Estudios de imagen y posicionamiento Jesús Manyós Rodríguez, 2022-07-01 Los estudios de imagen y posicionamiento permiten determinar lo que representa una marca, producto o servicio en la mente del consumidor, así como los atributos que la hacen distintiva, por lo que proporcionan información valiosa sobre la que se tomarán decisiones importantes. En el presente libro, se desarrolla un enfoque para la realización de estos estudios, basado en la experiencia y punto de vista del autor. La metodología propuesta no solo consiste en la determinación de atributos y la forma en que se asocian con la marca —mente—, sino también en la evaluación de otros aspectos que contribuyen a lograr una visión más amplia de cómo es percibida, así como lo que representa en el corazón del consumidor —el sentimiento que genera en este—. Mente y corazón brindan una perspectiva más profunda de la forma en que la marca se conecta con el consumidor.

Psychiatry in the Elderly Robin Jacoby, Catherine Oppenheimer, 2002 Old age psychiatry continues to grow as

speciality, driven by research advances, demographics and political will. Psychiatric services and treatments for the old are improving and the outlook for further progress is encouraging. In this new edition of the classic textbook of old age psychiatry, Robin Jacoby and Catherine Oppenheimer have retained the coherent structure of previous editions, approaching the topic under the section headings of basic science, clinical practice, psychiatric services and specific disorders; however, within this logical structure they have conducted a major revision, bringing in a number of new authors and covering the full range of new research. The exciting developments in the field of molecular biology are covered as are the improvements in our understanding of the pathogenesis of the dementias, specifically, although not limited to Alzheimer's Disease. All of the chapters in this new edition have been revised and updated and there are new chapters on quality of life measurement, the economics of care, suicide in old age, hallucinations and functional symptoms in Parkinson's Disease. The team of expert contributors has grown to 62 in number, representing a wide range of specialities and providing input from nine different countries. This has resulted in the most comprehensive and holistic review of the field. Psychiatry in the Elderly continues to be essential reading for trainees, practicing psychiatrists and those in other branches of care whose work brings them into contact with elderly psychiatric patients.
