*Technology Transfer and International Production* Jin W. Cynn, 2002-03-27 This book analyses the technology development efforts of Korea's electronics industry (the country's largest exporter). It asks how the Korean electronics industry was able to develop, both in terms of production and technology, despite low inflows of licensing and foreign direct investments. The book argues that the key to its spectacular growth has been through its participation and learning from an inter-firm arrangement called original equipment manufacturing arrangement (OEM). A number of firm-level case studies on the Korean electronics industry support this argument. The role of the government, especially related to its technology policy, has also been analysed. The government was effective in providing financial incentives for the firms' technological upgrading efforts, but its supplying of direct technological assistance had limited success. Overall, this book argues that contrary to many previous studies, the role of multinational enterprises has been significant in the development of Korea's electronics industry, and that they have acted as a 'technological tutor' for Korea through OEM--P. xiv.tributors, world 0.

**International marketing strategy of Adidas. A critical evaluation** Difrine Madara,2019-11-22 Seminar paper from the year 2018 in the subject Business economics - Business Management, Corporate Governance, grade: A, Kenyatta University, language: English, abstract: This paper aimed at exploring the competitive strategy of Adidas and growth opportunities that the company can take advantage of. Strategy is very important to the success and sustainability of any company. It involves understanding of the company's core capabilities, weaknesses, risks it faces and strengths and using them to design a sustainable competitive strategy. The paper begins by exploring how the main competitors in the sporting goods industry; Adidas and Nike used various strategies to survive and sustain their positions in the market. Both companies focused on broad differentiation. However, Adidas focused on design innovation, cost advantages, speed of production and enhancing attractiveness of its products. Nevertheless, Nike remains to be the market leader in sport footwear and apparel industry. To challenge Nike's position, Adidas must strive to penetrate Nike main market of North America, develop new markets in the emerging economies and while putting more investments in product and process innovations. The author also found that the company can consider strategic partnerships and greater use of technological applications such as CRM systems to enhance its competitiveness.

**Strategic Management** Alex Miller,1998 Miller clearly takes a stand. The text emphasizes developing a competitive advantage for the purpose of achieving superior financial performance. This central focus forms an integrating theme demonstrated from the start by the, Architecture of Strategy framework. The nature of strategic management is changing in such a way that all managers, regardless of organizational level or functional specialty, are becoming more involved in helping formulate and implement strategies for the entire business. Every case was selected because it illustrates this

concept in practice
