Reaching an Understanding John Sabatini,Elizabeth Albro,Tenaha O'Reilly,2012-08-14 Reaching an Understanding: Innovations in How We View Reading Assessment builds upon the editors previous book Measuring Up: Advances in How We Assess Reading Ability by representing some early attempts to apply theory to help guide the development of new assessments and measurement models. Reaching an Understanding is divided into two sections: “assessment, learning, and instruction: connecting text, task, and reader/ learner” and “how to build for the future”. These sections identify ways to assess students reading comprehension through multiple text sources, purpose readings, and assessment while a student is reading in order to determine deficits. In light of federal legislation towards common core standards and assessments, as well as significant national investments in reading and literacy education, it is a critical and opportune time to bring together the research and measurement community to address fundamental issues of measuring reading comprehension, in theory and in practice.

Predictions of Public Opinion from the Mass Media David P. Fan, 1988-10-24 Those of us on the lookout for insights into social behavior must be impressed when a book strikes us as being powerful enough to shake firmly held beliefs in a single reading. Even as we explore the vagueness of social science, we unveil bias that prejudices how we think, what we teach. One bias in the social sciences derives from the influence of 'cognitive dissonance' invoking thoughts of message reinforcement, not opinion change, and suggesting minimal effects of the press. Author David Fan goes far in dissuading those of us who have fallen under the minimalist spell. His clear examination of the power of the American press on public opinion provides compelling evidence for the profound impact the press has on our thinking. Fan, a cellular biologist, parades an impressive array of data to support his contention that opinion can be measured by the application of his mathematical model to the content of national news reports. His findings confirm a clear connection between the content of national news and the results of national opinion polls. *Public Relations Review* This incisive examination of the power of information in society uses a new mathematical model, ideodynamics, to describe social responses to information and suggests that public opinion can be swayed in a predictable fashion by messages acting on the populace. In addition to mathematical modeling, this book also introduces a new method for computer content analysis able to score text for its support of different viewpoints. The method is highly flexible and adaptable, yielding great precision for any topic in any language. Although previous work has indicated that the press is able to set the agenda with regard to public opinion, this book is unique in demonstrating that the press also is able to mold opinion within that agenda. Fan begins with a presentation of ideodynamics followed by an examination of the ability of the mathematical model to incorporate previous theories. He then considers data applications and discusses the conclusions to be drawn from the work. The empirical testing uses the ideodynamic equations and scores from the text analysis to predict time trends of public opinion which correspond strikingly well with actual poll measurements.

Unity and Diversity in Language Use British Association for Applied Linguistics. Meeting, Kristyan Spelman Miller, 2002
The papers in this collection reflect the diversity of approach within the field of applied linguistics at the start of the 21st century. Each paper prompts critical reflection on tensions within the discipline between stability and change, consensus and controversy, similarity and variation.

Rhetorical Traditions and the Teaching of Writing C. H. Knoblauch, Lil Brannon, 1984
The argument of this book is that the earliest tradition of Western rhetoric, the classical perspective of Aristotle and Cicero, continues to have the greatest impact on writing instruction--albeit an unconscious impact. This occurs despite the fact that modern rhetoric no longer accepts either the views of mind, language, and world underlying ancient theory or the concepts about discourse, knowledge, and communication presented in that theory. As a result, teachers are depending on ideas as outmoded as they are unreflectively accepted. Knoblauch and Brannon maintain that the two traditions are fundamentally incompatible in their assumptions and concepts, so that writing teachers must make choices between them if their teaching is to be purposeful and consistent. They suggest that the modern tradition offers a richer basis for instruction, and they show what teaching from that perspective looks like and how it differs from traditional teaching.
