Reshaping Food Systems to improve Nutrition and Health in the Eastern Mediterranean Region Ayoub Al-Jawaldeh, Alexa Meyer, 2023-01-09 This detailed and comprehensive study examines nutrition and health in the World Health Organization (WHO) Eastern Mediterranean Region, presenting the six game-changing food systems actions proposed by the WHO and the progress of their implementation in the region. The WHO Eastern Mediterranean Region is a particularly complex place to

study: an area of economic contrasts with changing dietary patterns and stark differences between high levels of malnutrition and a prevalence of overweight and obesity. As a result, actions to improve the nutritional situation of the population are urgently sought. The strategies explored in this book offer a unique opportunity to change food systems all over the world, addressing aspects including sustainable food production, the impact of marketing and labelling on behaviour, and the effect of global events such as climate change, war and the COVID-19 pandemic. Reshaping Food Systems is an essential read at a time when malnutrition in all its forms, including undernourishment, micronutrient deficiencies and overweight and obesity, pose a serious threat to global health, and is of particular interest for policymakers working in nutrition and public health.

Aid for Trade and Human Development Daniel Gay,2008 The second chapter briefly describes how trade can be mainstreamed into government policies. The third chapter describes the link between trade and human development from a theoretical perspective, examining the relationship between trade and such factors as gender, environment and poverty. The bulk of this guide, beginning with chapter four, offers practical guidance on undertaking AFT needs assessments. Concepts such as trade mainstreaming and ownership should be central in any approach to this exercise.--Executive summary.

An Adaptive Safety Incentives Framework for Construction Organisations in Developing Economies Kunle Ogundipe,Babatunde Fatai Ogunbayo,Clinton Ohis Aigbavboa,2025-11-24 The central aim of this book is to focus on safety incentives in a construction context and conceptualise an adaptive safety incentive framework for construction firms in the global south. This book is a collection of knowledge on safety incentives and their impact on improving workplace safety, motivating workers' safety practices, and improving organisations' performance goals in the construction industry. With primary research conducted in Nigeria, and secondary comparisons with Ghana, South Africa, China, Malaysia, and Hong Kong, the conceptualised framework provides insights into the multifaceted factors influencing safety incentives in the construction sector. By explaining the behavioural approach to creating reward systems that minimise unintended consequences and maximise happiness, health, wealth, and success, this book takes a pragmatic approach to developing safety incentives and provides significant practical insights. This book identifies the gaps in safety incentives studies by critically reviewing related models, theories, and conceptual models to provide significant recommendations that support the implementation of safety incentives in the construction industry in the global south. Guiding readers on templates for developing safety incentives, this book will interest professionals in building construction, project management, quantity surveying, civil engineering, human resource management studies, and occupational safety and health (OSH) and owners of construction organisations, as well as researchers in all these fields.

The PMI Guide to Business Analysis ,2017-12-22 The Standard for Business Analysis – First Edition is a new PMI foundational standard, developed as a basis for business analysis for portfolio, program, and project management. This standard illustrates how project management processes and business analysis processes are complementary activities, where the primary focus of project management processes is the project and the primary focus of business analysis processes is the product. This is a process-based standard, aligned with A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Sixth Edition, and to be used as a standard framework contributing to the business analysis body of knowledge.
