How to Write a Master's Thesis Yvonne N. Bui, 2014 How to Write a Masters Thesis is a comprehensive manual on how to conceptualize and write a five-chapter masters thesis, including the introduction, literature review, methodology, results, and discussion. Very often, a theory-practice gap exists for students who have taken the prerequisite methods and statistics courses in their masters program but who have yet to understand how to apply and translate what they've learned about the research process with their first major project. Yvonna Bui demystifies this process by integrating the language learned in these prerequisite courses into a step-by-step guide for developing one's own thesis/project

Entrepreneurship in Biotechnology Martin Grossmann, 2012-12-06 Research and development of novel medicines for human therapy commonly takes over a decade before significant revenues from sales are forthcoming. How can

biotechnology companies be founded and grow successfully in an industry with such extended innovation processes? The book investigates this problem and distinguishes three growth phases: From incorporation and start-up through collaborative R&D with large pharmaceutical firms to value creation from R&D pipelines to Public Offerings and product marketing. In this book a dynamic simulation model for testing different decision-making strategies is developed. For each phase the author identifies decision rules that provide for successful corporate growth.
