

Clauses And Types Of Clauses

Georg Borges,Christoph Sorge

Speech Acts and Clause Types Peter Siemund,2018-02-22 This book is an introduction to the relationship between the morphosyntactic properties of sentences and their associated illocutionary forces or force potentials. The volume begins with several chapters dedicated to important theoretical and methodological issues, such as sentence and utterance meaning, illocutionary force, clause types, and cross-linguistic comparison. The bulk of the book is then composed of chapter-length case studies that systematically investigate typologically prominent clause types and their forces, such as declaratives and assertions, interrogatives and questions, and imperatives and commands. These case studies begin with an overview of the necessary theoretical foundations, followed by a discussion of the grammatical structures of English, and an assessment of the relevant cross-linguistic facts. Each chapter ends with a succinct summary of the most important findings, practice exercises, and recommendations for further reading and research. Overall, the book works towards developing a gradient model of clause types that goes substantially beyond the traditional distinction between major and minor clause types. It draws on insights from linguistics, philosophy, and sociology, and may be used as a textbook for undergraduate or graduate courses in semantics, pragmatics, and morphosyntax.

Legal Knowledge and Information Systems Georg Borges,Christoph Sorge,2022-12-15 In recent years, interest within the

research community and the legal industry regarding technological advances in legal knowledge representation and processing has been growing. This relates to areas such as computational models of legal reasoning, cybersecurity, privacy, trust and blockchain methods, among other things. This book presents the proceedings of JURIX 2022, the 35th International Conference on Legal Knowledge and Information Systems, held from 14 -16 December in Saarbrücken, Germany, under the auspices of the Dutch Foundation for Legal Knowledge Based Systems and hosted by Saarland University. The annual JURIX conference has become an international forum for academics and professionals to exchange knowledge and experiences at the intersection of law and artificial intelligence (AI). For this edition, 62 submissions were received from 163 authors in 24 countries. Following a rigorous review process, carried out by a programme committee of 72 experts recognised in the field, 14 submissions were selected for publication as long papers, 22 as short papers and 5 as demo papers, making a total of 41 papers altogether and representing a 22.5% acceptance rate for long papers (66.1% overall). The broad array of topics covered includes argumentation and legal reasoning, legal ontologies and the semantic web, machine and deep learning and natural language processing for legal knowledge extraction, as well as argument mining, translation of legal texts, defeasible logic, legal compliance, explainable AI, alternative dispute resolution, legal drafting and smart contracts. Providing an overview of recent advances, the book will be of interest to all those working at the interface between the law and AI.

A Grammar of Mursi Firew Girma Worku, 2021-03-08 Mursi is a Nilo-Saharan language spoken by a small group of people who live in the Lower Omo Valley, Ethiopia, and is one of the most endangered languages of the country. Based on the fieldwork that the author conducted in beautiful villages of the Mursi community, this descriptive grammar is organized into fourteen chapters rich in examples and an appendix containing four transcribed texts. The readers are thus provided with a clear and useful tool, which constitutes an important addition to our knowledge of Mursi and of other related languages spoken in the area. Besides being an empirical data source for linguists interested in typology and endangered language description and documentation, the grammar constitutes an invaluable gift to the speech community.
