So You Want to Be a Teacher? Phil Ridden,Tracey Gray,2013-01-01 *So You Want to Be a Teacher?* is an Australian guide designed to assist current and prospective teaching students in making the right decision about their future career. The book explores: Why you might want to be a teacher & why you might not The personal qualities required, so that you can consider whether you fit the profile What teachers actually do, the pay and the conditions How you will train to be a teacher The many options a teaching qualification offers and areas of specialisation The professional teaching standards within a national curriculum framework Throughout the book, the realities of teaching across all educational sectors are encapsulated through the voices of successful teachers - many of whom are finalists in the National Excellence in Teaching Awards. In addition, the account of one teacher's journey from struggling student to educational leader provides an inspirational tale. Fully referenced, with an appendix listing teaching courses throughout each state and territory, *So You Want to Be a Teacher?* will ensure that if you do pursue a career in teaching, it will be with true conviction and the passion to thrive.

Global Learning in the 21st Century Tassos Barkatsas,Adam Bertram,2016-10-26 In this 21st century, technological and social changes have never been as rapid as before, and educative practices must evolve and innovate to keep up. What is being done by educators today to prepare future global citizens? What are the skills and competencies that will be required by our students? What changes in how we approach education might need to be made? This book presents a modern focus on some significant issues in teaching, learning, and research that are valuable in preparing students for the 21st century. The book discusses these issues in four sections. The first section presents contemporary, innovative curriculum and pedagogical practices that are relevant for the 21st century. This also includes how social networking has an integrated role within current educative practice. The next section then explores issues and current research around motivation and engagement, and how these are changing in this era of technological and social change. The third section presents debates around inclusion and social contexts, both global and local. Finally, the fourth section explores current discourses in regard to internationalisation and globalisation and how these are being considered in educational research. The book is an important representation of some of the work currently being done for these rapidly changing times. It will appeal to academics, researchers, teacher educators, educational administrators, teachers and anyone interested in preparing students for a modern and globally interconnected world.

Understanding the Classical Music Profession Dawn Elizabeth Bennett, 2016-02-24 Understanding the Classical Music Profession is an essential resource for educators, practitioners and researchers who seek to understand the careers of classically-trained musicians, and the extent to which professional practice is reflected within existing classical performance-based music education and training. Taking Australia as a case-study, Dawn Bennett outlines how Australia is now a service economy, and an important component of service provision is in the culture and recreation industries. Despite this, employment in culture and recreation is poorly understood and a lack of cultural intelligence contributes to a less than satisfactory environment that inhibits the creative potential of cultural practitioners. Musicians in the twenty-first century require a broad and evolving base of skills and knowledge to sustain their careers as cultural practitioners. Bennett maintains that a musician cannot be simply defined as a performer, but that a musician is someone who works within the profession of music in one or more specialist fields. The perception of a musician as a multi-skilled professional working within a portfolio career has significant implications for policy, funding, education and training, and for practitioners and students seeking to achieve sustainable careers. This indispensable book provides a comprehensive analysis of life as a musician, from education and training to professional practice as well as revealing the structure of the Australian cultural industries. Although Australia is the focus of the book, the basis of the research originates from many different places and most of the issues discussed relate directly to other countries throughout the world.

Diagraphics,

Technology-Enhanced Learning and the Virtual University Michael David Sankey, Henk Huijser, Rachel Fitzgerald, 2023-09-20 Since the first works on Higher Education Administration in the 1970s no comprehensive work in terms of purpose and scope of Higher Education has been published. There have been important changes in people's aspirations vis-à-vis higher education globally. In parallel, the higher education systems, worldwide, have been undergoing constant transformation in response to these aspirations. From governments, employers and prospective students and their parents, the stakeholders in higher education system are now extremely varied paying close attention to the various aspects of higher education - from infrastructure, on-campus safety and security to administration, faculty and curricula. The present series attempts to take into account the issues of importance to all the stakeholders. Hence the series not only pays attention to the purpose and outcomes of higher education but also the economics surrounding higher education vis a vis marketization. The nitty gritty of running and maintaining a university infrastructure, impact of globalization and internationalization on delivery and demand of higher education, the commoditization of research, and changing paradigms of teaching and learning fall within the purview of the series. The increasing competition from other entities to provide degrees, certificates or other forms of credentials makes it important to have a work that brings all of the elements together

to see how they actually interact and inter-relate from a systems perspective. The present series attempts to comprehensively attend to these issues and provide a complete reference resource to all those involved and interested in setting up of a Higher Education institution and its administration.

Sustainability in the Australasian University Context Walter Leal Filho, David Carpenter, 2006 Due to their wealth of experiences and well-organised structure, Australasian universities provide a good example of how to promote sustainability in respect of policy as well as academic practice. To last, sustainability initiatives must be incorporated into the structures and operational systems of universities.
