Milk Into Cheese David Asher, 2024-07-11 “Essential reading for anyone wanting to learn all they can about the ways in which humans, and our domesticates, share this world with microbes.”—David Zilber, chef and food scientist; coauthor of *The Noma Guide to Fermentation* With recipes for over 80 natural cheeses and complimentary ferments, this groundbreaking, comprehensive book guarantees high-quality results and perfect flavors for every season. Cheese is milk’s destiny. In *Milk Into Cheese*, cheesemakers at every scale will learn to produce a broad range of traditional cheeses, entirely naturally. Experienced educator, activist, and celebrated natural cheesemaker David Asher introduces the reader to the cultures and practices of cheesemakers, the role our agricultural practices play in making cheese, the biological evolution of

cheese, and the transformation of milk into cheese through fermentation. A perfect companion to David's *The Art of Natural Cheesemaking*, *Milk Into Cheese* expands the cheesemaker's tool kit through an exploration of cheesemaking styles from around the world. These natural cheesemaking processes are made simple, in contrast to the complicated, controversial, and confusing world of industrial cheesemaking, with its reliance on freeze-dried cultures, chemical additives, and ever-expanding use of expensive technology. *Milk Into Cheese* also celebrates the world's most delicious seasonal hand-made cheeses, including alpine, blue, and milled cheeses. Through gorgeous photography and detailed recipes, David prepares the reader for their own journey into traditional natural cheesemaking. He also shares simple recipes for fermented foods that complement and help us understand cheesemaking better, including pickles, sourdough bread, butter, and salami. For home, small-scale, and larger-scale cheesemakers, *Milk Into Cheese* delivers a sophisticated look at the biological science that informs—and the ecological principles that guide—natural cheesemaking. An inspired how-to guide for the greatest of culinary transformations."—Dan Barber, chef, Blue Hill "In detail and with great passion [Asher explains] the hows and whys of making cheese in traditional and simple ways, based on extensive and broad experience with the incredibly varied ways in which people have, do, and can work with milk."—Sandor Ellix Katz, fermentation revivalist; author of *The Art of Fermentation* and other fermentation bestsellers

Sharing Milk Shannon K. Carter, Beatriz M. Reyes-Foster, 2020-10-09 The feeding of human milk to socially and biologically unrelated infants is not a new phenomenon, but the Euroamerican values of individualism have generated expectations that mothers are individually responsible for feeding their own infants. Using a bio-communities of practice framework, this dynamic new analysis explores the emotional and material dimensions of the growing milk sharing practice in the Global North and its implications for contemporary understandings of infant feeding in the US. Ranging widely across themes of motherhood, gender and sociology, this is a compelling empirical account of infant feeding that stimulates new thinking about a contentious practice.

Milk Processing and Dairy Products Industry, 2025-09-03 *Milk Processing and Dairy Products Industry* offers a comprehensive overview of the processing and manufacturing stages involved in transforming milk into a wide range of dairy products, from the reception of raw materials to final packaging. It also addresses key aspects of quality assurance and food safety. As a unique and authoritative reference, this book bridges the gap between theoretical foundations and real-world applications. It provides readers with a thorough understanding of the technologies, processes, and quality standards that shape today's dairy industry. This unique book presents the latest research on preservation methods in the dairy industry,

covering both thermal and non-thermal technologies, as well as fermentation processes. The book also explores the physicochemical and microbiological quality of dairy products derived not only from cow's milk but also from other mammalian sources such as goat milk. Each chapter has been carefully crafted by experienced dairy scientists, ensuring both scientific rigor and practical relevance throughout the volume. Topics discussed include: • Thermal and non-thermal milk processing technologies in the dairy industry • Producing and characterizing dairy powders • Innovative approaches to minimize waste and optimize resource use in milk processing • Precision fermentation can create dairy-identical proteins • Goat milk's nutritional profile and quality traits • Hygiene and compositional quality of raw cow milk
