dietary choices. This book will be of great interest to students and scholars of food studies, food, agriculture and animal ethics, environmental philosophy, and those more widely interested in making ethical food choices.

**The Omnivore's Dilemma** Michael Pollan, 2007-08-28 Outstanding . . . a wide-ranging invitation to think through the moral ramifications of our eating habits. —The New Yorker One of the New York Times Book Review's Ten Best Books of the Year and Winner of the James Beard Award Author of *This is Your Mind on Plants*, *How to Change Your Mind* and the #1 New York Times Bestseller *In Defense of Food* and *Food Rules* What should we have for dinner? Ten years ago, Michael Pollan confronted us with this seemingly simple question and, with *The Omnivore's Dilemma*, his brilliant and eye-opening exploration of our food choices, demonstrated that how we answer it today may determine not only our health but our survival as a species. In the years since, Pollan's revolutionary examination has changed the way Americans think about food. Bringing wide attention to the little-known but vitally important dimensions of food and agriculture in America, Pollan launched a national conversation about what we eat and the profound consequences that even the simplest everyday food choices have on both ourselves and the natural world. Ten years later, *The Omnivore's Dilemma* continues to transform the way Americans think about the politics, perils, and pleasures of eating.

**Countdown** Michael V. Thomas, 2010 Countdown puts forward the view that the total direction of our development, and

the values on which it based, is wrong and leading towards a human and environmental catastrophe. The author identifies economics and economic growth as the main cause of this situation and suggests a new framework for wealth creation and distribution guided by a new science which he has named philonomics.

**Healing the Fragmented U.S. Healthcare System** Barbara Sowada, 2025-02-11 Through a systems perspective, this insightful book challenges the current state of healthcare in the United States, arguing for overarching reforms that would lead ultimately to universal healthcare coverage across the country. Written by the president of the board of trustees of a rural hospital, the book highlights the chronic issues facing American healthcare today, namely high costs, poor health outcomes, excessive health inequalities, and a lack of trust. It uses systems thinking principles – used in hospitals themselves to improve efficiency, quality, and safety of care – to show how the fragmented system could be transformed by addressing these issues holistically. The book also gives suggestions for rebuilding trust, respect, and mutual cooperation, issues which are also critical in healing the current system. Grounded in the author's direct experience in facing the challenges of dealing with a fragmented system in America today, this perceptive book will interest graduate students in healthcare administration, policy, or leadership programs, as well as scholars in these and related fields.

**The River of Life** Michael Marchand, Kristiina Vogt, Asep Suntana, Rodney Cawston, John Gordon, Mia Siscawati, Daniel Vogt, John Tovey, Ragnhildur Sigurdardottir, Patricia Roads, 2013-10-29 Sustainability defines the need for any society to live within the constraints of the land's capacity to deliver all natural resources the society consumes. This book compares the general differences between Native Americans and western world view towards resources. It will provide the 'nuts and bolts' of a sustainability portfolio designed by indigenous peoples. This book introduces the ideas on how to link nature and society to make sustainable choices. To be sustainable, nature and its endowment needs to be linked to human behavior similar to the practices of indigenous peoples. The main goal of this book is to facilitate thinking about how to change behavior and to integrate culture into thinking and decision-processes.

**Growing Gardens, Building Power** Justin Sean Myers, 2022-10-14 Across the United States marginalized communities are organizing to address social, economic, and environmental inequities through building community food systems rooted in the principles of social justice. But how exactly are communities doing this work, why are residents tackling these issues through food, what are their successes, and what barriers are they encountering? This book dives into the heart of the food justice movement through an exploration of East New York Farms! (ENYF!), one of the oldest food justice organizations in Brooklyn, and one that emerged from a bottom-up asset-oriented development model. It details the food inequities the community faces and what produced them, how and why residents mobilized to turn vacant land into community gardens, and the struggles the organization has encountered as they worked to feed residents through urban farms and farmers markets. This book also discusses how through the politics of food justice, ENYF! has challenged the growth-oriented

development politics of City Hall, opposed the neoliberalization of food politics, navigated the funding constraints of philanthropy and the welfare state, and opposed the entrance of a Walmart into their community. Through telling this story, Growing Gardens, Building Power offers insights into how the food justice movement is challenging the major structures and institutions that seek to curtail the transformative power of the food justice movement and its efforts to build a more just and sustainable world.

