Weiss's Herbal Medicine Rudolf Fritz Weiss, A. R. Meuss, 2001 The classic edition is back! First published in 1988, Weiss's *Herbal Medicine* is revered by herbalists and medical professionals alike as the seminal work in the field of phytotherapy. This book has established itself as an indispensable resource and is widely acknowledged as the key text in the field of medical herbalism. You will find clear, detailed information on treating conditions ranging from colds and influenza to rheumatic problems, metabolic and endocrine disorders, cancer, and much more. Conveniently arranged by organ system, the text provides guidelines for prescribing herbal remedies, with sections on dosage, application, and precautionary measures. Plus, for each plant discussed, you will find lists of their occurrence, botanical features, differentiation from related species, constituents, and medical benefits. Proprietary formulations, full references, and a comprehensive subject index of almost 2,000 entries round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of *Herbal Medicine*, 2E, also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating the latest scientific research and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of

the Zeitschrift fuer Phytotherapie, and lectured on current advances in the subject at the University of Tuebingen.

Some Drugs and Herbal Products IARC Working Group on the Evaluation of Carcinogenic Risks to Humans, International Agency for Research on Cancer, 2016 This volume of the IARC Monographs provides an assessment of the carcinogenicity of 14 drugs and herbal products. The IARC Monographs Working Group relied mainly on epidemiological studies to evaluate the carcinogenic hazard to humans exposed to the drugs digoxin (widely prescribed for the treatment of chronic heart failure), pioglitazone (used for the treatment of type 2 diabetes mellitus), and hydrochlorothiazide (used to treat hypertension). Other agents evaluated included the drugs primidone, sulfasalazine, pentosan polysulfate sodium, and triamterene, and five herbal products (or their components): Aloe vera whole leaf extract, goldenseal root powder, Ginkgo biloba leaf extract, kava extract, and pulegone. In view of the limited agent-specific information available from epidemiological studies, assessments of these agents relied mainly on carcinogenicity bioassays to reach conclusions as to the carcinogenic hazard to exposed humans.
