Main Economic Indicators: Sources and Definitions 2000 OECD,2000-08-16 This publication supplements the monthly Main Economic Indicators. It provides explanations on the sources and definitions used by individual Member countries and selected non-member countries to compile the short-term indicators currently presented in the MEI.

The Regulation of Water and Waste Services Jaime M. Baptista,2014-10-15 The public water supply, urban wastewater and urban waste management services are essential to the well-being of citizens, public health and economic activities. These are generally provided under natural or legal monopoly, so there is no incentive for utilities to search for greater efficiency and effectiveness and as such there is an increasing prevalence of such risks for users. For these reasons, society can significantly benefit from the existence of regulatory intervention capable of introducing greater balance in the relationship between utilities and their users. The Regulation of Water and Waste Services: An Integrated Approach (Rita-Ersar) presents a practical integrated regulatory approach to these water and waste services. This approach is called the ARIT-ERSAR model and it is capable of contributing to the promotion of access by citizens to these services that is tending towards the universal. These services are provided with suitable quality by utilities at socially acceptable prices and with an acceptable level of risk. This approach consists of a regulation model with two major areas of intervention: structural regulation of the sector and regulation of the performance of the utilities. The components of structural regulation are contributions to organisation, legislation, information and sectoral capacity building. The performance regulation of utilities consists of legal and contractual regulation, economic regulation, quality of service regulation, drinking water quality regulation and user interface regulation. Author: Jaime Melo Baptista, Chairperson of the Water and Waste Services Regulatory Authority, ERSAR, Portugal

This paper looks at the principles of the new fundamentals, focusing on some of their key elements and how they are relevant

in a policy context. It discusses how each of the main technical issues contributes to the conclusion that these principles are important and independent of the technical disagreement which can and does arise in specific indicator design. It also examines these fundamentals in the context of some specific example indicators. It concludes with a description of the next steps which might be taken in applying these fundamentals.

Study on Short-term Economic Indicators for the Arab Region Nations Unies. Commission économique et sociale pour l'Asie occidentale,2013 The purpose of this publication is to outline international statistical guidelines and standards for use by national statistical agencies in the Arab region for the production and dissemination of a proposed core set of priority short-term economic indicators of appropriate quality and timeliness, together with their related metadata. Guidelines contain recommendations on key methodological issues that impact various dimensions of the quality of those indicators, including their periodicity, timeliness, accessibility, accuracy and coherence. The report also offers guidelines on the provision of methodological information (metadata) by national agencies. The overall aim of this publication is to help national agencies develop the capacity to compile priority short-term and other economic indicators in accordance with existing international statistical standards and recommended practice.--Page vii.

Oxford Handbook of the International Monetary Fund ,2024-10-07 The International Monetary Fund (IMF) is a pivotal institution in global economic governance tasked with ensuring monetary stability and preventing financial crises through promoting balanced trade, economic growth, and poverty reduction. It also plays a powerful normative role by shaping economic policies worldwide through its research and expertise. The IMF played a crucial role in managing crises like the 2008 financial crisis and the COVID-19 pandemic, providing significant financial aid and advocating for stimulus measures. However, the IMF faces both internal and external challenges from reforming its governance structure to better represent emerging economies to finding its place in a world increasingly defying liberal internationalism and multilateralism. Despite reforms, power remains concentrated among advanced economies, hindering inclusivity and trust, particularly in regions like sub-Saharan Africa. Geopolitical tensions, populist nationalism, and economic imbalances further strain the IMF's effectiveness. This handbook aims to uncover these challenges by providing diverse perspectives and proposing policy recommendations that the Fund could undertake to better navigate the complex landscape of 21st-century global governance. Part I delves into its historical origins and key debates of the IMF. Part II focuses on formal operations such as

lending, surveillance, and capacity development. Part III explores the involvement of different actors including states, markets, and civil society. Part IV discusses partnerships with other international organizations and collaboration in financial regulation. Part V analyzes shifts in policy instruments and ideological frameworks. Part VI broadens concerns to include gender mainstreaming, labor markets, climate policy, and inclusive growth. Part VII addresses internal challenges including cultural diversity concerns and uniformity of treatment. Part VIII evaluates external challenges such as populist movements, China's influence, global inequality and unresolved issues in Europe. Part IX explores how the IMF can meet the multiple challenges identified in this volume and positively impact 21st century global governance.
