Beyond the Last Blue Mountain R M Lala, 2017-10-25 An exhaustive and unforgettable portrait of India's greatest and most respected industrialist. Written with J.R.D. Tata's co-operation, this superb biography tells the J.R.D. story from his birth to 1993, the year in which he died in Switzerland. The book is divided into four parts: Part I deals with the early years, from J.R.D's birth in France in 1904 to his accession to the chairmanship of Tatas, India's largest industrial conglomerate, at the age of thirty-four; Part II looks at his forty-six years in Indian aviation (the lasting passion of J.R.D's life) which led to the initiation of the Indian aviation industry and its development into one of India's success stories; Part III illuminates his half-century-long stint as the outstanding personality of Indian industry; and Part IV unearths hitherto unknown details about the private man and the public figure, including glimpses of his long friendships with such people as Jawaharlal Nehru, Mahatma Gandhi, Indira Gandhi and his association with celebrities in India and abroad.

Transient Market Power of Firms T.V.S. Ramamohan Rao, Surajit Bhattacharyya, 2021-07-18 Every firm in the market for industrial products offers a distinct value to consumers. As such, they derive some market power based on the intrinsic value of their products. However, firms often utilize non-price strategies to reveal value to consumers because both the consumers and firms experience information asymmetry with respect to such value. They may also orient some strategies to increase their market share. In general, non-price strategies contain information about value beyond the market shares they achieve, and the shifts in market demand provide the firm with some transient market power. This book indicates that, given the transaction costs to the consumers, of switching between products, the increase in demand tends to be of a longer-term nature. It will not be eliminated over time, as is often conjectured. Measures of the intrinsic value of products, transient market power, and the changes in non-price strategies of firms that tend to perpetuate it are also defined and estimated in the text.

Indian Metallurgy R. Divakar, S. V. S. Narayana Murty, S. Srikanth, Amol A. Gokhale, 2023-11-15 The book marks the Platinum Jubilee of the Indian Institute of Metals, closely matching independent India's age. It is envisaged as a compilation of technical articles tracing the birth and growth trajectory of metallurgical science, engineering and technology in the nation, attempting a degree of prognostication covering the next quarter of a century. It contains the essence of the metallurgical research and development and industrial progress India has witnessed in the last 75 years. This book

comprises technical articles written by industry leaders and eminent technocrats. It includes overviews by distinguished researchers who have strived to build foundations of new metallurgical research and engineering fields. It includes learned writings of persons associated with premier institutions heavily dependent on metallurgy and materials. They have made seminal contributions by nurturing the growth of metallurgical research and industrial production or have made first-hand contributions to building the great organisations we have today. Coinciding with the Platinum Jubilee year of the Indian Institute of Metals, this book brings out the enormous efforts of these individuals representing their organisations to share insights that led to their success as an entity. Similarly, several professionals who significantly contributed to the understanding of metallurgical engineering, have held important positions and steered the national strategic programmes or academically nurtured students in their illustrious careers also share their journey in this book. This book chronicles the significant advances made in the field of metallurgical science, engineering and technology in India, presenting the historical perspective and prospects in the format of a technical volume.
