Trading in the Zone Mark Douglas, 2001-01-01 Trading in the Zone introduces a whole new mental dimension to getting an edge on the market. Use it to leverage the power of the "zone" for unprecedented profit. Mark Douglas uncovers the underlying reasons for lack of consistency and helps traders overcome the ingrained mental habits that cost them money. He takes on the myths of the market and exposes them one by one teaching traders to look beyond random outcomes, to understand the true realities of risk, and to be comfortable with the probabilities of market movement that governs all market speculation.

Urban Planning as a Trading Zone Alessandro Balducci, Raine Mäntysalo, 2013-03-27 'Trading zone' is a concept introduced by Peter Galison in his social scientific research on how scientists representing different sub-cultures and paradigms have been able to coordinate their interaction locally. In this book, Italian and Finnish planning researchers extend the use of the concept to different contexts of urban planning and management, where there is a need for new ideas and tools in managing the interaction of different stakeholders. The trading zone concept is approached as a tool in organizing local platforms and support systems for planning participation, knowledge production, decision making and local conflict management. In relation to the former theses of communicative planning theory that stress the ideals of consensus, mutual understanding and universal reason, the 'trading zone approach', outlined in this book, offers a different perspective. It focuses on the potentiality to coordinate locally the interaction of different stakeholders without requiring the deeper sharing of understandings, values and motives between them. Galison's commentary comes in the form of the book's final chapter.

Trading in the Zone Ari Kiev, 2004-03-15 Trading in the Zone - Ein praktischer Ratgeber zur Überwindung jener Hindernisse, die erfolgreiches Handeln unmöglich machen. Die seelische Verfassung eines Händlers ist ausschlaggebend für den Erfolg. Viele psychologische Faktoren können die Entscheidungen im Verlauf eines Handelstages beeinflussen. Dieses Buch erläutert, wie sich Händler von Gefühlen wie Angst, Habgier oder Übereifer befreien können, um sich besser auf das eigentliche Handeln zu konzentrieren. Denn nur wenn ein Händler ein Höchstmaß an Konzentration und Aufmerksamkeit

entwickelt, kann er erfolgreiche Handelsentscheidungen treffen. Dieses Buch ist in der Reihe 'Wiley Online Trading for a Living' erschienen.

Climate Security Intelligence Adrian Wolfberg, 2025-05-24 Climate security intelligence is the capacity to warn national and sub-national security organizations of the physical effects of climate change that can have a negative societal effect on nations, governments, and their populations. This book discusses the uniqueness of climate security intelligence, the maturity of its development as a knowledge domain, and its possible future. Written by an intelligence analyst with over forty years of experience, this book centers upon the challenges that organizations may face when analysts, their managers, and their organizations are given the task of warning policymakers and decision-makers about threats to climate security. Taking a necessarily transdisciplinary approach, this book will be of interest to a wide audience of students, researchers, practitioners, and policy-makers concerned with how the impacts of climate change affect the social, cultural, political, and economic stability of national interests.

Model-Based Reasoning in Science, Technology, and Medicine Lorenzo Magnani, Ping Li, 2007-06-30 The volume is based on papers presented at the international conference on Model-Based Reasoning in Science and Medicine held in China in 2006. The presentations explore how scientific thinking uses models and explanatory reasoning to produce creative changes in theories and concepts. The contributions to the book are written by researchers active in the area of creative reasoning in science and technology. They include the subject area's most recent results and achievements.

German as Contact Zone Russell West-Pavlov, 2019-09-09 This book suggests that linguistic translation is one minute province of an immense process of creative activity that constitutes the world as an ongoing dynamism of unceasing transformation. Building upon the speculative quantum gravity theory, which provides a narrative of the push-pull dynamics of transformative translation from the very smallest scales of reality to the very greatest, this book argues that the so-called translative turn of the 1990s was correct in positing translation as a paradigmatic concept of transformation. More radically, the book stages a provocative provincialization of linguistic translation, so that literary translation in particular is shown to display a remarkable awareness of its own participation in a larger creative contact zone. As a result, the German language, literary translations in and out of German, and the German-language classroom, can be understood respectively as quantum contact zones. Russell West-Pavlov is Professor of Anglophone Literatures at the University of Tübingen and Research Associate at the University of Pretoria.

