**Urban Animals** Tora Holmberg, 2015-03-27 The city includes opportunities as well as constraints for humans and other animals alike. Urban animals are often subjected to complaints; they transgress geographical, legal as and cultural ordering systems, while roaming the city in what is often perceived as uncontrolled ways. But they are also objects of care, conservation practices and bio-political interventions. What then, are the more-than-human experiences of living in a city? What does it mean to consider spatial formations and urban politics from the perspective of human/animal relations? This book draws on a number of case studies to explore urban controversies around human/animal relations, in particular companion animals: free ranging dogs, homeless and feral cats, urban animal hoarding and crazy cat ladies. The book explores 'zoocities', the theoretical framework in which animal studies meet urban studies, resulting in a reframing of urban relations and space. Through the expansion of urban theories beyond the human, and the resuscitation of sociological theories through animal studies literature, the book seeks to uncover the phenomenon of 'humanimal crowding', both as threats to be policed, and as potentially subversive. In this book, a number of urban controversies and crowding technologies are analysed, finally pointing at alternative modes of trans-species urban politics through the promises of humanimal crowding - of proximity and collective agency. The exclusion of animals may be an urban ideology, aiming at social order, but close attention to the level of practice reveals a much more diverse, disordered, and perhaps disturbing experience.

**The Eight Answers for Happiness** Hooseo B. Park,2014-12-20 Although everybody in the world is singing about love, dream, money, and happiness, ironically, not many people know what these things really are. I became an artist for my dream, which was to do something for the environment, and I came to New York City for the dream. But ironically, I realized that I didn't even know what the environment really was before I came to New York City. I have done a nonprofit sign campaign for the environment in Times Square in the fall of 2011 and spring of 2014. I saw and met many people who were from all over the world. The people and New York City have given me some answers in life. To do something for the environment, I have also picked up a lot of cigarette butts that no one really cared about on the streets of New York City. Then I put the thrown cigarette butts into many different glass jars. I have slowly realized that the most important thing for the environment was happiness--because happiness is the primary reason for all lives. There are many different reasons for each of our lives, but all the reasons lean to one point. That is happiness. And unhappiness is the third pollution source that makes people careless with everything. No one can well take care of other things if the person's level of happiness is too low. We have to be happy first no matter what. To be happy, we need to know what happiness really is, as well as the other very important things in life. These eight things are the answers that I've learned from my life and from New York City.
