Aleksandr Isaevich Solzhenitsyn

200 Years Together II Aleksandr Solzhenitsyn, 2024-07-15

Alexander Solzhenitsyn's 200 Years Together and the "Russian Question" Ksenia Polouektova, 2008 Solzhenitsyn's controversial two-volume book, published in Moscow in 2001-02, after his return to Russia, is based on a conservative nationalist (patriotic) ideology that determined his approach to the role of Jews in Russian history. His Slavophile-influenced view of the Jews was essentially and unalterably a damaging one, which affected his history of Jewish-Russian relations. Focuses not on the problematic aspects of Solzhenitsyn's allegedly objective account, but rather on the way his reputation as a Russian prophet has led conservative Russians, including antisemites, to embrace his stereotypical imperial view of Russian history, to which Jews are considered as incapable of contributing positively. This aspect of the contemporary public debate about Jews reveals more about the problems of Russian identity than about the Jews. Solzhenitsyn failed to take into consideration the biases of his (often Jewish) sources. He also stressed the Jewishness of radicals who rejected their Jewish roots, including his arch-villains, the Bolsheviks.

Electrocorrosion and Protection of Metals Joseph Riskin, 2008-11-07 Electrocorrosion, the corrosion of metallic constructions by external currents, is the most significant factor in conductive aggressive environments. Corrosion of underground and underwater metal constructions by stray currents has been comprehensively studied in the past decades and is considered here only in the form of a review. The primary attention is on corrosion, by external anodic (mainly) and cathodic currents, of metal constructions in the highly aggressive environments typical for electrochemical plants, where penetration of the external currents (leakage currents) from the electrolytic baths into metal constructions is unavoidable. A new approach to the problem of electrocorrosion protection of passive structural metals is considered in this book, keeping the metals attacked by external currents in the boundaries of their passive field. The systems, developed in accordance with this approach, are based on the modification of existing and elaboration of new methods of electrocorrosion protection. These systems take into account corrosion and electrochemical characteristics of the aggressive media (redox potential,

conductivity etc.) and of the passive metal (corrosion and activation potentials, current density in a passive state, etc) as well as the sizes and distribution character of the external currents. The book covers analysis of leakage current distributions in electrochemical plants, their influence, methods to estimate corrosion stability of metallic structures subject to external currents and presents many concrete examples of the successful introduction of corrosion protection systems in operating plants. - A new approach to protection from electrocorrosion, taking into account the passive state of the metal in aggressive media - Newly developed and modifications of well known methods of electrocorrosion protection are presented - Systematized data on electrocorrosion and protection of metals, especially in electrochemical plants, allow corrosion engineers, researchers and personnel maintaining the equipment of electrochemical plants to analyze the corrosion state of metallic equipment and prevent electrocorrosion

Solzhenitsyn (1918-2008), winner of the Nobel Prize for Literature, is considered by many to be the greatest writer of the 20th Century, with the arguable exception of George Orwell. Significantly, both Solzhenitsyn and Orwell were former Communists who became bitterly disillusioned with Marxism through their own up-close-and-personal experience, and spent a large part of their literary lives denouncing the Marxist monster which so brutally disfigured their lives and their century. Aleksandr Solzhenitsyn's fiction and non-fiction classics include *One Day In The Life Of Ivan Denisovich*, *The Gulag Archipelago*, *The First Circle*, and an immense body of other work which is considered instrumental in breaking down the Communist system in the Soviet Union and leading to the end of Communist rule in Russia and Eastern Europe. His life and work is living proof that it is still possible for a single great mind to affect world events and bring about change in the human condition. spent roughly ten years toward the end of his life researching and writing a monumental and definitive work entitled *200 Years Together: Books by Columbus Falco - The Crucifixion of Russia; India Shattering the Illusion; 1937: Before The Chaos - also in Germany - 1937: Wahrheit vor dem Chaos - Fascism & Dharma - also in Italy Fascismo and Dharma - India 70 Years after Midnight - Kashmir - The Birth of a New Nation - European Union - The Rape of Europa in many EU languages - Crucible of Decline - Holocausts vs. Science: A Technical Complaint -*