The Regulation of Power Exchanges in Europe Martha M. Roggenkamp, François Boisseleau, 2005 The liberalisation of the electricity sector has changed the way in which electricity is traded. De facto or legal vertical monopolies are gradually abandoned and new participants have entered the market. At the wholesale level, one of the important developments is the

establishment of organised electricity markets, i.e. electricity power exchanges. This book analyses the role and evaluates the impact of these new organised markets, which until now received little attention. The introduction provides an overview of the developments on EC level as this creates the legal environment within which power exchanges operate. The implementation of the EC Electricity Directive has inter alia resulted in a commodization of electricity trading. Thereupon the development of power pools and electricity exchanges is discussed as well as the products which can be traded. Subsequently, the development of the most important national and/or regional exchanges in Europe will be examined. National experts will analyse the role of power exchanges in the Nordic countries, the United Kingdom, the Netherlands, Germany, France, Austria, Spain and Italy. The authors analyse the most important developments in their jurisdictions according to a fixed outline (e.g. implementation of the EC Electricity Directive, market structure, emergence and functioning of the organised market, products traded and the impact of cross-border trade) which allows for a comparative analysis and facilitates understanding. Finally, some conclusions with regard to the establishment of a single electricity market will be presented as well as some future developments.

Innovative Built Heritage Models Koenraad van Balen, Aziliz Vandesande, 2018-01-29 Several international and European institutions have given increasing importance to sustainable approaches to our existing building stock and the role of built heritage in this process. At the same time, preventive and planned conservation of built heritage has been increasingly recognised by researchers given its cost-effectiveness for owner-managers, effective long-term quality protection and environmental enhancement of structures, as well as its potential of activating heritage in the employment sector and empowering of local communities. 'Innovative Built Heritage Models' collects the lectures presented at the international conference on CHANGES (2017 Thematic Week, Leuven, Belgium, 6-8 February 2017). The aim of the conference was to provide an international overview of the existing strategies, processes and operational case studies that support the implementation of a preventive and planned conservation approach in the built heritage sector. The conference twins with the 'CHANGES' project, supported by the Joint Programming Initiative Heritage Plus programme. This publication meets the increasing demand for shared information to support the transition towards a more sustainable conservation process. The volume consists of three main parts: 'The CHANGES paradigm', 'Preventive and planned conservation' and 'Case studies of Change'. The book reflects on CHANGES in a straightforward manner by providing research and case studies that serve as baseline records, guidance and essential literature for researchers and practitioners involved in the built heritage sector.

India's Approach to Border Management Pushpita Das, 2022-12-29 This book attempts to provide a comprehensive understanding of the circumstances which have shaped India's approach towards its international borders and the framework it has developed to better manage its borders. The book argues that persistence of various cross-border threats

and challenges and an absence of robust intra-regional trade among its neighbouring countries forced India to employ a security-centric and unilateral approach to border management with emphasis on hardening the borders to cross-border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats. Besides discussing the threats and challenges that India faces along the borders, the book aims to develop an understanding of India's border management practices by analysing various programmes and initiatives such as the raising of border guarding forces; building of physical and electronic fences; the establishment of modern facilities for smoothening legitimate cross-border travel; the development of the border areas through special programmes; and increasing trade and connectivity as well as other cooperative bilateral mechanisms. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan).

Professionalism in the Built Heritage Sector Koen van Balen, Aziliz Vandesande, 2019-03-14 Professionalism entails the conduct, aims and qualities that characterise a profession. The term is also used to describe education and training standards for the knowledge and skills necessary to perform a specific profession. In practice, professional standards of practice and ethics are agreed upon and maintained by recognised associations. In the past, professionalism has not occupied a central place in built heritage discussions, policy and research. Recent changes in terms of public attitudes and sustainability concerns have had a cumulative impact on the requirements for professionalism in the built heritage sector. The future success of the sector will depend on the availability of adequate professionals and an appropriately skilled workforce. In practice, the built heritage sector involves much more than interventions to conserve, preserve, rehabilitate or restore a heritage structure. Bringing a project to fruition begins with the formulation of a policy, proceeds to the design and execution of intervention strategies and ends with ongoing maintenance of heritage structures and related future programming. This process requires sufficient interactions between different professionals to obtain a common vision and hold that vision throughout a project. At the same time, the sustainability of the sector is also defined by effective governance, societal support and cultural rationales. Professionalism in the Built Heritage Sector contains reports on the lectures of the international conference organized by the Raymond Lemaire International Centre for Conservation (Leuven, Belgium, February 5th-8th, 2018). The contributions in this volume meet the increasing demand for shared information to support the transition towards a more sustainable conservation process. The volume consists of three main parts that deal with practice-led research or scientific research: Profiles and capacities, Education, training and quality labels, and Obstacles and changes.
