**Automotive Electrical and Electronic Systems with Shop Manual** Frank C. Derato, 1994 Part of the Basic Automotive Series, Automotive Electrical and Electronic Systems can be used in any introductory course in automotive electronics and electricity. The text opens with up-to-date coverage of electricity, magnetism, and semi-conductors. Topics

that follow include starting systems, lighting systems, power accessories, and the latest electronic systems, including speed controls and - new to this edition - automotive micro-computers. Also new to this text are ignition and passive restraint systems. The accompanying shop manual provides detailed coverage of specific repairs and service techniques using step-by-step procedures. The text and its correlated shop manual help prepare students for Automotive Service Excellence (ASE) certification; it also provides end-of-chapter questions that use a format similar to the ASE tests. The contents of both volumes are based on the competencies and standards set by the National Institute for Automotive Service Excellence.

**Automotive Electrical and Electronic Systems** Richard K. DuPuy, Chek Chart, 2000 The eight Chek-Chart series books directly correlate to the ASE testing areas for certified automotive mechanics. The entire series is job-oriented, especially designed for students who intend to work in the automotive service profession. A student will be able to use the knowledge gained from these books and from the instructor to get and keep a job in automotive repair or maintenance. Learning the material and techniques in these volumes is a giant leap toward a satisfying, rewarding career.
