Contemporary Television Series Silvia Branea,Bianca Mitu,2014-06-19 Contemporary Television Series: Narrative Structures and Audience Perception proposes an interdisciplinary and multicultural approach of old concepts like fiction, reality and narrativity applied to actual worldwide television series. The authors that have contributed to this volume analyze the almost invisible barriers between fiction and reality in television series from different perspectives. The results of their studies are extremely interesting and revealing. The new perspectives offered by this volume will be of great interest to any scholar of European and international studies, because they bring to light new ideas, new methodologies and results that could be further developed. This volume allows readers to explore these unique insights, even if they are not senior researchers, and to easily digest the content, and also to acknowledge the impact of the viewing of television series on reality and on their own lives.

Middle Eastern Television Drama Christa Salamandra,Nour Halabi,2023-06-21 This monograph explores and investigates key issues facing Middle Eastern societies, including religion and sectarianism, history and collective memory, urban space and socioeconomic difference, policing and securitization, and gender relations. In the Middle East, television drama creators serve as public intellectuals who, with uncanny prescience, tell the world something. As this volume demonstrates, fictional television provides a crucial space for social and political debate in much of the region. Writing from a range of disciplines—anthropology, communication, folklore, gender studies, history, and law— contributors include seasoned academics who have dedicated their careers to researching Middle Eastern media and emerging scholars who build on earlier work and introduce fresh perspectives. Together, they provide an invaluable overview of Middle Eastern serial television and their political impact, drawing examples from Afghanistan, Egypt, Iran, Syria, and Turkey. Bringing together a diverse range of academic perspectives, this book will be of key interest to students and scholars in media and communication studies, Middle Eastern Studies, and popular culture studies.

The Nazarbayev Generation Marlene Laruelle,2019-08-30 This social and cultural analysis provides a new understanding of Kazakhstan's younger generations that emerged during the rule of Nursultan Nazarbayev, who has been presiding over Kazakhstan for the thirty years since the collapse of the Soviet Union. Half of Kazakhstan's population was born after he took power and have no direct memory of the Soviet regime. Since the early 2000s, they have lived in a world

of political stability and relative material affluence, and have developed a strong consumerist culture. Even with growing government restrictions on media, religion, and formal public expression, they have been raised in a comparatively free country. This book offers the first collective study of the “Nazarbayev Generation,” illuminating the diversity of the country’s younger generations and the transformations of social and cultural norms that have taken place over the course of three decades. The contributors to this collection move away from state-centric, top-down perspectives in favor of grassroots realities and bottom-up dynamics in order to better integrate sociological data.

International Aspects of Recent Phenomena in Media and Culture Martin A. M. Gansinger, Ayman Kole, 2021-12-21
The volume provides an updated perspective on international aspects of various developments in media and culture. It includes discussions on how the digital environment contributes to the transformation and re-interpretation of existing phenomena, such as violence-on-demand in online movies, the internet appeal of virtual gangsta rappers, or the revived battle rap tradition, which operates outside the commercial limitations of the music industry and generates more views on social media than most recording artists. The book offers a new consideration of long-term trends and developments, and demonstrates in various examples how formerly marginal practices like gaming or the previously shunned Turkish movie industry have turned into influential tools of social change. In addition, the reciprocity of media content and political settings is underlined in a focus on the Arab world and the reconstruction of impulses from transnational media outlets to recent forms of citizen journalism, as well as in the case of governments’ approaches to media policy in response to the COVID-19 pandemic. The book places the spotlight on pressing issues, such as the ongoing enforcement of information control in the name of public health or the local politics and practices that hinder the process of democratization in authoritarian systems.

Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond Tombul, Işıl, Sarı, Gülşah, 2021-05-28
Orientalism is about much more than just information gathered about the East within its general postcolonial period. In this period, orientalism is a Western discourse that dominated and shaped the view of the East. There is “otherization” in the way the West has historically looked at the East and within the information presented about it. These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media. Cinema, television, news, newspaper, magazine, internet, social media, photography, literature, and more are transforming the way the East is presented and viewed. Under the headings of post-orientalism, neo-orientalism, or self-orientalism, these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond. The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender, race, religion, and culture that make up orientalist theory. The chapters focus on how orientalism is presented in the media, cinema, TV, photography, and more. This book is ideal for communications theorists, media analysts, practitioners,

researchers, academicians, and students working in fields that include mass media, communications, film studies, ethnic studies, history, sociology, and cultural studies.
