Child Sexual Abuse: Empirical Research on Understanding and Helping Victims and Offenders Noora Ellonen,Robert Horselenberg,Cristina Izura,Taina Laajasalo,Nadia Marie Wager,2022-03-11

Management of Construction Projects John Schaufelberger,Len Holm,2024-03-14 Unique among construction project management textbooks, *Management of Construction Projects*, third edition, takes the constructor's perspective, carefully analyzing a complex, real-world construction case study from multiple angles to demonstrate the skills, knowledge, and techniques students require to become successful project managers. Popular as an undergraduate text and as a contractor resource, the book identifies key stages of the project-management process, such as delivery methods and contracts; estimating, planning, and scheduling; preconstruction services; subcontracting and material management; documentation, communications, and payment; controls, quality, and safety; leadership and ethics; and claims, disputes, and close-out. This third edition includes a novel case study, a new chapter on preconstruction services, updated contract forms and figures, and additional student exercises, and integrates use of project management technology. Topics include building information models, sustainable construction, environmental compliance, lean construction, and off-site construction. Boxed examples, or short case studies, have been included with each chapter. These examples correspond directly to the chapters in which they are included and give the reader an applied approach to learning the concepts presented. While primarily focused on the

management of commercial projects, the principles and techniques in Management of Construction Projects also apply to residential, industrial, and heavy construction. Written in straightforward language from a constructor's perspective, this textbook prepares upcoming construction project managers with everything they need to see a successful project through from start to finish.

First Nations Education Policy in Canada Jerald E. Paquette, Gérald Fallon, 2010-10-30 How can First Nations schools in Canada offer a curriculum that is at once authentically and deeply Aboriginal while comparable in content, quality, and standards to provincial and territorial education? First Nations Education Policy in Canada is a critical analysis of policy developments affecting First Nations education since 1986 and a series of recommendations for future policy changes. Jerry Paquette and Gérald Fallon challenge the fundamental assumptions about Aboriginal education that have led to a Balkanized and ineffective educational system able to serve few of the needs of students. To move forward, the authors have developed a conceptual framework with which to re-envision the social, political, and educational goals of a self-governing First Nations education system. Offering a sorely needed fresh perspective on an issue vital to the community, First Nations Education Policy in Canada is grounds for critical reflection not only on education but on the future of Aboriginal self-determination.

Library & Information Science Abstracts, 2006

Spectral Evidence Moira Johnston, 1997 National Magazine Award-winning author Moira Johnston tells the dramatic story of a perfect American family destroyed when a daughter's flashbacks of incestuous rape by her father turned to accusations and lawsuits - and of the explosive landmark trial in Napa Valley that gave a father, for the first time, the right to strike back legally at the therapists he believed had planted false memories of sexual abuse in his daughter's mind. Johnston sets the story of Gary, Stephanie, and Holly Ramona in the context of a broader concern over the destructive impact of uncorroborated memories of childhood sexual abuse, a controversy that has embroiled parents, adult children, and family therapists throughout the country and has stirred debate among feminists, psychologists, memory scientists, and lawyers.
