North of Boston Elisabeth Elo, 2014-01-23 "A gripping and unorthodox thriller, packed with intriguing characters and unexpected twists." —Tom Perrotta, bestselling author of *Nine Inches Like Smilla's Sense of Snow* combined with the best of Dennis Lehane, *North of Boston* is a dark and deeply atmospheric thriller with a sharp-witted, tough-talking heroine readers will be clamoring to meet again. Boston-bred Pirio Kasparov is out on her friend Ned's fishing boat when a freighter rams into them, dumping them both into the icy waters of the North Atlantic. Somehow, she survives nearly four hours before being rescued. Ned is not so lucky. Pirio can't shake the feeling that what happened was no accident, a suspicion seconded by her cynical Russian-immigrant father. And when Pirio teams up with the unlikeliest of partners, she begins unraveling a terrifying plot that leads to the frozen reaches of the Canadian arctic, where she confronts her ultimate challenge: to trust herself.

**The Non-Runner's Marathon Trainer** David A. Whitsett, Forrest A. Dolgener, Tanjala Jo Kole, 1998-02-01 Athlete.

Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. The Non-Runner's Marathon Trainer is based on the highly successful marathon class offered by the University of Northern Iowa, which was featured in a Runner's World article titled Marathoning 101. The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way. This is marathon running for real people, people with jobs and families and obligations outside of running. The Non-Runner's Marathon Trainer has proven successful for men and women of all ages. Now let it work for you.

*Creative Clowning, Fourth Edition* Bruce Fife, Tony Blanco, Steve Kissell, Bruce Johnson, Ralph Dewey, Hal Diamond, Jack Wiley, Gene Lee, 2015-07-10 The Fourth Edition has full-color photos and drawings throughout. Known as the Bible of Clowning by professional clowns, this fun-filled book goes beyond merely explaining how to perform the physical skills, it teaches the reader how to use these skills creatively to become funny and entertaining. Drawing from the combined experience and talents of eight professional entertainers and respected authors, this book provides step-by-step instructions on everything from juggling to makeup, and being funny, to setting up and operating a home-based entertainment business. Includes information on comedy magic, stiltwalking and unicycling, balloon sculpting, funny juggling, fun with puppets, silly music, balancing buffoonery, mine and physical comedy, makeup and wardrobe, developing a lovable character, controlling an audience, creative use of props, how to create funny routines and gags, how to be a good comedian, and how to make a successful living as a children's entertainer. More than balloon tying and makeup tips, this tutorial teaches the practical and business aspects of the clowning profession...The eight authors, all experts in the field, explain the how-to's of juggling, puppetry, slapstick, magic, joke telling and stiltwalking. Even for those not aspiring to clown stardom or planning to set up their own entertainment business, this volume can be useful as a source for planning a party or special school event. -Booklist, American Library Association The strengths of the book lie in the detailed, comprehensive coverage of the topic, the inclusion of many ideas and examples, and the emphasis on in-depth understanding of the process involved in creation of character and comic routine. -School Library Journal It's an excellent book, for both beginner and advanced clown. I have recommended it to my local clown groups and my beginning class at Purdue. -Janet Tucker, President, World Clown Association An excellent reference...outstanding book and I would rate it as a five red clown nose book. -Lee Mullally, Education Director, World Clown Association Creative Clowning-the name says it! And the book shows the creativeness of its authors, and the ability to insert that same creativeness in its readers. Sit back, enjoy, learn, and truly become a creative clown. -Aye Jaye, world famous clown and magician I would recommend the 223 page book to any clown, beginner or professional. It is the most complete book on clowning to date...it is factual, informative and will become the reference book on clowning for the foreseeable future...the best on the market. -Jim Russell, Clowning Around magazine An excellent book...If you're not funnier after reading this book, you're hopeless. -The Book Reader Magicians have the Tarbell Course of Magic and now, at last, clowns have a source in the same caliber. It doesn't matter if you have been a clown for an hour or for years, you can learn and benefit from this book. I cannot say enough about this book but Thanks and my future audiences would definitely say Thanks for your contribution to the future development of laughter! -Charles G. Martin, professional clown and magician Provides oodles of information on everything from funny juggling and performing miracles to handling troublemakers and putting on clown makeup...It could definitely be used as a textbook in clown school, but it could just as

well be read by anyone who is interested in comedy in general...the writing in this book is clear and simple and hence, very entertaining...For those who are considering a career in clowndom, this book is a must For those who just want to have a good time reading about this most happy of careers, this book is also a must.-Nashua Telegraph

**The Complete Book of Laser Sailing** Richard L. Tillman, 2005-06-15 CHAPTER 1. Loomings. Call me Ishmael. Some years ago—never mind how long precisely—having little or no money in my purse, and nothing particular to interest me on shore, I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth; whenever it is a damp, drizzly November in my soul; whenever I find myself involuntarily pausing before coffin warehouses, and bringing up the rear of every funeral I meet; and especially whenever my hypos get such an upper hand of me, that it requires a strong moral principle to prevent me from deliberately stepping into the street, and methodically knocking people's hats off—then, I account it high time to get to sea as soon as I can. This is my substitute for pistol and ball. With a philosophical flourish Cato throws himself upon his sword; I quietly take to the ship. There is nothing surprising in this. If they but knew it, almost all men in their degree, some time or other, cherish very nearly the same feelings towards the ocean with me.
