web power amplifiers introduction to power amplifiers power  
amplifiers crossover distortion amplifier circuits form the  
basis of most electronic systems many of which need to  
produce high power to drive some output device audio

amplifier output power may be anything from less than 1  
watt to several hundred watts radio frequency amplifiers

web designing high power amplifiers the same is true for an  
integrated monolithic power amplifier however power  
dissipation ratings are equally important to the long term  
reliability of the power amplifier design when using a  
monolithic ic in its intended application and within its  
specified capabilities the thermal
