*Balinese Discourses on Music and Modernization* Brita Heimarck Renee,2013-08-21 While many Western scholars have discussed the technical aspects of Balinese music or the traditional contexts for performance, little has been written in Western languages about Balinese discourses on their music. This dissertation seeks to understand the experience of music in Bali according to Balinese voices through an analysis of oral and written dialogues on music, mainly by musicians and dalangs (shadow play puppeteers) from the village of Sukawati, scholars, teachers, administrators and students from the Indonesian College of the Arts (STSI) in the City of Denpasar. The study examines the influence of modernization on the traditional arts and their role in society. A concentration on Balinese discourses enables individual performers and scholars to represent themselves to a greater extent than previously seen in ethnomusicological scholarship, making this study more of a critical discussion among equals than a Western interpretation of 'others'. This approach permits a rare view into contemporary Balinese conceptions and practices of music.

If so, carefully consider the important marks of a God-glorifying marriage found in this booklet. Strive to put these things into practice, and your marriage will be better for it! Table of Contents: 1. Building on the Word of God 2. Cultivating Spiritual Fellowship 3. Praying Together 4. Practicing Family Worship 5. Loving Your Spouse 6. Developing Good Communication Skills 7. Complimenting Your Spouse 8. Cultivating Physical Intimacy 9. Developing Friendship and Common Interests 10. Developing Togetherness in Parenting Series Description D. Martyn Lloyd-Jones once said that what the church needs to do most all is "to begin herself to live the Christian life. If she did that, men and women would be crowding into our buildings. They would say, 'What is the secret of this?'" As Christians, one of our greatest needs is for the Spirit of God to cultivate biblical godliness in us in order to put the beauty of Christ on display through us, all to the glory of the triune God. With this goal in mind, this series of booklets treats matters vital to Christian experience at a basic level. Each booklet addresses a specific question in order to inform the mind, warm the affections, and transform the whole person by the Spirit's grace, so that the church may adorn the doctrine of God our Savior in all things.

Intellectual Property Law and the Fourth Industrial Revolution Christopher Heath, Anselm Kamperman Sanders, Anke Moerland, 2020-05-22 The convergence of various fields of technology is changing the fabric of society. Big data and data mining, Internet of Things, artificial intelligence and blockchains are already affecting business models and leading to a social and economic transformations that have been dubbed by the fourth industrial revolution. Focusing on the framework

of intellectual property rights, the contributions to this book analyse how the technical background of this massive transformation affects intellectual property law and policy and how intellectual property is likely to change in order to serve the society. Well-known authorities in intellectual property law offer in-depth chapters on the roles in this revolution of such concepts and actualities as the following: power and role of data as the raw material of the revolution; artificial inventors and creators; trade marks in the dimension of avatars and fictional game characters; concept of inventive step change where the person skilled in the art is virtual; data rights versus intellectual property rights; transparency in the context of big data; interrelations of data, technology transfer and antitrust; self-executable and 'smart' contracts; redefining the balance among exclusive rights, development, technology transfer and contracts; and proprietary information versus the public domain. The chapters also provide complete analyses of how big data changes decision-making processes, how sustainable development requires redefinition, how technology transfer is re-emerging as technology diffusion and how the role of contracts and blockchain as instruments of monitoring and enforcement are being defined. Offering the first in-depth legal commentary and analysis of this highly topical issue, the book approaches the fourth industrial revolution from the perspectives of technical background, society and law. Its authoritative analysis of how the data-driven economy influences innovation and technology transfer is without peer. It will be welcomed by practicing lawyers in intellectual property rights and competition law, as well as by academics, think tanks and policymakers.
