Food, Culture and Identity in Germany's Century of War Heather Merle Benbow, Heather R. Perry, 2019-11-18 Even in the harsh conditions of total war, food is much more than a daily necessity, however scarce—it is social glue and an identity marker, a form of power and a weapon of war. This collection examines the significance of food and hunger in Germany's turbulent twentieth century. Food-centered perspectives and experiences “from below” reveal the social, cultural and political consequences of three conflicts that defined the twentieth century: the First and Second World Wars and the ensuing global Cold War. Emerging and established scholars examine the analytical salience of food in the context of twentieth-century Germany while pushing conventional temporal frameworks and disciplinary boundaries. Together, these chapters interrogate the ways in which deeper studies of food culture in Germany can shed new light on old wars.

Differences between Marshall Plan in Germany after Second World War and Iraq's reconstruction aid after the Gulf War Difrine Madara, 2020-12-09 Academic Paper from the year 2019 in the subject Politics - Other International Politics Topics, grade: A, Kenyatta University, language: English, abstract: Many scholars consider the Marshall Plan as the

most successful foreign policy initiative in the U.S history. In the recent past, the term has been used as a campaign tool for American foreign policy abroad. Since the end of Germany's Marshall Plan in the 1950s, none of the subsequent economic recovery plans have had similar levels of impact. On June 5, 1947, the secretary of state General George C Marshall suggested that United States provide economic aid to assist Europe in recovering from the devastation of World War II. The Congress appropriated \$13.3 billion (more than \$100 billion in today's dollars) to be used over four years to reconstruct Europe. This plan is considered successful in Europe, especially in Germany, where it significantly boosted economic growth. Consequently, future administrations adopted similar approaches in an attempt to stimulate economies abroad. The most recent similar plan is the George W Bush reconstruction plan for Iraq. The 'Marshall Plan' for Iraq failed to spark similar success like in Germany in the 1950s. Arkes (2015) intimated that the failure of Iraq's 'Marshall Plan' can be attributed to differences in political, economic, and security conditions. In this section, we critically review the Marshall Plan as a model of reconstruction aid by comparing the conditions and outcomes in Germany and Iraq.

The Gas Mask in Interwar Germany Peter Thompson,2023-05-25 Exploring the history of the gas mask in Germany from 1915 to the eve of the Second World War, Peter Thompson traces how chemical weapons and protective technologies like the gas mask produced new relationships to danger, risk, management and mastery in the modern age of mass destruction. Recounting the apocalyptic visions of chemical death that circulated in interwar Germany, he argues that while everyday encounters with the gas mask tended to exacerbate fears, the gas mask also came to symbolize debates about the development of military and chemical technologies in the Weimar Republic and the Third Reich. He underscores how the gas mask was tied into the creation of an exclusionary national community under the Nazis and the altered perception of environmental danger in the second half of the twentieth century. As this innovative new history shows, chemical warfare and protection technologies came to represent poignant visions of the German future.

Arms Control Policy Marie Isabelle Chevrier, 2012-08-17 In this work, an expert on biological weapons offers a thoughtful examination of the political and technical issues that have affected the implementation of arms control agreements from the 1960s to the present. *Arms Control Policy: A Guide to the Issues* examines the history of the major arms control treaties since the early 1960s. It offers readers a broad understanding of the ways in which arms control agreements were negotiated and implemented during the Cold War, the international and national events that affected treaty negotiation and implementation, and how the arms control landscape has changed in the war's aftermath. Specifically, the handbook overviews the obligations contained in bilateral U.S.-Soviet/Russian and multilateral arms control agreements covering nuclear and nonnuclear weapons. It also treats such agreements as the Biological Weapons Convention, the Chemical Weapons Convention, the Treaty to Ban Land Mines, and the Treaty to Ban Cluster Munitions. The book concludes with a look at the current challenges in the implementation of arms control agreements and the future of arms control.

The Political Economy of West Germany, 1945-85 Jeremy Leaman, 1988-02-09 The post-war emergence of West Germany as the dominant economic power in Europe gave rise to the mythology of the 'economic miracle' and the model policies of the 'social market economy'. This study reveals a mundane reality of class politics in which democratic institutions have become increasingly marginalised by big capital and by an unelected central bank. Economic policy has failed to halt the recent slide into mass unemployment and has reverted optimistically to the plan-less export drives of the fifties. The absence of the earlier advantages, the author claims, bodes ill for the future of 'model Germany'.
