**Martin Charles Strong, Brendon Griffin**

*Film Music* Kenneth Lampl, 2023-10-24 A comprehensive introduction to film music, this book provides a concise and illuminating summary of the process of film scoring, as well as a succinct overview of the rich history of contemporary film music. Written in a non-technical style, this book begins by presenting a brief history of film music from the last 30 years, covering topics ranging from blockbuster franchises to indie film scores. It explores film music from around the world, including Bollywood and European Avant-garde cinema, and film music in animation, like Disney-Pixar and Japanese anime. It then offers a guide to the language of film music analysis, the creative process behind composing film music, and the use of current technology. The book champions diversity in the industry, with case studies and interviews from a range of active film composers, including: Pinar Toprak (Captain Marvel, 2019), Kris Bowers (Bridgerton, 2020), Natalie Holt (Loki, 2021), and Rachel Portman (Emma, 1996). Complete with a glossary of key terms and further reading, this book is an invaluable resource for all those beginning to study film music, as well as lifelong film music buffs seeking to update their understanding of film music.

**Let There Be Art** Rachel Marie Kang, 2022-10-11 Perhaps in no other way do we more vibrantly reflect our creator than with our creativity. Whether through music, writing, baking, painting, posting on social media, dancing, or any other form of artistic expression within our grasp, we were created to create. Yet, there are times we may be unsure about our art, times when our creating and making doesn't feel possible or purposeful or practical. Rachel Marie Kang wants you to know that your art is not peripheral to life--it is at the very heart of why you exist and what you have to offer to yourself and to the world. In *Let There Be Art*, she gives you permission to embrace the peace, pleasure, and purpose inherent in your art and in the process of making it. This passionate, creative, and cathartic journey invites you to create truthfully out of the broken and beautiful pieces of your life, as well as offer your heart and your art in hopes of helping a hurting world.

The Struggle Behind the Soundtrack Stephan Eicke, 2019-07-15 Do you want to pick up a light saber whenever you hear John Williams' Star Wars theme? Get the urge to ride into the desert and face down steely-eyed desperados to the refrain of Ennio Morricone's *The Good, the Bad and the Ugly*? Does Hans Zimmer's *Pirates of the Caribbean* score have you talking like Jack Sparrow? From the Westerns of the 1960s to current blockbusters, composers for both film and television have faced new challenges--evermore elaborate sound design, temp tracks, test audiences and working with companies that invest in

film score recordings all have led to creative sparks, as well as frustrations. Drawing on interviews with more than 40 notable composers, this book gives an in-depth analysis of the industry and reveals the creative process behind such artists as Klaus Badelt, Mychael Danna, Abel Korzeniowski, Walter Murch, Rachel Portman, Alan Silvestri, Randy Thom and others.

*Cerebral Entanglements* Allan J. Hamilton,2025-02-11 A profound and profoundly important book that, using the most up-to-date revolutionary discoveries in neuroscience, shows us how to understand the brain; how it allows us to think, feel, experience and perceive, written by an acclaimed Harvard-trained neurosurgeon. It took a brain surgeon who's spent a lifetime in the operating room experiencing the brain's union of form and function to write this book. *Cerebral Entanglements*, unlike most books on the brain, looks at the intimate and vital emotions in our lives, and shows as well, how neuroimaging studies can transform our understanding of crucial emotional or mental health concerns. Why do we love? Why do we hate? Why do we kill? Why do we laugh? Why do we have faith? Why does time stand still or speed up? Focusing on the nature of consciousness, affection, trust, romance, empathy, kindness; prejudice, sadness, happiness, depression, grief, and the nature of laughter, the author shows us how neuroscience has changed our understanding of these emotions as he explores the extraordinary revelations that have emerged from brain imaging and functional studies. We see that we are the first generation to perceive the contours of a human thought, track the course of an emotion, even watch memory come together. Allan Hamilton writes clearly and accessibly, about the complex science driving our emotions and experiences, and shows how our newfound knowledge can impact our well-being, individually and as a society. As the book explores the nature of happiness, laughter, stress, PTSD. Hamilton writes about how the brain perceives and experiences music, memory, and time itself.

Working Musicians Timothy D. Taylor,2023-03-17 In *Working Musicians* Timothy D. Taylor offers a behind-the-scenes look at the labor of the mostly unknown composers, music editors, orchestrators, recording engineers, and other workers involved in producing music for films, television, and video games. Drawing on dozens of interviews with music workers in Los Angeles, Taylor explores the nature of their work and how they understand their roles in the entertainment business. Taylor traces how these cultural laborers have adapted to and cope with the conditions of neoliberalism as, over the last decade, their working conditions have become increasingly precarious. Digital technologies have accelerated production timelines and changed how content is delivered, while new pay schemes have emerged that have transformed composers

from artists into managers and paymasters. Taylor demonstrates that as bureaucratization and commercialization affect every aspect of media, the composers, musicians, music editors, engineers, and others whose soundtracks excite, inspire, and touch millions face the same structural economic challenges that have transformed American society, concentrating wealth and power in fewer and fewer hands.
