RJ Alexander

Fish in a Tree Lynda Mullaly Hunt, 2015-02-05 A New York Times Bestseller • An emotionally-charged, uplifting novel that will speak to anyone who's ever thought there was something wrong with them because they didn't fit in. Fans of R.J. Palacio's *Wonder* will appreciate this feel-good story of friendship and unconventional smarts." —Kirkus Reviews "Everybody is smart in different ways. But if you judge a fish by its ability to climb a tree, it will live its life believing it is stupid." Ally has been smart enough to fool a lot of smart people. Every time she lands in a new school, she is able to hide her inability to read by creating clever yet disruptive distractions. She is afraid to ask for help; after all, how can you cure dumb? However, her newest teacher Mr. Daniels sees the bright, creative kid underneath the trouble maker. With his help, Ally learns not to be so hard on herself and that dyslexia is nothing to be ashamed of. As her confidence grows, Ally feels free to be herself and the world starts opening up with possibilities. She discovers that there's a lot more to her—and to everyone—than a label, and that great minds don't always think alike. Wish in a Tree Lynda Mullaly Hunt,2025-05-20 An uplifting picture book celebrating neurodiversity, starring characters from Lynda Mullaly Hunt's New York Times bestselling novel *Fish in a Tree* Oliver's brain is a volcano of ideas—always bubbling with questions. This makes it hard to focus at school, and sometimes he worries he won't ever fit in there. So it's a good thing he has a friend who reminds him that great minds don't think alike. And that a brain that blazes with curiosity and imagination is a glorious thing. Featuring artwork showcasing all the wonderful things going on in Oliver's astonishing brain, this uplifting book celebrates out-of-the-box thinking, the power of creativity, and the importance of being proud of the things that set us apart.

Using Young Adult Literature to Work through Wobble Moments in Teacher Education Dawan Coombs,Jon Ostenson,2022-07-25 This volume offers a novel approach to exploring how literary response groups can be used as part of teacher education programs to help preservice teachers navigate wobble moments. Focusing uniquely on the potential of young adult literature (YAL), the text draws on the first-hand experiences of teacher candidates and uses a range of well-known books to demonstrate how narrative-based inquiry and analysis of fictional depictions of teaching and learning can support reflection on a range of common challenges. The volume presents how YAL literary response groups are shown to enhance participants' ability to reflect on practice, build resilience, and develop deeper understanding of pedagogical principles by offering a shared dialogical space. These insights ultimately contribute to teacher education program improvement by enhancing teacher candidates' understanding of pedagogy. This text will benefit researchers, doctoral students, and academics in the fields of teaching, teacher mentoring, and teacher education more specifically. Those interested in literature studies and young adult literature (YAL) more broadly will also benefit from this volume.

Demographic Methods across the Tree of Life Roberto Salguero-Gomez,Marlène Gamelon,2021-08-31 Demography is everywhere in our lives: from birth to death. Indeed, the universal currencies of survival, development, reproduction, and recruitment shape the performance of all species, from microbes to humans. The number of techniques for demographic data acquisition and analyses across the entire tree of life (microbes, fungi, plants, and animals) has drastically increased in recent decades. These developments have been partially facilitated by the advent of technologies such as GIS and drones, as well as analytical methods including Bayesian statistics and high-throughput molecular analyses. However, despite the universality of demography and the significant research potential that could emerge from unifying: (i) questions across taxa, (ii) data collection protocols, and (iii) analytical tools, demographic methods to date have remained taxonomically siloed and methodologically disintegrated. This is the first book to attempt a truly unified approach to demography and population ecology in order to address a wide range of questions in ecology, evolution, and conservation biology across the entire spectrum of life. This novel book provides the reader with the fundamentals of data collection, model construction, analyses, and interpretation across a wide repertoire of demographic techniques and protocols. It introduces the novice demographer to a broad range of demographic methods, including abundance-based models, life tables, matrix population models, integral projection models, integrated population models, individual based models, and more. Through the careful integration of data collection methods, analytical approaches, and applications, clearly guided throughout with fully reproducible R scripts, the book provides an up-to-date and authoritative overview of the most popular and effective demographic tools. Demographic

Methods across the Tree of Life is aimed at graduate students and professional researchers in the fields of demography, ecology, animal behaviour, genetics, evolutionary biology, mathematical biology, and wildlife management.