*Community Gardening in an Unlikely City* Tyler Schafer, 2020-12-10 Community gardening is as much about community as it is gardening, and compared to growing plants, cultivating community is far more difficult. In *Community Gardening in an Unlikely City: The Struggle to Grow Together in Las Vegas*, Schafer documents his time as a member of a fledgling Las Vegas community garden and the process through which a rotating group of gardeners try to forge community. He demonstrates the ways in which choices gardeners make about what goals to pursue, or who belongs, or what story to tell about their collective efforts, influence how they and others experience and interpret the garden. The garden culture that emerges over time shapes how, or whether, community is practiced at the garden, and has important consequences for the gardeners' abilities to connect with the low-income, Black and Latinx community in which it is located. Schafer's analysis provides important insights about urban culture, the environment, and food justice in the American Southwest, and a sober look into the often messy process and practice of community.

The Medicine Wheel Michael E. Marchand, Kristiina A. Vogt, Rodney Cawston, John D Tovey, John McCoy, Nancy Maryboy, Calvin T Mukumoto, Daniel J Vogt, Melody Starya Mobley, 2020-03-01 The Medicine Wheel built by Indigenous people acknowledges that ecosystems experience unpredictable recurring cycles and that people and the environment are interconnected. The Western science knowledge framework is incomplete unless localized intergenerational knowledge is respected and becomes part of the problem-definition and solution process. The goal of this book is to lay the context for how to connect Western science and Indigenous knowledge frameworks to form a holistic and ethical decision process for the environment. What is different about this book is that it not only describes the problems inherent to each knowledge framework but also offers new insights for how to connect culture and art to science knowledge frameworks. Read this book and learn how you can move beyond stereotypes to connect with nature.

**The Omnivore's Dilemma** Michael Pollan, 2009-10-15 This acclaimed bestseller and modern classic has changed America's relationship with food. It's essential reading for kids who care about the environment and climate change. "What's for dinner?" seemed like a simple question—until journalist and supermarket detective Michael Pollan delved behind the scenes. From fast food and big organic to small farms and old-fashioned hunting and gathering, this young readers' adaptation of Pollan's famous food-chain exploration encourages kids to consider the personal and global implications of their food choices. With plenty of photos, graphs, and visuals, *The Omnivore's Dilemma* serves up a bold message to the

generation most impacted by climate change: It's time to take charge of our national eating habits—and it starts with you.

**Summary of The Omnivore's Dilemma by Michael Pollan** QuickRead, Lea Schullery, A Natural History of Four Meals. The question of what to eat for dinner has become more complicated than ever. In the 21st century, we are faced with what anthropologists call, the omnivore's dilemma. Back in the hunter-gatherer days, humans had to learn what was safe and what wasn't. For example, we now know which mushrooms to avoid and which berries we can enjoy. Now with the evergrowing fast-food industry, we once again have to worry about which tasty foods might kill us. As you stroll the shelves of the supermarket, you are met with countless foods, all of which have different nutritional values. How do you know what to choose? What should you avoid? Should we be spending more on food? Or less? Even more, we've also begun to realize that our food choices affect more than just our health, they also affect the health of the environment. What we put into our bodies affects more than we realize, and we are only just beginning to recognize the profound consequences of our simple everyday food choices. So if you're looking for a fresh perspective on the ordinary question, "What should we have for dinner?" then The Omnivore's Dilemma is for you. Do you want more free book summaries like this? **The Omnivore's Dilemma** Michael Pollan, 2011 What shall we have for dinner? Such a simple question has grown to have a very complicated answer. We can eat almost anything nature has to offer, but deciding what we should eat stirs anxiety. Should we choose the organic apple or the conventional? If organic, local or imported? Wild fish or farmed? Low-carb or low-cal? As the American culture of fast food and unlimited choice invades the world, Pollan follows his next meal from land to table, tracing the origin of everything consumed and the implications for ourselves and our planet. His astonishing findings will shock all who care about what they put on their plate.
