Despite the proliferation of online degree and certificate programs, only a handful of large, name-brand institutions have the resources to master the challenges of marketing and recruitment. This book includes a first-of-its-kind blueprint for colleges and universities working to set up online programs that can grow their enrollment and support their operations financially. These accessible chapters provide step-by-step marketing strategies, detail the specific needs and values of fully online enrollees, and explore the staffing, talent, and technologies needed to competitively recruit new students.

Forward-Looking Practices to Onboard Generation Z at Entry-Level Dr. Assefa Belay Wondim, 2024-12-12 Forward-Looking Practices to Onboard Generation Z at Entry Level depicts the doctoral study of Dr. Assefa Belay Wondim conducted at Capella University. The doctoral study is about the identification of a set of forward-looking practices to effectively onboard Gen Z new employees at the entry-level as viewed by a nationwide panel of human resource policy experts and the determination of the extent to which there was a consensus of opinion among these experts as to the desirability, feasibility, and importance of these practices. The outcome and findings of the project could have significance for practitioners and business organizations engaged in onboarding Gen Zs, as well as for the body of knowledge in the field of HRM. The project findings could serve as a blueprint on how to manage the talent of Gen Zs by understanding and aligning the work needs, values, and expectations of Gen Zs for onboarding with organizational onboarding practices. The talent management of Gen Z might, through effective onboarding practices, contribute to a reduction in employee turnover, which, in turn, could result in onboarding cost reduction and an increase in productivity for the organization. Although the doctoral study findings primarily relate to the IT industry, the project outcomes could also be applied to other business organizations to minimize employee turnover, reduce onboarding costs, and increase new hires' productivity. The utility of the consensus-based

desirable and feasible solutions may go beyond onboarding Gen Z new employees. The experts have expressed their 100% confidence in the utility of the consensus-based desirable and feasible solutions for onboarding new employees across generations. About the Author Dr. Assefa Belay Wondim is a former employee of the United Nations Organization. During his long service with the Organization, Dr. Wondim has accumulated rich knowledge in intergovernmental socio-economic, peace and security, and administrative affairs. During his tenure with the UN, he excelled in research and development, project management, human resource management, strategic planning and execution, team building, leadership, and administration. Dr. Wondim is member of the National Association of African Americans in Human Resources (NAAHR); the global and Jacksonville, Florida, chapters of the Society of Human Resource Management (SHRM and SHRMJAX); and the Xi Delta chapter Capella University of the Delta Mu Delta International Honor Society in Business. Dr. Wondim obtained a BSc degree in Mathematics and MSc degree in Demography in Ethiopia. He also obtained a Doctor of Business Administration degree in human resource management in the USA. Dr. Wondim has written an autobiography book titled Zantai (My Life Story). He is happily married and blessed with four successful children.

**Beyond Earth** Bob Krone,2006 This is a critical time for the space program, and for all of us. Even the significant steps that we have taken since the dawn of the space age in 1957, including orbital flight, the Moon landings, and orbiting space stations, will in retrospect seem to be tiny steps compared to what lies ahead. Migrating into space will challenge us beyond anything we have previously accomplished, and we are destined to face adventures that are both fantastically breathtaking and supremely dangerous. Beyond Earth is for everyone interested in humankind's next great adventure -- the human settlement of the Solar System. A unique collection of world-class scholars, scientists, engineers, managers, astronauts, artists, authors, and professors examine the key questions of our unique circumstance at the dawn of a new era in space exploration and development: Why does space matter to us? What can we use it for? How can we get there efficiently? What will ordinary life be like in space? What will our homes be like on the Moon? On Mars? In orbit? Will we play? Will we love? The book does not stop with questions. It goes beyond the dramatic, the superficial, and the overly technical to the prescriptive, literally laying the brick and mortar for our future space faring civilisation. Contributing authors come from both hard and soft sciences; include education and the arts; and ask children, who will be the future space dwellers, for their visions. They document needed research. There are three underlying assumptions driving this book: First, that the human urge for flight, exploration and survival, plus its curiosity about the universe, are deeply embedded in our genes and in our minds; Second, that even if these urges were ignored, the continual improvement of the quality of life for the human race on

earth, and perhaps even its ultimate survival, hinge on the successes of human exploration and habitation of space; and, Third that our generation can use the opportunity presented by outwards expansion to design a rewarding and exciting future of collaboration to capitalise on the lessons learned from human history on Earth.
