NOC and NIC Linkages to NANDA-I and Clinical Conditions Marion Johnson, Sue Moorhead, Gloria M. Bulechek, Howard K. Butcher, Meridean L. Maas, Elizabeth Swanson, 2011-05-06 Based on ongoing research conducted by investigative teams at the University of Iowa, *NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care*, 3rd Edition is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new linkages to common, high-cost medical diagnoses. - Linkages between the three standardized languages recognized by the American Nurses Organization: NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care. - Tabular format allows you to quickly retrieve information. - Case studies with nursing care plans demonstrate the practical, real-life application of linkages. - Definitions of all NANDA-I, NOC, and NIC labels provide comprehensive coverage of the standardized languages. - Serves as an excellent companion to *Nursing Outcomes Classification (NOC)*, 4th Edition and *Nursing Interventions Classification (NIC)*, 5th Edition. - NEW! Added linkages to common medical diagnoses help support clinical reasoning, improve quality, and build the evidence needed to enhance nursing care. - Includes 15-20 high-frequency, high-cost medical diagnoses that are commonly experienced by patients across the life span. - Examples include Congestive Heart Failure, Chronic Obstructive Pulmonary Disease (COPD), Total Joint Replacement, and Asthma. - NEW! Treatment of Intervention content makes information easier for students to locate by listing interventions as Major Interventions and Suggested Interventions. - Two NEW chapters discuss the use of linkages for clinical reasoning and quality improvement and the use of NNN in computerized information systems. - NEW! Information associated with the risk for nursing diagnosis is contained on a single page for quick and easy reference.

Nursing Diagnoses, Outcomes, and Interventions Marion Johnson, 2001 NURSING DIAGNOSES, OUTCOMES, AND INTERVENTIONS: NANDA, NOC and NIC Linkages extends the use of the Nursing Interventions Classification (NIC) and Nursing Outcomes Classification (NOC) by linking them with nursing diagnoses, using the NANDA taxonomy. This book is the first and only to provide linkages between all three recognized taxonomies based on research by the investigative teams at the University of Iowa. Psychiatric and Mental Health Nursing Desmond Cormack, William Reynolds, 2013-11-11 Psychiatric and Mental Health Nursing: Theory and practice was conceived as a result of three major premises which, in the view of the editors, relate to the practice of psychiatric and mental health nursing. First, that high-quality psychiatric and mental health nursing can be practised only if it is underpinned by appropriate nursing theory. Secondly, that there exists a body of theory which can and should be applied to psychiatric and mental health nursing. Thirdly, that there is a need for a text which will assist teachers, students and clinicians to apply available nursing and borrowed theory to clinical practice. The general aim of this book is to introduce nursing students to a theory based approach to caring for people with psychiatric and mental health problems. The phrase psychiatric and mental health problems indicates that the text relates to clients with a psychiatric diagnosis, and also to those who have mental health problems but who do not necessarily have such a diagnosis. The client group to which the material in this text applies will include those who are, or have been, hospitalized and those in the community who have not been, and may never be, hospitalized. The intended readership is all students of psychiatric and mental health nursing issues, for example basic and post-basic nurses, and their teachers.
