Health Education in Context: An International Perspective on Health Education in Schools and Local Communities Neil Taylor,Frances Quinn,Michael Littledyke,Richard K. Coll,2012-09-07 This book presents an international perspective on health education and specifically the influence that context has on this aspect of education. The focus includes both formal and non-formal health education and the factors that impact upon its effectiveness, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.). An important feature of the book is that it draws upon the experiences and research of local experts, representing the perspectives of an extremely diverse cohort across the world (22 countries and 2 regions in total). The book addresses topics such as: the development and implementation of health education in different countries; the influence of political, cultural, societal or religious mores; governmental or ministerial drives; economic or other pressures driving curriculum reform; and the influence of external assessment regimes on health education. By embedding discussions of health education in local contexts and representing a diversity of perspectives on this important topic this book highlights both barriers and enablers to improving health education across the globe.

Health Information in a Changing World W. Bernard Luckenbill,Barbara Froling Immroth,2010-06-14 This holistic guide explains how school librarians and teachers can successfully integrate relevant health concepts and life skills throughout the curriculum for students K through 12. In the United States, convenience food and soft drink-based diets, increasingly sedentary lifestyles, and obesity have become common in youth culture. The importance of health education merits integration throughout school curricula; unfortunately, research shows that many teachers do not feel prepared to teach health issues within their subject areas. This book will encourage all librarians and teachers—no matter their specific area of instruction—to include health lessons in their teaching. *Health Information in a Changing World: Practical Approaches for Teachers, Schools, and School Librarians* provides a complete action plan for librarians and teachers who want to provide better health information to students and their caregivers. It contains an extensive discussion of teaching health within curriculum areas such as literature, history and biography, art, science and mathematics, industrial technology, and agriculture. Tips on accessing and evaluating health information in print and electronic media are presented, as well as practical suggestions for effective instructional methods, including ideas on conducting demonstrations, field trips, speaker

programs, and online distance education. New findings regarding teaching effectiveness assessment are also presented.
