A Speaker's Guidebook with The Essential Guide to Rhetoric Dan O'Hair, Rob Stewart, Hannah Rubenstein, 2011-10-26 A Speaker's Guidebook is the best resource in the classroom, on the job, and in the community. Praised for connecting with students who use and keep it year after year, this tabbed, comb-bound text covers all the topics typically taught in the introductory course and is the easiest-to-use public speaking text available. In every edition, hundreds of instructors have helped us focus on the fundamental challenges of the public speaking classroom. Improving on this tradition, the fifth edition does even more to address these challenges with stronger coverage of overcoming speech anxiety, organizing and outlining, and more. And as the realities of public speaking change, so does A Speaker's Guidebook; the new edition also focuses on presentational speaking in a digital world -- from finding credible sources online to delivering presentations in a variety of mediated formats. -- From product description.

Critical Reflections on ICT and Education Anna Wing Bo TSO, Wendy Wing Lam CHAN, Steven Kwan Keung NG, Tiffany Shurui BAI, Noble Po Kan LO, 2023-12-13 This book includes selected papers from the Hong Kong Association for Educational Communications and Technology (HKAECT) 2023 International Conference. It provides readers with a collection of insightful chapters which delves into the realms of data visualization, artificial intelligence (AI), virtual reality (VR), and augmented reality (AR). It also reflects on the dynamic shifts in online learning, blended learning, and self-directed learning. Part one of the volume includes case studies and examples of the integration of advanced technologies, such as data visualization, generative AI, and mixed reality in education. Part two shares experiences and observations from educators who embrace online learning, blended learning, and independent learning. Part three investigates the influences digital education has on learning, teaching, and society as a whole. The book paves a path for thought-provoking discussions on the future of education in a digitally connected world. It is a vital resource for educators, administrators, policymakers, and learners seeking to navigate and thrive in the rapidly evolving world of digital education.

Communicating for Results Cheryl Hamilton, Cordell Parker, 1997 Drawing on case studies and research from both management and communications fields, this text provides students with an understanding of the basic concepts and techniques needed to communicate successfully in today's business world. Separate chapters on the communication process and organizational theory form the foundation for later discussions of interpersonal relationships, effective listening, nonverbal communication, and obstacles to organizational communication. Two chapters are devoted to interviewing, with special attention given to informational and employment interview strategies. Subsequent chapters examine small groups and leadership within them. The three final chapters offer guidance in informative and persuasive presentations, including attention to verbal delivery and visual aids.
