**Grammar in ELT and ELT Materials** Graham Burton, 2023-06-06 This book investigates the content of the grammar syllabus typically employed in mainstream English Language Teaching. Using a mixed-methods approach, the author examines how the syllabuses used in coursebooks are actually constructed, how they evolved and how valid their contents are as a basis for teaching. The research reported consists of a broad exploration of primary sources in order to outline the evolution of ELT pedagogical grammar; ten interviews with key ELT authors and publishing professionals, which allows for the investigation of the decision-making processes underlying the choice of grammar content in ELT teaching materials; and finally, the presentation of case studies which examine three areas of grammar, analysing the evolution of their treatment in ELT materials (both historical and contemporary) and comparing their current treatment to data on real learner use. This book contributes to the literature on syllabus design and pedagogical grammar and builds on existing research into materials design. It will be of interest to researchers and professionals working in the fields of applied linguistics, pedagogical grammar, curriculum design and materials design.

**VIVO** Katy Borner, Ying Ding, Mike Conlon, Jon Corson-Rikert, 2022-05-31 The world of scholarship is changing rapidly. Increasing demands on scholars, the growing size and complexity of questions and problems to be addressed, and advances in sophistication of data collection, analysis, and presentation require new approaches to scholarship. A ubiquitous, open information infrastructure for scholarship, consisting of linked open data, open-source software tools, and a community committed to sustainability are emerging to meet the needs of scholars today. This book provides an introduction to VIVO, <http://vivoweb.org/>, a tool for representing information about research and researchers -- their scholarly works, research interests, and organizational relationships. VIVO provides an expressive ontology, tools for managing the ontology, and a platform for using the ontology to create and manage linked open data for scholarship and discovery. Begun as a project at Cornell and further developed by an NIH funded consortium, VIVO is now being established as an open-source project with community participation from around the world. By the end of 2012, over 20 countries and 50 organizations will provide information in VIVO format on more than one million researchers and research staff, including publications, research resources, events, funding, courses taught, and other scholarly activity. The rapid growth of VIVO and of VIVO-compatible

data sources speaks to the fundamental need to transform scholarship for the 21st century. Table of Contents: Scholarly Networking Needs and Desires / The VIVO Ontology / Implementing VIVO and Filling It with Life / Case Study: University of Colorado at Boulder / Case Study: Weill Cornell Medical College / Extending VIVO / Analyzing and Visualizing VIVO Data / The Future of VIVO: Growing the Community

**Putting victims first** Great Britain: Home Office, 2012-05-22 The aim of this White Paper is to set out proposals to deal with anti-social behaviour. Anti-social behaviour is a broad term used to describe the day-to-day incidents of crime, nuisance and disorder that make many people's lives a misery - from litter and vandalism, to public drunkenness or aggressive dogs, to noisy or abusive neighbours. Such a wide range of behaviours means that responsibility is shared between a number of agencies, particularly the police, councils and social landlords. The Government is committed to significant reform in dealing with crime and anti-social behaviour by putting victims at the heart of the response, including: (1) Agencies identifying vulnerable and repeat victims earlier, and responding at the first sign of trouble, through better logging of calls and managing of cases; (2) A simpler toolkit, with 19 powers reduced to just six, including an injunction which can be secured in a matter of hours not months, to nip behaviour in the bud; (3) Tough orders which can deal with anti-social behaviour if it escalates into criminality, which are flexible enough to deal with a range of yobbish behaviour including out of control dogs, public drunkenness, minimotos and others; (4) The community getting involved in tackling anti-social behaviour, for example through inputting into a Community Harm Statement to highlight to the court the impact of the behaviour on their daily lives; (5) Agencies held to account locally by directly elected Police and Crime Commissioners, and by victims through the Government's new Community Trigger.

Confidence and Legitimacy in Health Information and Communication Ceiline Paganelli, 2018-12-18 The question of trust is crucial in the field of health. First, because health is indicative of particularly strong issues at the societal, regulatory, institutional or individual levels; secondly, because the boundaries between specialized information validated by legitimate instances and uncommitted information have become permeable; finally, because it appears to be central within relations between actors in the field. In this book, we propose to address the trust in terms of the information and communication phenomena that are at work in the health sector, and to look at the process of building the legitimacy of information in the health sector. health.

*Preparing Classroom Teachers to Succeed with Second Language Learners* Thomas Levine, Elizabeth Howard, David Moss, 2014-07-11 This volume identifies resources, models, and specific practices for improving teacher preparation for work with second language learners. It shows how faculty positioned themselves to learn from resources, experts, preservice

teachers, their own practice, and each other. The teacher education professionals leverage their experience to offer theoretical and practical insights regarding how other faculty could develop their own knowledge, improve their courses, and understand their influence on the preservice teachers they serve. The book addresses challenges others are likely to experience while improving teacher preparation, including preservice teacher resistance, the challenge of adding to already-packed courses, the difficulty of recruiting and retaining busy faculty members, and the question of how to best frame the larger issues. The authors also address options for integrating the work of improving teacher preparation for linguistic diversity into a variety of different teacher education program designs. Finally, the book demonstrates a data-driven approach that makes this work consistent with many institutions' mandate to produce research and to collect evidence supporting accreditation.
