The Sun of Knowledge (Shams Al-Ma'arif) Ahmad ibn 'Ali al-Buni, 2021-10-31 The Sun of Knowledge (Shams al-Ma'arif) is one of the most revered historical grimoires of the Arabic corpus. Feared by some, hallowed by others, it is one of the most famous - or infamous - books in the Arabic-speaking and Islamic world. Written in Egypt in the thirteenth century by a Sufi mystic and mage of Algerian origin, the Shams presents the fundamentals of Arabic-Islamic occult work - from spiritual cosmology and astrology (including various particularly lunar magics) to working with spirits and jinn, magical employment of letters and numbers, and the occult applications of the Qur'an - thereby comprising a veritable encyclopedia of Islamic magical wisdom and formulae. Images and descriptions of amulets and talismans adorn it. Numerous beautiful manuscripts of the Sun of Knowledge have survived, various of which have been used as a basis for this present work. Never before published in English, this selected translation includes sections of the Sun of Knowledge on the mysteries of the letters, astrological timings, lunar mansions, the ancient Arab beliefs surrounding the stars, planetary matters, astronomy, the angels for and workings pertaining to the four seasons, summoning the jinn, the employment of the names of God for many and varied purposes, the construction of the famed ring of Solomon, and a miscellany of tried-and-true talismans. This selected translation takes a general approach to a much vaster text, and features illustrations, original artwork, and commentary to assist those unfamiliar with Islamic magic and culture. This edition is also ideal for any student of magic or the occult, classical Arabic astrology and astronomy, Islamic esotericism, or Sufism.

Gullah Geechee Muslims in America Muhammad Fraser-Rahim, 2024-12-15 Through meticulous research, interviews, and documentation, Gullah Geechee Muslims in America: Exploring Islamic Identity in the African Diaspora presents a unique and significant contribution to religious studies, Africana studies, and anthropology by shedding light on a previously understudied aspect of the Gullah/Geechee community and culture. Previous studies of enslaved African Muslims have claimed that Islam, as a conscious practice, vanished by the eve of the Civil War. However, Muhammad Fraser-Rahim highlights the continuity of Islamic belief and practice in the Lowcountry. For scholars who have spent decades researching the retention of African culture among the enslaved and their descendants, this book reveals certain challenges and poses new avenues of research.

Al-Ghazali the Islamic Reformer Mohamed Abu Bakr a. Al-Musleh, 2019-10-16 Numerous studies have been done on Imam

al-Ghazali (1058-1111) in almost all major languages. So much is the academic attention given to him, and deservedly so, that it is difficult to find any element of originality in a new study on him. Various aspects of his life and thought have yet to be adequately studied, one of them being his role in islah (Islamic reform). It is also true that the study of islah as a separate topic is somewhat new, and available literature on the subject is limited within the views and the achievements of a number of distinguished scholars in the modern times. This work attempts to discover part of the rich legacy of the reformers by introducing a pre-modern scholar as Imam al-Ghazali.

Under the Drones Shahzad Bashir, Robert D. Crews, 2012-05-14 Western media coverage of Afghanistan and Pakistan paints a simplistic picture of ageless barbarity, terrorist safe havens, and peoples in need of either punishment or salvation. Under the Drones looks beyond this limiting view to investigate real people on the ground, and analyze the political, social, and economic forces that shape their lives.
