*Last Words* Karl S. Guthke, 1992-10-30 Whether Goethe actually cried More light! on his deathbed, or whether Conrad Hilton checked out of this world after uttering Leave the shower curtain on the inside of the tub, last words, regardless of authenticity, have long captured the imagination of Western society. In this playfully serious investigation based on factual accounts, anecdotes, literary works, and films, Karl Guthke explores the cultural importance of those words spoken at the border between this world and the next. The exit lines of both famous and ordinary people embody for us a sense of drama and truthfulness and reveal much about our thoughts on living and dying. Why this interest in last words? Presenting statements from such figures as Socrates, Nathan Hale, Marie Antoinette, and Oscar Wilde (I am dying as I have lived, beyond my means), Guthke examines our fascination in terms of our need for closure, our desire for immortality, and our attraction to the mystique of death scenes. The author considers both authentic and invented final statements as he looks at the formation of symbols and legends and their function in our culture. Last words, handed down from generation to generation like cultural heirlooms, have a good chance of surviving in our collective memory. They are shown to epitomize a life, convey a sense of irony, or play to an audience, as in the case of the assassinated Mexican revolutionary Pancho Villa, who is said to have died imploring journalists: Don't let it end like this. Tell them I said something. Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**Love Like Water, Love Like Fire** Mikhail Iossel, 2021-05-04 Comedy and tragedy collide in stories of family life in Soviet Russia and the complexities of the immigrant experience "We can't stop turning the pages of this book." —Ilya Kaminsky, New York Times Book Review From the moment of its founding, the USSR was reviled and admired, demonized and idealized. Many Jews saw the new society ushered in by the Russian Revolution as their salvation from shtetl life with its deprivations and deadly pogroms. But Soviet Russia was rife with antisemitism, and a Jewish boy growing up in Leningrad learned early, harsh, and enduring lessons. Unsparing and poignant, Mikhail Iossel's twenty stories of Soviet childhood and adulthood, dissidence and subsequent immigration, are filled with wit and humor even as they describe the daily absurdities of a fickle and often perilous reality.

Passage Connie Willis, 2009-12-09 One of those rare, unforgettable novels that are as chilling as they are insightful, as thought-provoking as they are terrifying, award-winning author Connie Willis's *Passage* is an astonishing blend of relentless suspense and cutting-edge science unlike anything you've ever read before. It is the electrifying story of a psychologist who has devoted her life to tracking death. But when she volunteers for a research project that simulates the near-death experience, she will either solve life's greatest mystery -- or fall victim to its greatest terror. At Mercy General Hospital, Dr. Joanna Lander will soon be paged -- not to save a life, but to interview a patient just back from the dead. A psychologist specializing in near-death experiences, Joanna has spent two years recording the experiences of those who have been declared clinically dead and lived to tell about it. It's research on the fringes of ordinary science, but Joanna is about to get a boost from an unexpected quarter. A new doctor has arrived at Mercy General, one with the power to give Joanna the chance to get as close to death as anyone can. A brilliant young neurologist, Dr. Richard Wright has come up with a way to manufacture the near-death experience using a psychoactive drug. Dr. Wright is convinced that the NDE is a survival mechanism and that if only doctors understood how it worked, they could someday delay the dying process, or maybe even reverse it. He can use the expertise of a psychologist of Joanna Lander's standing to lend credibility to his study. But he soon needs Joanna for more than just her reputation. When his key volunteer suddenly drops out of the study, Joanna finds herself offering to become Richard's next subject. After all, who better than she, a trained psychologist, to document the experience? Her first NDE is as fascinating as she imagined it would be -- so astounding that she knows she must go back, if only to find out why this place is so hauntingly familiar. But each time Joanna goes under, her sense of dread begins to grow, because part of her already knows why the experience is so familiar, and why she has every reason to be afraid.... And just when you think you know where she is going, Willis throws in the biggest surprise of all -- a shattering scenario that will keep you feverishly reading until the final climactic page is turned.
