

Disengaging From A Relationship

Mark L. Knapp

Close Relationship Loss Terri L. Orbuch, 2012-12-06 Social scientists from various disciplines have been increasingly concerned with the nature, structure, and function of close relationships. Although most of the early work on the topic of close relationships drew attention to the development of close relationships, since the mid-1970s researchers have begun to investigate the many different aspects connected to the loss of close relationships. Despite the change to a more comprehensive conceptual framework, close relationship research is often criticized for being atheoretical; the research is criticized for being purely descriptive in nature and thus lacking a more theoretical framework. Contrary to this belief, I wish to argue that researchers in the area of close relationship loss employ several critical and prominent theoretical perspectives to describe, explain, and understand the endings of relationships-thus, the fruition of this book. The major aim of this edited book is to present and illuminate, within one volume, some of these major theoretical perspectives. The volume as a whole has several unique qualities. First, within each chapter, the authors provide a general overview of the theoretical perspective or approach within which they examine close relationship loss.

Understanding Research in Personal Relationships William Dragon, Steve Duck, 2005-05-01 Understanding Research in Personal Relationships is a comprehensive introduction to the key readings on human and close relationships. Organized into twelve thematic chapters with editorial commentary throughout, the editors offer a critical reading of the major research articles in the field of relationship studies published in the last few years. Scholarly papers, two per chapter, are presented in an abridged form and critiqued in a carefully structured way that instructs students on the way to read research, and to critically evaluate research in this field. The book, therefore, has a thoroughly didactic focus as the student is given historical, theoretical and methodological contexts to each article as well as an explanation of key terms and ideas.

The Emerging Field of Personal Relationships Robin Gilmour, Steve Duck, 2021-10-07 Originally published in 1986, this book is a result of the first International Conference on Personal Relationships held in 1982. The conference itself was a significant event in publicly bringing together major figures whose work was starting to define the new area of personal relationships. The chapters are arranged to follow the structure of the conference program, with major opening and closing discussions covering the whole field and the rest of the chapters grouped under the headings of Depiction and Taxonomy of Relationships; Development and Growth of Relationships and Disorder and Repair of Relationships. The result is by no means

a comprehensive treatment of the field, but the editors hoped that the book highlighted significant issues in personal relationship research as well as some excellent examples of the ways in which issues and problems were being tackled at the time. They also hoped that it would have an effect on the future development of the field of personal relationships by indicating its value and potential.

Cognition, Communication, and Romantic Relationships James M. Honeycutt, James G. Cantrill, 2014-04-08

Cognition, Communication, and Romantic Relationships focuses on the role of memory, communication, and social cognition in the development of romantic relationships. The authors review developmental models of communication and examine criticisms of these models. They also explore the stages through which relationships escalate and deteriorate, and consider the processes for such activities as meeting new people, dating, sexual intercourse, and terminating relationships. Differences between men and women are discussed throughout the text, in light of current research supporting systematic gender differences in how people think about romance and relationships. As an extended analysis and research review of how thinking about romance influences and is influenced by communicative processes, this text offers a deeper understanding of the cognitive and communicative factors involved in relationship processes. It is designed for use in courses on interpersonal relationships and intimate relations in social psychology, communication, counseling psychology, clinical psychology, and sociology.

Understanding Personal Relationships Steve Duck, Daniel Perlman, 1985

Understanding Personal Relationships introduces readers to the new interdisciplinary field of personal relationships. It does so by integrating central themes from the fields of social psychology, sociology, clinical psychology and family studies. In a comprehensive, bibliographic essay, the editors give an overview of the growth of the field and predict future areas of research and clinical practice. Early chapters deal with some of the theoretical issues in the study of personal relationships, while other contributors discuss the motivational issues in relationships. Five chapters examine specific types of relationships: those which are established (like marriage); those which are in a state of transition; those which are under stress; and those which have broken. Through its breadth of coverage and the presentation of writers from several different disciplines, this volume conveys the spirit of pioneering and practical optimism that characterizes the new interdisciplinary approach to understanding personal relationships.

