Diffusion of Innovations, 5th Edition Everett M. Rogers, 2003-08-16 Now in its fifth edition, *Diffusion of Innovations* is a classic work on the spread of new ideas. In this renowned book, Everett M. Rogers, professor and chair of the Department of Communication & Journalism at the University of New Mexico, explains how new ideas spread via communication channels over time. Such innovations are initially perceived as uncertain and even risky. To overcome this uncertainty, most people seek out others like themselves who have already adopted the new idea. Thus the diffusion process consists of a few individuals who first adopt an innovation, then spread the word among their circle of acquaintances—a process which typically takes months or years. But there are exceptions: use of the Internet in the 1990s, for example, may have spread more rapidly than any other innovation in the history of humankind. Furthermore, the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people. The fifth edition addresses the spread of the Internet, and how it has transformed the way human beings communicate and adopt new ideas.

Diffusion of Innovations Everett M. Rogers, 1962 Literature survey of the sociological aspects of mass media of innovations - covers research, cultural factors and traditional norms, the adoption process (decision making and discontinuance), innovators, computer simulation, opinion leadership, personal influence, prediction, social implications, etc. Bibliography pp. 317 to 358.

Handbook of Research on Demand-Driven Web Services: Theory, Technologies, and Applications Sun, Zhaohao, 2014-03-31 In the current technological world, Web services play an integral role in service computing and social networking services. This is also the case in the traditional FREG (foods, resources, energy, and goods) services because almost all traditional services are replaced fully or partially by Web services. *Handbook of Research on Demand-Driven Web Services: Theory, Technologies, and Applications* presents comprehensive and in-depth studies that reveal the cutting-edge theories, technologies, methodologies, and applications of demand-driven Web, mobile, and e-business services. This book provides critical perspectives for researchers and practitioners, lecturers and undergraduate/graduate students, and professionals in the fields of computing, business, service, management, and government, as well as a variety of readers from all the social strata.

What's Wrong with the Diffusion of Innovation Theory? Kalle Lyytinen, Jan Damsgaard, 1998 Abstract: This paper

examines the usefulness of the diffusion of innovation research (DOI) in developing theoretical accounts of the adoption of complex and networked IT solutions. We contrast six conjectures underlying DOI research with field data obtained from the study of the diffusion of EDI. Our analysis shows that DOI based analyses miss some important facets in the diffusion of complex technologies. We suggest that complex IT solutions should be understood as socially constructed and learning intensive artifacts, which can be adopted for varying reasons within volatile diffusion arenas. Therefore DOI researchers should carefully recognize the complex, networked, and learning intensive features of technology; understand the role of institutional regimes, focus on process features (including histories) and key players in the diffusion arena, develop multi-layered theories that factor out mappings between different layers and locales, use multiple perspectives including political models, institutional models and theories of team behavior, and apply varying time scales while crafting accounts of what happened and why. In general the paper calls for a need to develop DOI theories at the site by using multiple levels of analysis.

Network Models of the Diffusion of Innovations Thomas W. Valente, 1995 Analyzes how patterns of communication, seen as social networks, determine how quickly innovations from hula hoops to computer technology spread through society and the timing of each individual's adoption of them. Combines threshold models, which focus on individuals, with critical mass models, which describe social systems, to arrive at a comprehensive picture. Paper edition (unseen), \$19.95. Survival trees - a new method in innovation theory Burkhard von Wangenheim, 2012-05-15 Diploma Thesis from the year 2004 in the subject Business economics - Miscellaneous, grade: 1,0, Humboldt-University of Berlin (Wirtschaftswissenschaften), language: English, abstract: The thesis deals with survival trees and their application to the analysis and prediction of innovation processes. The purpose of the conducted research was (1) to investigate the appropriateness of survival trees for innovation diffusion research by means of an application of the method to a real dataset, (2) to give an overview of the current state of research on the survival tree method, and (3) to compare survival trees to more established methods of event history analysis, such as hazard rate models, in order to discuss both advantages and disadvantages of survival trees vis-à-vis alternative approaches.

