Global Migration Elizabeth Mavroudi,Caroline Nagel,2023-07-21 This new, fully updated edition of Global Migration provides students with a thorough and grounded understanding of multiple dimensions of migration, including labour markets, citizenship, border control, integration and identity. Written by two geographers, the book incorporates insights from across the social sciences and is accessible to students in many disciplines. Providing a useful and timely introduction to migration, the textbook addresses migration in a holistic way and equips students with the tools they need to participate in contemporary debates about migration in sending and destination contexts. It conveys to students that the causes and effects of migration are geographically specific and contingent upon class, race, gender and other markers of social difference. Rather than identifying simple solutions to migration 'problems', the book encourages students to think about unauthorized migration, asylum, refugee resettlement, labour migration, and other forms of mobility (and immobility) from different vantage points. Global Migration serves as the go-to book for teaching advanced undergraduate and master's-level students about the complexities of migration across nation-state borders.

AP Human Geography Crash Course Christian Sawyer,2018-09-24 REA's AP Human Geography Crash Course is the first book of its kind for the last-minute studier or any AP student who wants a quick refresher on the course. /Written by an AP teacher, the targeted review chapters prepare students for the test by only focusing on the important topics tested on the AP Human Geography exam. /A student-friendly review in outline format covers everything AP students need to know for the exam: models in AP human geography, population, cultural patterns and processes, agriculture and rural land use, industrialization, and economic development. /With our Crash Course, students can study the subject faster, learn the crucial material, and boost their AP score all in less time. The author includes test-taking strategies for the multiple choice and free response exam questions, so students can build their point scores and get a 5!

Population and Society Clare Holdsworth,Nissa Finney,Alan Marshall,Paul Norman,2013-02-01 An excellent

introduction to the study of population and its significance for many of the key social, political, cultural and environmental issues facing the world today. It covers population growth, ageing, migration and mobility, parenting, health inequalities, and much more... The authors do not shy away from areas of continuing debate, providing both sides of an argument and encouraging readers to follow up the original sources - Tony Champion, Emeritus Professor of Population Geography, Centre for Urban, Regional & Development Studies, Newcastle University and Vice President, British Society for Population Studies, 2011-2013 Population and Society is an undergraduate introduction to population that explains the latest trends in population studies. The text provides a detailed and completely accessible overview that: situates demographic events - fertility, mortality and migration - within the context of broader social impacts and theorisations like social inequalities, individualisation and life course analysis uses global illustrative examples to demonstrate the importance of data and data interpretation in population studies is illustrated throughout with pedagogic features, like chapter opening summaries, suggestions for further readings and case study examples. This text will be widely used as the standard and most up-to-date text on population and society for courses across the social sciences.

Population Geography Mohammad Izhar Hassan, 2020-04-28 This book studies the origins and development of population geography as a discipline. It explores the key concepts, tools and statistical and demographic techniques that are widely employed in the analysis of population. The chapters in this book: Provide a comprehensive geographical account of population attributes in the world, with a particular focus on India; Study the three major components of population change - fertility, mortality and migration - that have remained somewhat neglected in the study of human geography so far; Examine the salient social, demographic and economic characteristics of population, along with topics such as size, distribution and growth of population; Discuss major population theories, policies and population-development-environment interrelations, thus marking a significant departure from the traditional pattern-oriented approach. Well supplemented with figures, maps and tables, this key text will be an indispensable read for students, researchers and teachers of human geography, demography, anthropology, sociology, economics and population studies.

Handbook of Research Methods and Applications in Urban Economies Peter Karl Kresl, Jaime Sobrino, 2013-01-01 'I highly recommend students, teachers and researchers to enjoy reading this set of excellent papers.' - Boris Graizbord, El Colegio de México, Mexico 'It is obvious that cities have long been the focus of analysis by the scholars and practitioners whose writings published in the Kresl-Sobrino Handbook of Research Methods and Applications in Urban Economies. The depth and excellence of the numerous topics examined reflects effective networking between the scholars involved, their analyses of approaches, problems and potentials of cities on the numerous continents, and the continuing role of the Global Urban Competitiveness Project in encouraging the development of methodologies and data helpful in understanding the hard and soft determinants of the growth and decline of cities.' - Pierre-Paul Proulx, Université de Montréal, Canada 'This

collection of essays provides a rich assortment of methods used to investigate the complex economic, social, environmental, demographic and political systems in cities throughout the world. It gives researchers, lecturers and students a useful taste of the different ways of studying these phenomena in diverse urban settings.' – Ivan Turok, University of Glasgow, UK In this timely Handbook, seventeen renowned contributors from Asia, the Americas and Europe provide chapters that deal with some of the most intriguing and important aspects of research methodologies on cities and urban economies. The Handbook comprises five parts: methodology, continental distinctions, positioning cities, planning for the future, and urban structures. The 'methodologies' section includes interviews, empirical and theoretical approaches whilst 'continental distinctions' offers contributions on China, North America, Europe, Latin America and South Africa. 'Positioning' treats cities in the international context and relates them to economic and administrative spaces whilst 'planning' includes general strategic economic planning, as well as the experience of individual cities. Finally, the 'structures' section refers to contextual and situational aspects of urban development. Providing a comprehensive study of urban development and competitiveness, this Handbook will strongly appeal to students wishing to gain a deeper understanding of research methods in urban economics, urban studies and planning.

Migration Decision Making Gordon F. De Jong, Robert W. Gardner, 1981 Conference report on factors involved in migration decision making - discusses motivations, economic models incorporating macro- and microlevel influences, development paradigm in relation to developing countries, relevance of village-community social structure, family structure and social psychological considerations, and indicates implications for migration policies. Bibliography pp. 329 to 381, flow charts and graphs. Conference held in Honolulu 1979 Jun 11 to Jul 6.

Theories of Migration Robin Cohen, 1996 Attempts to construct a theory of migration have been constrained by the considerable variety of migrations to be considered - professional and unskilled, compelled and voluntary, settler and temporary, internal and international, and legal and illegal. Bringing together a body of scholarship from various disciplines and schools of thought, this volume attempts to construct a satisfactory theory able to account for the diverse causes and implications of migration. The articles date from 1958 to 1993.
