**Training manual for surveillance of suicide and self-harm in communities via key informants** World Health Organization, 2022-12-31 This World Health Organization manual provides comprehensive guidelines for the surveillance of suicide and self-harm in communities, utilizing key informants. It emphasizes the importance of high-quality surveillance data in suicide prevention, highlighting the need to capture data not only from official health and police records but also from community sources, especially in remote areas with limited official documentation. The manual is intended for training fieldworkers, such as health workers, in data collection and interview techniques, aiming to ensure accurate case registration. Supervisors receive additional training on quality assurance and data management. The manual encourages adaptation to local cultural contexts and resources, with the goal of identifying vulnerable populations and emerging trends to inform effective, evidence-based suicide prevention strategies.

**Searching for Words: How Can We Tell Our Stories of Suicide**, 2019-01-04 This volume was first published by Inter-Disciplinary Press in 2013. It is all too easy to begin the introduction of a book examining suicide by citing statistics on rates of death around the world. The vast majority of research seeks to make sense of suicide through quantitative analysis; however, this does not begin to do justice to the lived experience. While we do not wish to suggest there is one 'right' lens through which to study suicide, we must recognize that there are myriad lenses through which to examine it. There are many voices, many stories that must be heeded, and these stories are not just of the people who have themselves died by suicide, but also those who are or have been suicidal and those who have been bereaved by suicide. By examining cultural perspectives, different media, memory and place, as well as loss, this book aims to tell stories of suicide and working and living with the suicidal.

**A Manual of medical jurisprudence** Alfred Swaine Taylor, 1897

**The Gender of Suicide** Katrina Jaworski, 2016-03-09 Drawing on diverse theoretical and textual sources, *The Gender of Suicide* presents a critical study of the ways in which contemporary society understands suicide, exploring suicide across a range of key expert bodies of knowledge. With attention to Durkheim's founding study of suicide, as well as discourses within sociology, law, medicine, psy-knowledge and newsprint media, this book demonstrates that suicide cannot be understood without understanding how gender shapes it, and without giving explicit attention to the manner in which prevailing claims

privilege some interpretations and experiences of suicide above others. Revealing the masculine and masculinist terms in which our current knowledge of suicide is constructed, *The Gender of Suicide*, explores the relationship between our grasp of suicide and problematic ideas connected to the body, agency, violence, race and sexuality. As such, it will appeal to sociologists and social theorists, as well as scholars of cultural studies, philosophy, law and psychology.

**Clinical Manual of Psychosomatic Medicine** Michael G. Wise, James R. Rundell, 2005 Clinical Manual of Psychosomatic Medicine is designed to aid today's busy clinicians with bedside and office consultation. This manual, which presents the distilled wisdom of two highly experienced consultation-liaison psychiatrists, provides quick access to critical information on how to diagnose and treat psychiatric disorders in medical-surgical patients. Because the work of consultation-liaison psychiatrists has been proven to reduce mortality, morbidity, length of stay, and hospital costs in general hospital patients and medical-surgical outpatients, their role in ensuring the effective treatment of these patients is more vital than ever.--Résumé de l'éditeur