Partial Least Squares Structural Equation Modeling and Complementary Methods in Business Research XinYing Chew, Abbas Gatea Atiyah, Alhamzah Alnoor, Sammar Abbas, Yousif Raad Muhsen, Gül Erkol Bayram, 2025-09-28 This book offers a practical and accessible guide to Partial Least Squares Structural Equation Modeling (PLS-SEM) in business research, while addressing its limitations by integrating complementary methods such as artificial neural networks (ANN), fuzzy-set qualitative comparative analysis (fsQCA), and multi-criteria decision-making (MCDM). It supports early-career researchers, postgraduate students, and practitioners in navigating complex models, predictive analytics, and latent

construct measurement. By focusing on emerging business issues like digital transformation, metaverse, and sustainability, this book delivers clear, applied insights. Readers gain not only foundational knowledge of PLS-SEM but also strategies for enhancing research rigor, prediction, and decision-making using hybrid approaches. This is a timely and essential resource for scholars aiming to advance their methodological toolkit for impactful and actionable business research.

Technologies and Trends in the Halal Industry Nor Aida Abdul Rahman, Kamran Mahroof, Azizul Hassan, 2023-11-22
With recent technological developments, touted also as Industry 4.0, numerous articles published over the years have emphasized the need to investigate the role of technology across all sectors including the halal industry. This book provides a greater understanding of the technologies, trends, and debates associated with the halal industry from different sectors such as food, logistics, pharmaceutical, tourism, medical, cosmetic, and the retail sector. The book adds substantial discussion to the issues and trends of technology applications in the halal industry as well as the theories underpinning halal technology studies. It is in four sections: an overview of the halal industry, selected theories, technology, and recent issues. The contributors explore how technology has evolved and been applied in industry, and also look at how Industry 4.0 technologies like blockchain, Internet of Things (IoT), automation, machine learning, and augmented reality are being integrated in the halal supply chain process. Written by well-regarded scholars and international academics from Africa, Europe, Middle East, and Asia, this book provides expert contributions from research, regulatory, and industry perspectives. This book will interest upper level students, scholars, academics, and practitioners in the various discipline of tourism and travel, hospitality, food studies, marketing, pharmaceutical and medical, logistics, management, Islamic studies and information technology in the halal industry.

Strategic Aspects of the Taiwanese Educational System and Lessons for Nigeria Timothy Oziegbe Okpeku, 2022-12-28 Research Paper (postgraduate) from the year 2022 in the subject Pedagogy - School System, Educational and School Politics, grade: 75/100 (B), , language: English, abstract: The main objective of this study was to examine the perceptions of teachers, school administrators, faculty members, and department chairs on the strategic aspects of the Taiwanese educational system lessons for Nigeria. The study sifted through the debates surrounding the Nigerian education system. Compulsory 12-year schooling, higher education, teacher education, special education, arts education, supplementary, and continuing education were also examined as strategic aspects of the Taiwanese education system. Because the study sought to view only Taiwanese teachers, school administrators, faculty members, and department chairs about the strategic aspects of the Taiwanese education system, an ex-post facto research design was deemed most appropriate for the study. A questionnaire checklist was used in the study to elicit the perceptions of 179 teachers, school administrators, faculty members, and department chairs in public institutions in Taiwan. The instrument was reviewed by experts for content validity. Based on the judge's understanding of the strategic aspects of the Taiwanese education system,

their views and opinions were sufficiently qualified to provide insight into the reliability of the instrument. Data were analyzed using percent frequency, means, standard deviation, and Pearson Product Moment Correlation Coefficient (PPMC).

Innovation Diffusion Models Mariangela Guidolin, 2023-09-18 Innovation Diffusion Models Understand innovation diffusion models and their role in business success Innovation diffusion models are statistical models that predict the medium- and long-term sales performance of new products on a market. They account for numerous factors that contribute to the life cycle of a new product and are subject to continuous reassessment as markets transform and the business world becomes more complex. In a modern market environment where product life cycles are becoming ever shorter, the latest innovation diffusion models are essential for businesses looking to perfect their decision-making processes. Innovation Diffusion Models: Theory and Practice provides a comprehensive and up-to-date guide to these models and their potential to impact product development. It focuses on the latest product diffusion models, which combine time series analysis with nonlinear regression techniques to create increasingly refined predictions. Its combination of mathematical theory and business practice makes it an indispensable tool across many sectors of industry and commerce. Innovation Diffusion Models readers will also find: Real-world examples demonstrating the kinds of data sets generated by new product growth models and their potential applications Discussion of the factors underlying the decision to select a given growth model for a particular product Clear, detailed explanation of each model's explanatory ability Innovation Diffusion Models is an essential volume for practitioners in any field of industry or commerce, as well as for graduate students and researchers in business and finance.

