Cian Ó Concubhair

The Communicative Architecture of Policing Cian Ó Concubhair,2025-08-05 The Communicative Architecture of Policing is a ground-breaking study of police communications and police-media relations in the social media era. It is based on nearly a decade of research on police-media relations, including two years of extended observational study in local newsrooms and police communications departments, and dozens of interviews with police communicators, chief police officers and journalists. This book is the first to undertake a deep ethnography of both police communications and local news media in a single policing area. It also provides an innovative theoretical reappraisal of the mechanics of police-media power relations, grounded in ideas of legitimacy, mass communications and local governing power. The book describes the lived experiences of journalists through the collapse of the local news media in England: declines wrought in large part by the advent of social media. It also describes a crisis of confidence in local journalism and its perceived institutional status in the local community. By contrast, the book charts the emergence of an empowered, professional police communicator class in policing--and its distinctive cultural features--rooted in the mass communications potential of social media. The book weaves together these empirical insights by developing novel approaches to police legitimacy theory and institutional power relations. This book will be of interest to students, scholars and practitioners in the fields of criminology, media studies, communication studies, journalism and policing.

Community Policing as a Public Policy Rabindra K Mohanty,Satyajit Mohanty,2014-10-21 Keeping in view the role of the police in a modern society, the respect for the rule of law and the trust of the community as a critical resource, more and more police organizations around the world have embraced Community Policing with the objective of making the police sensitive to the needs of the community. However, in the absence of an institutional and legal framework and a resultant lack of understanding of the dynamics of policy processes, many such initiatives failed to stand the tes...

Plural Policing in the Global North Nathalie Hirschmann,Tobias John,Frauke Reichl,Jacqueline Abigail Garand,2022-11-24 The volume brings together an international group of authors discussing basic concepts and approaches to plural policing as well as aspects and practices of plural policing in specific locations. The context comes from the fact that policing activities are nowadays performed by a growing number and variety of police and non-police stakeholders. This development is internationally discussed as 'pluralisation of policing' or plural policing. This book provides insights into plural policing across different countries of the global North. It looks at day-to-day security which is mainly produced at the local level, and where there is considerable diversity in philosophy and practice. Therefore, it allows learnings for possible future developments in the field. This volume contributes to policing studies and is of interest to the wide range of academics dealing with questions of security and order, as well as policy makers and practitioners working on security in their regions.

Reimagining Journalism in a Post-Truth World Ed Madison, Ben DeJarnette, 2018-02-08 Amidst alternative facts and post-truth politics, news journalism is more important and complex than ever. This book examines journalism's evolution within digital media's ecosystem where lies often spread faster than truth, and consumers expect conversations, not lectures. The 2016 U.S. presidential election delivered a stunning result, but the news media's breathless coverage of it was no surprise. News networks turned debates into primetime entertainment, reporters spent more time covering poll results than public policy issues, and the cozy relationship between journalists and political insiders helped ensure intrigue and ratings, even as it eroded journalism's role as democracy's Fourth Estate. Against this sobering backdrop, a broadcast news veteran and a millennial newshound consider how journalism can regain the public's trust by learning from pioneers both within and beyond the profession. Connecting the dots between faux news, fake news, and real news, coauthors Madison and DeJarnette provide an unflinching analysis of where mainstream journalism went wrong—and what the next generation of reporters can do to make it right. The significance of Donald Trump's presidency is not lost on the authors, but *Reimagining Journalism in a Post-Truth World* is not a post-mortem of the 2016 presidential election, nor is it a how-to guide for reporting on Trump's White House. Instead, this accessible and engaging book offers a broader perspective on contemporary journalism, pairing lively anecdotes with insightful analysis of long-term trends and challenges. Drawing on their expertise in media innovation and entrepreneurship, the authors explore how comedians like John Oliver, Trevor Noah, and Samantha Bee are breaking (and reshaping) the rules of political journalism; how legacy media outlets like The Boston Globe, The Washington Post, and The New York Times are retooling for the digital age; and how newcomers like Vice, Harken, and De Correspondent are innovating new models for reporting and storytelling. Anyone seeking to make sense of modern journalism and its intersections with democracy will want to read this book.
