IM Harris

Design Is a Job Mike Monteiro, 2022-11 Take care of yourself as a working designer and use design as a tool for good.

Design is a Job Mike Monteiro, 2012 Co-founder of Mule Design and raconteur Mike Monteiro wants to help you do your job better. From contracts to selling design, from working with clients to working with each other, you'll learn why navigating the business of design is just as important as the craft of it. Cultivated from his own experience, Mike packs this brief book with knowledge you can't afford not to know.

Land Your Dream Design Job Dan Shilov, 2023-08-31 You've just found the most detailed guide ever written to landing a product design job. Understand what you want, build your portfolio, interview with confidence, and get the job that's right for you.

Designing Your New Work Life Bill Burnett, Dave Evans, 2021-10-26 From the authors of the #1 New York Times bestseller *Designing Your Life* comes a revised, fully up-to-date edition of *Designing Your New Work Life*, a timely, urgently needed book that shows us how to transform our new uncharted work life into a meaningful dream job or company. With practical, useful tools, tips, and design ideas that show us how to navigate disruption (global, regional, or personal) and create new possibilities for our post-COVID work world and beyond. Bill Burnett and Dave Evans successfully taught graduate and undergraduate students at Stanford University and readers of their best-selling book, *Designing Your Life* (The prototype for a happy life. —Brian Lehrer, NPR), that designers don't analyze, worry, think, complain their way forward; they build their way forward. And now more than ever, we all need creative and adaptable tools to cope with the chaos caused by COVID-19. In *Designing Your New Work Life*, Burnett and Evans show us how design thinking can transform our present job, and how it can improve our experience of work in times of disruption. All disruption is personal, write Burnett and Evans, as with the life-altering global pandemic we are living through now. *Designing Your New Work Life* makes clear that disruption is the new normal, that it is here to stay and that it is accelerating. And in the book's new chapters, Burnett and Evans show us step by step, how to design our way through disruption and how to stay ahead of it—and thrive. Burnett and Evans's *Disruption Design* offers us a radical new concept that makes use of the designer mindsets: Curiosity, Reframing, Radical collaboration, Awareness, Bias to action, Storytelling, to find our way through these uncharted times. In *Designing Your New Work Life*, Burnett and Evans show us, with tools, tips, and design ideas, how we can make new possibilities available

even when our lives have been disrupted (be it globally, regionally, or personally), giving us the tools to enjoy the present moment and allowing us to begin to prototype our possible future.

Reorganizing the Factory Nancy Hyer, Urban Wemmerlov, 2001-10-22 Winner of the 2003 Shingo Prize! Reorganizing work processes into cells has helped many organizations streamline operations, shorten lead times, increase quality, and lower costs. Cellular manufacturing is a powerful concept that is simple to understand; however, its ultimate success depends on deciding where cells fit into your organization, and then applying the know-how to design, implement and operate them. Reorganizing the Factory presents a thoroughly researched and comprehensive life cycle approach to competing through cellular work organizations. It takes you from the basic cell concept and its benefits through the process of justifying, designing, implementing, operating, and improving this new type of work organization in offices and on the factory floor. The book discusses many important technical dimensions, such as factory analysis, cell design, planning and control systems, and principles for lead time and inventory reduction. However, unique to the literature, it also covers in depth the numerous managerial issues that accompany organizing work into cells. In most implementations, performance measurement, compensation, education and training, employee involvement, and change management are critically important. These issues are often overlooked in the planning process, yet they can occupy more of the implementation time than do the technical aspects of cells. Includes: Why do cells improve lead time, quality, and cost? Planning for cell implementation Justifying the move to cells, strategically and economically Designing efficient manufacturing and office cells Selecting and training cell employees Compensation system for cell employees Performance and cost measurement Planning and control of materials and capacity Managing the change to cells Problems in designing, implementing, and operating cells Improving and adapting existing cells Structured frameworks and checklists to help analysis and decision-making Numerous examples of cells in various industries

Motivation and Job Design Ivan T. Robertson, Mike Smith, 1985 Textbook on Motivation, work attitudes and job design for organization development in the UK - describes systems of organization behaviour, with 3 case studies; examines types of job enrichment, factors of job analysis, labour relations aspects; includes theory, research and practice. Diagrams, graphs, references.
