Performance Management for Agile Organizations Tim Baker, 2017-02-14 Baker takes on eight dysfunctional people management practices originating from the scientific management and offers practical solutions for changing these practices and increasing organizational agility. Agile is the new black. Every business now has to be adaptive, nimble and ready to pivot – managers have to be comfortable with ambiguity and constantly ready for change. And yet... While agility is regarded as essential for competitive advantage, most organizations are still unthinkingly applying people management practices, rooted in Frederick Taylor's scientific management philosophy of the early 20th century, designed to ensure consistency and efficiency on production lines but which actively prevent the sort of creativity and flexibility needed in the modern workplace. 100 years of scientific management has led to the creation of eight performance myths. Myths that impede the agility necessary to compete in the age of the knowledge worker but which are so instinctively embedded in management psyche that they go unchallenged despite the fact that the changing world of work has rendered them dysfunctional and counterproductive. Through case studies and examples Baker demonstrates how the right workplace culture for promoting and applying agile decision-making consists of eight values shared by employer and employee – values that are polar opposite of the values and assumptions of traditional management styles. A new psychological contract that enables the collaborative working relationship necessary for agility to flourish.

The Regional Multinationals Alan M. Rugman, 2005-01-06 Although many firms label themselves 'global', very few can back this up with truly global sales and operations. In *The Regional Multinationals* Alan Rugman examines first-hand data from multinationals and finds that most multinationals are strongly regional, with international operations in their home regions of North America, the US or Asia. Only a tiny proportion of the world's top 500 companies actually sell the same product and deliver the same services around the world. Rugman exposes the facts behind the popular myths of doing business globally, explores a variety of regional models and offers an authoritative agenda for future business strategy. *The Regional Multinationals* is the essential resource for all academics and students in International Business, Organization and Strategic Management, as well as those with an interest in finding out how multinationals really work in practice and how future strategy must respond.
