Química para geología Sergio Gaviria Melo, 2016-04-01 A medio camino entre la escala del Universo y la de las partículas atómicas, la estructura y composición de la Tierra responde a reacciones entre los elementos químicos, que dan origen a los más variados compuestos. Dentro de la geósfera los procesos han ocurrido bajo condiciones de presión y temperatura extremas, que han asociado los elementos por su afinidad geoquímica y, como consecuencia, los han separado en capas concéntricas (núcleo, manto y litósfera). Al contacto con la hidrósfera y la atmósfera, las rocas liberan iones solubles en el agua y crean nuevos productos por hidratación e hidrólisis. La reactividad ácido-base y la presencia o ausencia de oxígeno, que determina la reactividad oxidante o reductora del medio, orientan esas reacciones en los más diversos ambientes geoquímicos. Los seres vivos, entre ellos los humanos, también ejercen su influencia modificando la velocidad e intensidad de tales reacciones. Con brevedad y precisión, Química para geología brinda a estudiantes de geología y profesionales de ciencias afines las herramientas para comprender, a partir de la ciencia química, tan amplia realidad. Para tal efecto, se concentra en los conceptos claves requeridos en el aula, el uso de los instrumentos y procedimientos de análisis en el laboratorio, y la aplicación en campo tanto de estos como de aquellos. Se trata, pues, de un texto imprescindible para quien quiera adentrarse en el estudio de la geoquímica desde una perspectiva teórico-práctica.

The Politics of Identity in Latin American Censuses Luis F. Angosto-Ferrández, Sabine Kradolfer, 2017-10-02 The Politics of Identity in Latin American Censuses contributes new and original perspectives to existing discussions about the shaping of multiculturalist ideology in Latin America, its interweaving with the cultural politics of neoliberalism and the relation between ethnic identification resurgence and economic globalization. Scrutinising national censuses across the continent, the studies included in this volume reveal clear relationships between censuses, nation-building and government projects, but also strong and determinant connections between domestic and supra-national spheres. The contributors to this volume open provocative avenues of research on Latin American societies by demonstrating how, in the realm of identity politics, supra-national institutions and normativity socialise national census bureaus in a way that largely annuls ideological differences between regional governments. This book was originally published as a special issue of the Journal of Iberian and Latin American Research.

Uncertain Regional Urbanism in Venezuela Fabio Capra Ribeiro, 2020-11-02 Uncertain Regional Urbanism in

Venezuela explores the changes cities face when they become metropolises, forming expanding regions which create both potential and problems within settlements. To do so, it focuses on three metropolitan areas located in Venezuela's Center-North region: Caracas, Maracay and Valencia, designated as Camava. Considering three core topics, government and territorial administration, infrastructure and environment, as well as looking at the reciprocal impact, this book describes and analyzes the determinant variables that characterize the phenomenon of regional urbanization in this area and in the wider Global South. It includes documentary research, semi-structured interviews and Delphi methodology, involving a total of forty experts from different disciplines to build a comprehensive outlook on the situation. This book presents a broader understanding of the region to encourage a more sustainable and knowledge-based development plan, moving away from the exploitation of natural resources, with six future-oriented scenarios to consider. This is a much-needed study in the urban regions of Venezuela, which will be of interest to academics and researchers in Latin American studies, the Global South, architecture and planning.

Improving University Reputation Through Academic Digital Branding Del Pino, Ariana Daniela, Lloret Romero, Nuria, 2020-11-06 As higher education institutions adapt to an increasingly digital world, it is imperative that they adopt technological techniques that allow them to establish a digital presence. Academic e-branding involves managing a university's brand and image to promote and build the reputation of the institution, especially in regards to its student and faculty research and achievements. Without a solid digital presence, higher education institutions may struggle to remain competitive. *Improving University Reputation Through Academic Digital Branding* is a critical scholarly publication that explores digital branding and its role in establishing the reputation of academic institutions and programs. Featuring a range of topics including digital visibility, social media, and inclusive education, this book is ideal for higher education boards, brand managers, university and college marketers, researchers, academicians, practitioners, administrators, and students.

Emotions and Loneliness in a Networked Society Bianca Fox, 2019-11-08 Loneliness affects quality of life, life satisfaction, and well-being, and it is associated with various health problems, both somatic and mental. This book takes an international and interdisciplinary approach to the study of loneliness, identifying and bridging the gaps in academic research on loneliness, and creating new research pathways. Focusing in particular on loneliness in the context of new and emergent communication technologies, it provides a wide range of theoretical and methodological perspectives and will contribute to the re-evaluation of the way we understand and research this contemporary global phenomenon.

