Legal and Ethical Challenges of Artificial Intelligence from an International Law Perspective Themistoklis Tzimas,2021-07-30 This book focuses on the legal regulation, mainly from an international law perspective, of autonomous artificial intelligence systems, of their creations, as well as of the interaction of human and artificial intelligence. It examines critical questions regarding both the ontology of autonomous AI systems and the legal implications: what constitutes an autonomous AI system and what are its unique characteristics? How do they interact with humans? What would be the implications of combined artificial and human intelligence? It also explores potentially the most important questions: what are the implications of these developments for collective security -from both a state-centered and a human perspective, as well as for legal systems? Why is international law better positioned to make such determinations and to create a universal framework for this new type of legal personality? How can the matrix of obligations and rights of this new legal personality be construed and what would be the repercussions for the international community? In order to address these questions, the book discusses cognitive aspects embedded in the framework of law, offering insights based on both *de lege lata* and *de lege ferenda* perspectives.

Enhancing Education Through Multidisciplinary Film Teaching Methodologies DeHart, Jason D.,2022-11-11 Film has become a cultural staple across the world. As with literature, film can be used to inform, entertain, inspire critical thinking, educate, and more. As such, it is a useful tool to implement in the classrooms of all levels and subjects. It is essential to explore the implementation of film in classrooms and the multiple teaching methodologies surrounding it. Enhancing Education Through Multidisciplinary Film Teaching Methodologies provides strategies that emphasize close reading, analysis, curricular connections, and composing through film. It examines both the theory and practice that surrounds the use of film in K-12 and post-secondary classroom instruction from a multidisciplinary perspective. Covering topics such as critical cultural awareness, literacy education, and film pedagogies, this premier reference source is an essential resource for preservice teachers, teacher educators, faculty and administrators of both K-12 and higher education, librarians, researchers, and academicians.

Improving Water Governance in Kathmandu: Insights from Systems Thinking and Behavioural Science Dale

Whittington ,Xun Wu,2020-04-15 The global water and sanitation community is currently wrestling with the policy implications of two important realizations. The first is that it is quite possible for cities to actually run out of water—for the piped network to run dry. The second is that in many locations, basic water and sanitation interventions do not result in the large public health improvements that many water and sanitation professionals had hoped. As water and sanitation professionals work out the implications of these two realizations on policy and planning for water and sanitation improvements in the Global South, they will require an in-depth knowledge of local housing, water, and sanitation conditions, as well as a nuanced understanding of how households prioritize improvements in housing, water, and sanitation. The chapters in this book about Kathmandu illustrate the types of analyses of local conditions that are needed. Kathmandu holds many lessons for the global community about households' responses to water scarcity and the management of water and sanitation services in periods of rapid urbanization and climate change. In Focus – a book series that showcases the latest accomplishments in water research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector

Systemic Risk in the Financial Sector Douglas W. Arner, Emiliós Avgouleas, Danny Busch, Steven L. Schwarcz, 2019-10-02

In late 2008, the world's financial system was teetering on the brink of systemic collapse. While the impacts of the global financial crisis would be felt immediately, at every level of the economy, it would also send years-long aftershocks through investment, banking and regulatory circles worldwide. More than a decade after the worst year of the global financial crisis, what has been learned from its harsh lessons? Are governments and regulators more prepared for another financial system

failure that would significantly affect the real economy? What may be the potential triggers for such a collapse to occur in the future? *Systemic Risk in the Financial Sector: Ten Years after the Great Crash* draws on some of the world's leading experts on financial stability and regulation to examine and critique the progress made since 2008 in addressing systemic risk. The book covers topics such as central banks and macroprudential policies; fintech; regulators' perspectives from the United States and the European Union; the logistical and incentive challenges that impede standardization and collection; clearing houses and systemic risk; optimal resolution and bail-in tools; and bank leverage, welfare and regulation. Drawing on experts across disciplines — including Howell Jackson, John Geanakoplos, Charles Goodhart, Anat Admati, Roberta Romano and Martin Hellwig — *Systemic Risk in the Financial Sector* is the definitive guide to understanding the global financial crisis, the safeguards being put into place to try to avoid similar crises in the future, and the limitations of those safeguards.
