Berkeley's Revolution in Vision Margaret Atherton,2019-05-15 Berkeley's Essay towards a New Theory of Vision (1709), his first substantial publication, revolutionized the theory of vision. His approach provided the framework for subsequent work in the psychology of vision and remains influential to this day. Among philosophers, however, the New Theory has not always been read as a landmark in the history of scientific thought, but instead as a halfway house to Berkeley's later metaphysics. In this book, Margaret Atherton seeks to redress the balance through a commentary on and a reinterpretation of Berkeley's New Theory.

Berkeley's Idealism Georges Dicker,2011-06-15 Using the tools of contemporary analytic philosophy, Georges Dicker here examines both the destructive and the constructive sides of Berkeley's thought, against the background of the mainstream views that he rejected.

Philosophical Remains of George Croom Robertson George Croom Robertson,1894 The present volume contains a collection of the more important philosophical writings of the late Prof. Groom Robertson. Outside this work, besides his volume on Hobbes, there remain his historical articles in the Encyclopdia Britannica on Abelard and Hobbes, his biographies of the Grotes in the Dictionary of National Biography (George Grote, his wife and two brothers--John and Arthur) and other minor contributions to various periodicals. The memoir is brief and comprehensive rather than minute. It has been somewhat extended by insertions of importance, as will be seen in their places--Preface.