Mercados David Sterling, 2019-04-30 Part travelogue, part cookbook, *Mercados* takes us on a tour of Mexico's most colorful destinations—its markets—led by an award-winning, preeminent guide whose passion for Mexican food attracted followers from around the globe. Just as David Sterling's *Yucatán* earned him praise for his "meticulously researched knowledge" (*Saveur*) and for producing "a labor of love that well documents place, people and, yes, food" (*Booklist*),

Mercados now invites readers to learn about local ingredients, meet vendors and cooks, and taste dishes that reflect Mexico's distinctive regional cuisine. Serving up more than one hundred recipes, Mercados presents unique versions of Oaxaca's legendary moles and Michoacan's carnitas, as well as little-known specialties such as the charcuterie of Chiapas, the wild anise of Pátzcuaro, and the seafood soups of Veracruz. Sumptuous color photographs transport us to the enormous forty-acre, 10,000-merchant Central de Abastos in Oaxaca as well as tiny tianguises in Tabasco. Blending immersive research and passionate appreciation, David Sterling's final opus is at once a must-have cookbook and a literary feast for the gastronome.

International Handbook of Adolescent Pregnancy Andrew L. Cherry, Mary E. Dillon, 2014-01-13 The rates are on the decline worldwide. But adolescent pregnancies still occur, placing millions of girls each year at risk for medical complications and social isolation and their babies for severe health problems-especially when prenatal care is inadequate or nonexistent. But as the opportunity for young women and girls increases around the world, adolescent pregnancy will continue to decline. Featuring reports from countries across the developed and developing worlds, the International Handbook of Adolescent Pregnancy analyzes the scope of the problem and the diversity of social and professional responses. Its biological/ecological perspective identifies factors influencing childhood pregnancy, as well as outcomes, challenges and needs of very young mothers as they differ across nations and regions. Salient comparisons are made as cultural contexts and community support vary widely and attention is paid to issues such as child marriage, LGBT concerns and the impact of religion and politics on health care, particularly access to contraception, abortion and other services. This global coverage heightens the understanding of readers involved in care, education and prevention programs and otherwise concerned with the psychosocial development, reproductive health and general well-being of girls. Included in the Handbook: Biological influences of adolescent pregnancy. Adolescent maternal health and childbearing. Adolescent pregnancy and mental health. International perspectives on adolescent fathers. Adolescent pregnancy as a feminist issue. Adolescent pregnancy as a social problem. Plus viewpoints from more than thirty countries. As a unique source of up-to-date findings and clear-headed analysis, the International Handbook of Adolescent Pregnancy is a go-to reference for practitioners and researchers in maternal and child health, pediatrics, adolescent medicine and global health.

¿Cómo se hace un dios? Enrique Florescano, 2016-05-13 Enrique Florescano narra la formación de los dioses en Mesoamérica, desde las cosmogonías más antiguas hasta los relatos, ritos y cantos de los pueblos indígenas de la actualidad. Cómo se hace un dios es una búsqueda por comprender cómo fueron creados los dioses y cómo, a pesar de sus transformaciones constantes, las deidades principales conservaron sus identidades y funciones originales, así como sus cultos y ritos a través de los siglos. Tras la creación del cosmos surgen dioses más cercanos a los seres humanos, como el

dios del maíz y el del viento. Este libro sigue las transformaciones de ambos, quienes se asemejan a los seres humanos en sus representaciones y llevan una vida cercana a la de ellos: nacen, se desarrollan, realizan hazañas memorables y a veces mueren. Sólo el dios del maíz resucita en cada cosecha y se vuelve inmortal. Al morir, se transforma en semilla que viaja al inframundo, donde es sembrada y luego renace como planta portentosa que derrama los granos que alegran la vida de los seres humanos. El relato de los dioses del maíz y del viento es una página indeleble en la historia de Mesoamérica. Los dioses cambian, se multiplican, los antiguos cultos se conjugan con los nuevos y adquieren formas distintas en cada región. Sin embargo, las historias más antiguas y los relatos de los sobrevivientes actuales de Mesoamérica tienen como actor principal a la planta del maíz transformada en dios, la planta que significa la recreación imperecedera de la vida.

La tesis de Nancy Ramón José Sender, 1962 Nancy's thesis is a critical look at the Spain of her time that Ramón J. Sender makes through the eyes of a surprised American student. It reflects both the tradition and modernity of a country that timidly opened up to the developed world but still kept, in some moments as a treasure, but in others as a burden, the deep ground of centuries of manners difficult to assume, interpret and understand, not only for the enthusiastic traveler like Nancy, but for many Spaniards whom the avatars of his life and his nation had led as Sender into forced or voluntary exile.

Acceso Abierto Y Bibliotecas Digitale Lynne M. Rudasill, Maria Elena Dorta-Duque, 2013 The social sciences have made fundamental contributions to the understanding of the economic, political and social life of nations in the past century. Social science libraries now have an important role to play in the context of the information society as significant sources of academic and social knowledge. This work provides information on the development and use of digital resources in the social sciences emphasizing best practices; an articulation of some of the problems presented to providing these resources; and a view to the use of these resources to support sustainable development.
