John White Alexander and the Construction of National Identity Sarah J. Contemporary Cultures of Display Emma Barker, Senior Lecturer in Art History Emma Barker, 1999-01-01 Contiene:

Angels of Art Bailey Van Hook, 2004-06-11 Images of women were ubiquitous in America at the turn of the last century. In painting and sculpture, they took on a bewildering variety of identities, from Venus, Ariadne, and Diana to Law, Justice, the Arts, and Commerce. Bailey Van Hook argues here that the artists' concepts of art coincided with the construction of gender in American culture. She finds that certain characteristics such as &ideal,& &beautiful,& &decorative,& and &pure& both describe this art and define the perceived role of women in American society at the time. Most late nineteenth-century American artists had trained in Paris, where they learned to use female imagery as a pictorial language of provocative sensuality. Van Hook first places the American artists in an international context by discussing the works of their French teachers, including Jean-Léon Gérôme and Alexandre Cabanel. She goes on to explore why they soon had to distance themselves from that context, primarily because their art was perceived as either openly sensual or too obliquely foreign by American audiences. Van Hook delineates the modes of representation the American painters chose, which ranged from the more traditional allegorical or mythological subjects to a decorative figure painting indebted to Whistler. Changing American culture ultimately rejected these idealized female images as too genteel and, eventually, too academic and European. *Angels of Art* is the first study to discuss the predominance of images of women across stylistic boundaries and within the wider context of European art. It relies heavily on contemporary sources both to document critical responses and to find intersecting patterns in attitudes toward women and art.

The Female Body in Western Culture Susan Rubin Suleiman, 1986 The female body has occupied a central place in the Western imagination, its images pervading poetry and story, mythology and religious doctrine, the visual arts, and scientific treatises. It has inspired both attraction and fear, been perceived as beautiful and unclean, alluring and dangerous, a source of pleasure and nurturing but also a source of evil and destruction. In *The Female Body in Western Culture*, twenty-three internationally noted scholars and critics, in specially commissioned essays, explore these representations and their

consequences for contemporary art and culture. Ranging from Genesis to Gertrude Stein and Angela Carter, from ancient Greek ritual to the Victorian sleeping cure, from images of the Madonna to modern film and Surrealist art, the essays cover a wide spectrum of approaches and subject matter. They all converge, however, around questions of power and powerlessness, voice and silence, subjecthood and objectification. And they point the way to the new possibilities and displacements of traditional male-female oppositions. Androgyny in a new key? This book demonstrates that a blurring of gender boundaries does not have to deny difference.

Thomas Hovenden Anne Gregory Terhune, Patricia Smith Scanlan, 2006-09-06 A realistic genre painter and recorder of everyday activities such as those involving home and family, Hovenden had a particular gift for choosing subjects with wide recognition and appeal. His work reflects a Victorian ethos; unlike many artists of the time, however, Hovenden's work featured African American subjects in domestic settings. His firm belief in sentiment and beauty as the goals of artistic pursuits is evident in the nostalgic paintings for which he is best known, such as *The Last Moments of John Brown*, in which Brown is depicted stopping on his way to the gallows to kiss a young black child.

Die Kunst des Salons Norbert Wolf, 2012 The Paris Salons of the mid-nineteenth century are famous today above all for the paintings that were rejected more than for those that were actually shown. The rejected works form today's canon of art history and are regarded as heralds of a modern age. This book looks to reassess the other side of the art history of the nineteenth century. Salon Painting has often been dismissed as overly academic or staid. Now art historian Norbert Wolf turns back the pages of history as he reintroduces readers to the artistry and excellence of the Salon Painting in Europe, Britain, Russia and the US. In an opulent new book, illustrated throughout with gorgeous reproductions, Wolf looks at Salon painting from a variety of perspectives, such as the rise of the bourgeoisie and Paris's position as Europe's cultural capital. Wolf examines masterpieces by Cabanel, Manet, Bierstadt, The Pre-Raphaelites, and Sargent, demonstrating how classical subjects gave way to modern concerns.

Art of the Western World Bruce Cole, Adelheid M. Gealt, 1991-12-15 With fresh insight into what the great works meant when they were created and why they appeal to us now, here is a vivid tour of painting, sculpture, and architecture, past and present. Illuminating . . . a notable accomplishment.--The New York Times. Illustrated.