Interpersonal Communication

Pamela J. Kalbfleisch, 2013-09-13 Interpersonal relationships are the core of our societal system and have been since before the dawn of civilization. In today's world, friends, lovers, companions, and confidants make valuable contributions to our everyday lives. These are the relationships whose members are not automatically participants as a result of their birth and kin affiliations. The focus is on these relationships that must be forged

from the sometimes indifferent, and sometimes hostile world. Yet, there is still much that is not known about how these relationships evolve, how partners communicate in on-going relationships, how people keep their relationships together, and how they cope when they fall apart. Primary to the focus of this book is the underlying theme of evolving interpersonal relationships from the initial encounter to the mature alliance. The contributors to this volume provide a contemporary perspective for the study of interpersonal relationships. Fresh areas of scholarly inquiry are presented and existing approaches are re-examined. Research in the introductory chapters breaks new ground, and appraises the ultimate question of what impact initial interactions have on further relational development. The mid-section of the volume concerns communication issues that confront the members of a relationship in process, focusing on how conflict and jealousy are communicated to a relational partner. This research considers relational development as well as obstacles and barriers to evolving relationships. The concluding chapters probe the question: Ultimately do all good things have to come to an end? Employing innovative techniques to examine maturing and disengaging relationships, the research presented here focuses on how interpersonal relationships become committed and mature.

Interpersonal Communication and Human Relationships Mark L. Knapp, 1983 B> Written by two well-respected researchers and authors in the field, this book offers the most comprehensive and widely-used developmental and analytical approach to communication in close relationships. It focuses on the role of communication in the coming together and the coming apart of relationships. This accessible book introduces readers to relational communication theories by using common examples relationships with roommates, friends, and parents to help readers better understand concepts. Furthermore, the book's core model, introduced in Chapter 2, can be applied to the diverse range of relationships that readers have experienced or will experience throughout their lives. A classic for more than twenty years, *Interpersonal Communication and Human Relationships* retains all of its highly-praised features in the fourth edition, including the latest research from communication and social psychology; thorough coverage of dialogue, speech, and interaction patterns; interesting boxed inserts, cartoons, and diagnostic tests; and an effective writing style that engages readers and holds interest. For readers interested in communication as it relates to various close relationships.

Readings in Gender Communication Phil Backlund, Mary Rose Williams, 2004 READINGS IN GENDER COMMUNICATION is a compilation of studies, stories, analyses, and personal testimonies contributed by communication, gender, psychology, and sociology scholars and students. The reader is designed as a supplemental text for a gender communication course with primary emphasis given to demonstrating how gender theory is applicable to students' lives.

Making Connections Kathleen M. Galvin,2006 The Fourth Edition has been updated, expanded, and reorganized to reflect the changing field of relational communication. New essays address emerging topics such as anti-comforting messages, friendship in urban tribes, and discourse-dependent families. The new edition also contains a new section on the dark side of communication with articles on topics such as lying and irresolvable conflicts. Three out of four of the essays in the technology section are new, reflecting current thinking in Internet-based interpersonal relationships, communication norms in an online support group, and how student use of technology challenges existent communication theories. A complete subject index has been added. The book also features a new accompanying Instructor's Manual. between basic communication competencies and relationships; feature a developmental approach in terms of initiating, sustaining, and ending relationships; and, reflect direct applications of relational issues within contexts of family, friendship, and technology; explore issues relating to computer-mediated communication and new technologies in everyday life. The editors Galvin and Cooper maintain a similar framework as featured in previous editions, using gender, family, and culture as lenses through which to view and make sense of relational communication.

Empowerment in Dispute Mediation Jonathan Shailor,1994 Over the past 20 years, informal dispute resolution has played an increasingly important role in the way people handle their conflicts. Mediators are said to act as neutral third parties who empower disputants to negotiate their own mutually acceptable agreement. Shailor proposes a definition of empowerment in which communication is the primary social process, the ongoing symbolic interaction which not only reflects reality, but constitutes it. Using this definition, he analyzes the process of empowerment by examining the verbal and nonverbal interactions in three mediation cases, identifying the patterns of communication through which empowerment does or does

not occur. Shailor concludes that mediators need to develop a more sophisticated understanding of their interactions with disputants, including an understanding of the ways that mediators can become enmeshed in the disputants' ongoing struggles.

Social Exchange in Developing Relationships Robert Lee Burgess, Ted L. Huston, 1979 *Social Exchange in Developing Relationships* is a collection of papers that deals with the systematic study of the development of relationships. The papers discuss several theoretical perspectives, such as evolutionary theory, personality theory, cognitive developmental theory, equity theory, role theory, and attribution theory. One paper discusses romantic relationships—the evolution of first acquaintance to close or intimate commitment. Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes, eventually influencing the nature of the relationship. Commitment requires specific concepts such as input levels contributed to the relationship, duration of these inputs, and their consistency of occurrence. The equity theory suggests that equity principles determine the selection of one's mate and how they (the partners) will get along in the future. One paper analyzes the dynamic theories of social relationships and the resulting research strategies: that the conceptualization of a parameter of a social relationship can affect the choice of data collection techniques and other matters. Sociologists, psychologists, historians, students, and academicians doing sociological research, can benefit greatly from this collection.
