Heading Towards Humans Again Miroslav Radenkovic, 2021-12-31 Bioethics has become an important part of everyday dynamics, encompassing both clinical and research ethics. This edited collection aims to challenge some critical cornerstones of today's contemporary bioethical concerns and issues. The individual chapters were prepared by esteemed scholars with international background in their specialties. Nowadays technological revolution is reaching a whole new level, continuously challenging us to define what is human. Keeping this in mind, the authors provided comprehensive and thoughtful views on different bioethical issues, including cultural and social influences on contemporary bioethics, posthumanism and transhumanism, death, the critical importance of informed consent, prenatal genetic testing, gene and cell therapy, mandatory vaccinations, cannabis use, antidoping concerns, treatment of rare diseases and pain management, and finally educational and legislative lines of reasoning.

**Mysterium** David Bramwell, Jo Tinsley, 2018-10-16 A CATALOGUE OF THE EXTRAORDINARY, THE STRANGE AND THE DOWNRIGHT CREEPY... Discover the unexplained mysteries and unsettling oddities of the modern world, from a beach in British Columbia awash with human feet, to the 'tulpamaneers' who claim to be channeling the living spirit of My Little Pony. Ponder terrifying thought experiments (can you think yourself to death?), and reflect on life's great questions (was the Garden of Eden located in Bedford?). In THE MYSTERIUM David Bramwell and Jo Keeling (authors of THE ODDITORIUM), present a user guide to the strange and unexplained corners of modern life. THE MYSTERIUM catalogues a host of bizarre, funny and intriguing stories for a post-Nessie generation still fascinated by the unknowable. Drawing on contemporary folklore, unsolved mysteries, and unsettling phenomena from the dark corners of the internet, this book celebrates the joy of asking questions and the thrill of finding answers which stop you dead in your tracks. Featuring a group of men who scared

themselves to death, Space's version of the Bermuda Triangle, a cat who can sniff out the dying and the tale of Slenderman, the monster who stepped out of Photoshop and into our nightmares, this fascinating book is a catalogue of the extraordinary, the strange, the mysterious and the downright creepy. Includes a Foreword by Dan Schreiber, comedian and host of the No Such Thing As A Fish podcast.

*Cats Who Changed the World* Dan Jones, 2023-04-18 The cat-tastic companion to *Dogs Who Changed the World*. 50 awe-inspiring stories of cats who have altered history, inspired art and literature, reunited lost lovers, saved lives, or just ruined everything. These inspiring, humorous, heart-breaking, or just plain weird stories reveal why cats have earned their place as our weirdest, most endearing companions, and how our fascination with them is age-old. Along the way you'll meet Félicette, the first moggy in space; Unsinkable Sam, a sea-faring feline; Tama, the railway cat who saved a community; and Snowball, the crime-solving cat. *Cats Who Changed the World* celebrates the unique relationship we have with our feline best friends, from contemporary times to all throughout history.

*The American Poet* Samuel D. G. Heath Ph. D., 2009-06 Awarded an American Legion Scholarship I am also an award winning author and have published numerous articles and books. Having attended several colleges and universities eventually earning my Ph. D. in Human Behavior I hold several life credentials in education earned during many years as an educator together with years spent working in the Aerospace Industry and other occupations. But to call Einstein's famous equation  $E=MC^2$  incomplete because it does not account for life and death does seem quite extraordinary, yet these remain the two greatest mysteries they have ever been denying us thus far a theory of everything. Something animates life and departs with death, but what this something is not all our science has yet discovered, though things like the Large Hadron Collider may provide needed insight, and it has been in the pursuit of knowledge about these two greatest mysteries that has compelled me into so many varied academic studies and careers attempting to make sense of the world and our place in it and how people think and deal with the issues of life and death philosophically, religiously, and politically. The things I have discovered along the way compelled me to much research and speculation about these mysteries and how they impact our lives, to communicate my thoughts about them to share with others in a daily journal and posted to my website and provided in book format each year. These writings are of importance in an increasingly dangerous world with a most uncertain future

due to so much corruption, ineptitude and lack of accountability in our own government as well as that of others, the abject failure of our schools due to the very same things especially the same lack of accountability we find in government, the religious and political hatreds with protracted wars worldwide and little to give hope for world peace I believed my articles about these important enough to publish in book format. Some years ago I removed from the greater part of society to live in semi-seclusion alone with my books and thoughts in a quiet part of the Sequoia National Forest devoting myself to contemplation, speculating about many things and committing my thoughts in writing fulltime. As a writer and author given to much introspection and fascinated by human behavior, nature, and our universe it was important to me to simplify my life as much as possible as anyone given to philosophical speculation about many things must. That much of my writing covers some metaphysical thoughts about God, angels and demons, an afterlife and Biblical stories of origins, of prophecies of the End Times and so much more have been absorbing studies as well and I freely share my thoughts about these in this volume.
