John Hussey

Bang to Eternity and Betwixt John Hussey, 2014-07-31 Covering the Cosmos from before the Big Bang through to the creation of our universe and up to but not including our arrival on stage; our will is not yet imposed, we had no hand, act nor part in its provisions, beyond investigating to understand what has been delivered us. The many aspects of the Cosmos are melded, in a headline driven style, to paint a cohesive picture as well as allowing the reader choose to delve further where they may choose to paint their personal picture. Cosmos - includes; • The creation mechanism for our Universe and why there exists a possible Multiverse. • The creation mechanisms of the galaxies with their diversity of Star types. • The space exploration of our Solar System. • The Earth and Moon from their birth to their life driving engines for our planet. • The evolutionary processes that led to our arrival on the planet. • Our natural world with its great events. • Documentary video links on all topics of the book are included. The story is factual in manner, in the proper tradition of reporting, no personal opinions are expressed. The life stories of the standout personalities, in text and video, without whom what is now known, could not have been unraveled, in the case of Cosmos, they are; • Galileo Galilei • Isaac Newton • Albert Einstein • Charles Darwin This is a Video Book, vBook, beyond its text there are 150+ video titles, 100+ viewing hours, downloaded and stored locally on your computer, to be able to watch anytime, offline, without the need for local internet connection. Google 'Cosmos' and you get about 27,800,000 search results, so over these last several years I've searched out the best documentary videos with their hyperlinks included here, blending their content to report cohesively, supplementing, where appropriate, from Wikipedia and also include those hyperlinks for readers wanting to delve further. The 'List of Contents' runs to 6 levels to provide a form of map to the reader as the reporting sequence is not a mere chronology of Cosmic events, it delves, as necessary into the stories as to how the events became understood to us. There is a 7th level, hyperlinked, at its base, which brings further background content, from Wikipedia, to those who choose to read further into any of the topics. The 'Index' allows navigation for the reader who has specific interests to investigate through the fabric of the report. The 'Text' is structured to 4 levels beginning with the primary, headline driven, main body content followed by relevant Wikipedia extracts, indented in purple, for those choosing to read further into a particular topic through to hyperlinked Wikipedia - Full Article text within the book and in turn out to the website itself. For the reader that wants to stay with the big picture, main

body content, there is a “Skip” link to take you past each of the extracts, on to the next headline title and main body content. There are 150+ video content links delivering 100+ hours of viewing time, of the best documentary film available online. The main sequence structure is; • Cosmology - Universe & Multiverse • Geology - Earth & Moon • Biology - Life - Plant & Animal • Ecology - Evolution & Environment - Plant, Animal & Human Special Edition There is also a Special Edition of this book available for US\$49.95 which streams all video content from a secure Cloud Drive; therefore, video content cannot be removed by third party video platform providers such as YouTube, DailyMotion, Vimeo..... This Standard Edition streams from these. The Cloud Drive Server also allows you conveniently download to your local drive, as much video content as you choose, to watch, offline, at a time that best suits you. To view or purchase, paste the books ASIN: B00LEWY5WW into the Kindle Store search box. If you've any queries, feel welcome to contact bangtoeternityandbetwixt@gmail.com

The Ghost of Madame Curie James Piazza, 2022-06-29 James Piazza is a Western New York-based archivist and music historian. He developed a series of multimedia presentations on experimental music, ambient sound, archival techniques for digital audio, and lectures on personal media servers for large file libraries. His primary goal is to create a greater public understanding and awareness of 20th century music and sound. Piazza founded Innerspace Labs as an independent music archive chiefly communicating with the public via The Innerspace Connection music blog. He manages a library of over 300,000 soundworks focusing on ambient and experimental recordings. This book comprises the first 12 years of our publications showcasing highlights of the Archive, as well as select previously unpublished works.

Eye Beyond the Sky Jie Wang, 2024-09-17 This book highlights stories of the most important 13 ground-based observatories and 14 space probes in human history, leading readers through each significant step of human's astronomical observation journey. From the earliest Hooker Telescope and the Mount Wilson Observatory, to the latest FAST, JWST and DAMPE, the targets of observation range from large systems such as the solar system, the milky way, and the universe, to individual planets such as Jupiter, Saturn, Mars, and the remote stars, and to the matters that reveal the origin of the universe, such as dark matter and cosmic background radiation. The book presents the mysteries of the sky in an easily readable manner suitable for audiences of all ages who are curious about the universe and thirsty to know all the important discoveries in the past century, especially the last decade. With carefully-selected contents, the book weaves together a series of tales to make the convoluted history of astronomical observation full of fun and excitement, ensuring that readers never lose interest during reading.

After Arson Gary Fincke, 2025-10-21 This essay collection spans a lifetime's worth of characters, settings, themes, and ways of organizing. It is, after all, a collection of Gary Fincke's best work. Yet, for the variety of content covered, from coming-of-age to family to nuclear weapons to space exploration to mass shootings to rock attacks on cars to the author's mother's obsession with potato chips, this collection has a durable thread that ties them all together: the need to observe and record everything. Struggle and resilience. Fear and pleasure. Faith and despair. Love and loathing. All of those tensions are closely examined within the shadow cast by death. As Gary Fincke writes, "Somewhere, early every day, I think the acolyte of terror dreams our bodies as it decides the exact address for delight." This "thinking," in essay after essay, is brilliantly articulated in an ever-evolving, contemporary style. The metaphors are beautiful, the prose is clipped and clean, and the reader is constantly surprised by the connections Fincke draws like the one between his daughter and Charles Manson. A panorama of screams, another of hearts, another of headlights, all of them transformed into memoir. The subjects as varied as a four-part exploration of different kinds of hands, a meditation on terror and the fireworks American children know as Sparklers, and eulogies seeded by love of potato chips and crossword puzzles. Like the best essays, all of these "discover" in an intimate, personal way.
