Teaching Information Literacy and Writing Studies Grace Veach, 2019-01-15 This volume, edited by Grace Veach, explores leading approaches to teaching information literacy and writing studies in upper-level and graduate courses. Contributors describe cross-disciplinary and collaborative efforts underway across higher education, during a time when fact or truth is less important than fitting a predetermined message. Topics include: working with varied student populations, teaching information literacy and writing in upper-level general education and disciplinary courses, specialized approaches for graduate courses, and preparing graduate assistants to teach information literacy.

Principles and Practice Of American Politics: Classic and Contemporary Readings, 3rd Edition Samuel Kernell, Smith S, 2006-07-15 Without ever losing sight of the classics, Kernell and Smith take a fresh look at the implications of political science for our understanding of recent events and trends. This balance of the classic with the contemporary—along with careful editing to retain the flow of original pieces—distinguishes this highly regarded reader. Drawing from a variety of sources and perspectives, readings examine the strategic behavior of key players in American politics. These 44 selections show that political actors, though motivated by their own interests, are governed by the Constitution, the law, and institutional rules, as well as influenced by the strategies of others. Thanks to feedback from adopters, 26 readings are back by popular demand, while 17 new or revised selections offer readable and current analyses, 5 of which have been written specifically for this volume. Kernell and Smith supply helpful headnotes for each reading, establishing important context and rationale for selections.

Two Roads Diverged and I Took Both Melanie Mayer, 2010-06-22 Two Roads Diverged and I Took Both: Meaningful

Writing Instruction in an Age of Testing presents theories, research, and practical ideas for classroom writing instruction, specifically in the areas of: the reading-writing connection, the social aspect of writing, grammar instruction, teaching mainstreamed special education or English Language Learners, and assessment. The book's premise is that when research-based best practices are applied, student writing quality is improved and authentic learning takes place, which will also promote success on state-mandated writing assessments; but preparing students to write primarily for assessments does not promote excellent writing for life.