Artificial Intelligence: Georgetta Robinson, 2025-02-12 Artificial Intelligence: Cultural Competency, Service Learning and Community Service expanding access to justice focuses on assessing attitudes toward community service, using the Community Service Attitudes Scale, social responsibility development, using the Scale of Service-Learning Involvement, and cultural competence, using the Cultural Competence Awareness model. Data collection occurred during the COVID-19 pandemic and provides implications for service learning in a pandemic environment. Additional research is explored on the dialectic (interaction) of Artificial Intelligence (AI) with evidence-based practitioners in education as it relates to transformational leadership policy, research, and training development.

Indigenous Health and Well-Being in the COVID-19 Pandemic Nicholas D. Spence, Fatih Sekercioglu, 2022-08-31

This book investigates the impact of the COVID-19 pandemic on the health and well-being of Indigenous Peoples and assesses the policy responses taken by governments and Indigenous communities across the world. Bringing together innovative research and policy insights from a range of disciplines, this book investigates the impact of the COVID-19 pandemic on the health and well-being of Indigenous Peoples across the world, with coverage of North America, Central America, Africa, and Oceania. Further, it explores the actions taken by governments and Indigenous communities in addressing the challenges posed by this public health crisis. The book emphasises the social determinants of health and well-being, reflecting on issues such as self-governance, human rights law, housing, socioeconomic conditions, access to health care, culture, environmental deprivation, and resource extraction. Chapters also highlight the resilience and agency of Indigenous Peoples in combating the COVID-19 pandemic, despite the legacy of colonialism, patterns of systemic discrimination, and social exclusion. Providing concrete pathways for improving the conditions of Indigenous Peoples in the wake of the COVID-19 pandemic, this book is essential reading for researchers across indigenous studies, public health, and social policy.

Theory in a Nutshell Don Nutbeam, Elizabeth Harris, 2004 The use of theory in the planning and implementation of health promotion programs will more reliably produce positive outcomes. Following on from the success of the first edition, Theory in a Nutshell 2nd Edition explores the main theoretical concepts and models in health promotion and explains the significance, practical application and impact of different theories on the individual, community and organization. This edition includes concise reviews of established theories, such as social cognitive theory and health belief model, as well as expanding on new developments in the field including evidence-based policy making and health impact assessment. Thoroughly revised and updated, the book maintains the accessible style suitable for public health practitioners, health promotion and health education specialists, epidemiologists and social policy makers, as well as students of public health and health promotion. Features: *Written for public health practitioners, health promotion specialists and students *Explains the core theories and concepts and applies them to a variety of common community contexts *Thoroughly updated information distilled into a concise, accessible format *Authors are internationally recognized leaders in the field About the Authors: Don Nutbeam is Pro vice-Chancellor and Head of the College of Health Sciences at Sydney University. He was formerly Head of Public Health in the UK Department of Health. Elizabeth Harris is Director of the Centre for Health Equity Training, Research and Evaluation at the University of New South Wales.

Economic Trends and Sustainable Environmental Assessment Andrew Adewale Alola, Festus Victor Bekun, Uju Violet Alola, 2024-08-30 The book 'Economic Trends and Sustainable Environmental Assessment' attempts to x-ray the economic and socioeconomic activities, and cultural or behavioural aspects from the concept of sustainability by employing several

related research scenarios spanning the micro-, meso-, and macro-level approaches. Given the increasing awareness of the importance of social, economic, environmental, and even now human sustainability aspects to a sustainable global (present) future, the relevance of the dimensions of Sustainable Development Goals (SDGs) need to be consistently examined. For instance, decades of climate-related disasters which have increasingly endangered humans are the reason for ongoing advanced advocacy, policy, and research towards achieving an environmentally sustainable or net zero emission (NZE) future. Thus, considering the illustration of the theoretical and practical dimensions of the connectedness of the economic and socioeconomic aspects with environmental dimensions, this book should hugely benefit students, researchers, and policymakers to further understand and solve some of the world's lingering challenges.
