Democracy in America - Volume 2 Alexis De Tocqueville, 2013-05-31 This antiquarian book contains the second volume of Alexis de Tocqueville's seminal book, 'Democracy in America'. Within this text, Tocqueville analyses the living standards and social conditions of individuals, and in particular their connection to the market and state in Western societies.

'Democracy in America' was published subsequent to Tocqueville's travels in the United States, and is considered an early work of sociology and political science. The chapters of this book include: 'How the Americans Combat Individualism by the Principle of Self-Interest Rightly Understood', 'That The Americans Apply The Principle of Self-Interest Rightly Understood to Religious Matters', 'Of the Taste for Physical Well-Being in America', etcetera. We are republishing this vintage book now in an affordable, modern edition - complete with a specially-commissioned new biography of the author.

General and Periodic Crises of Overproduction Jean Lescure, 2023-11-14 Jean Lescure's two-volume General and Periodic Crises of Overproduction is a pioneering study of the causes and consequences of industrial crises in capitalist economies in the nineteenth and early twentieth centuries. The author, who held doctorates in political economy and law, is most remembered as a founder of the French historical school and a staunch advocate of empiricism in the economic sciences. Lescure called his approach the 'complex historical method', by which he sought to revise classical and quantitative economic theory through the historical analysis and statistical observation of cyclical phenomena. Ever the controversialist, Lescure wrote in an engaging style, accessible to non-specialists and economists alike, and critiqued the leading monetary theorists of the period, insisting that observation of the movements in production costs, industrial orders and profits be given priority over circulation and credit in understanding the periodic crises of capitalist economies. In Lescure's view, crises were inevitable in both market and command economies and their onset and consequences were predictable with the help of the more detailed production statistics newly available to economists and entrepreneurs at the time. Observation of corporate profits, the margin between cost price and selling price, provided the means to predict crises and measure their impact, not only on industry and trade but also on the working classes who would endure unemployment and the many social ills that accompany it. Lescure, unlike many of the liberal economists of the time, was always careful to include in his historical account statistical analysis of unemployment figures, as well as those on crime, marriage and birth rates,

homelessness and suicide. Although he remained sceptical of government intervention in the form of monetary policies adjusting the money supply, and lauded the success of industrial concentration and trusts in reducing costs and prices, Lescure admitted the state's role in the recovery of the 1930s, when social insurance schemes and investment in public works mitigated the worst effects of unemployment for industrial labour. This treatise, which grew out of his doctoral work, was a lifetime project for Lescure, who updated it periodically over five editions, to include each new cycle of growth, crisis, depression and recovery. Volume one provides a historical study of economic crises from the post-Napoleonic period through the Great Depression and the recovery of the late 1930s. Volume two offers a critique of the theories of crises, their causes and potential remedies, in which Lescure outlines his preference for 'organic' theories that focus on the production process and qualitative statistical observation of the movements in costs, selling prices, industrial orders and profits. The text of the fifth edition appears here in English for the first time, unabridged and complete with editorial materials designed to help the English reader understand the work on its own terms and situate its author's prominent place in the history of economic thought.

Dream Worlds Rosalind H. Williams, 1982 In *Dream Worlds*, Rosalind Williams examines the origins and moral implications of consumer society, providing a cultural history of its emergence in late nineteenth-century France.

Paris 1937 James D. Herbert, 2018-10-18 This elegant and theoretically informed book, illustrated with forty-five photographs, explores the cultural significance of six exhibitions or new museum installations, all opening in Paris between mid-1937 and early 1938: the commercially oriented world's fair titled L'Exposition Internationale des Arts et Techniques; the historical Musée des Monuments Français; the ethnographic Musée de l'Homme; two massive art retrospectives, one sponsored by the state of France and the other by the municipality of Paris; and L'Exposition Internationale du Surréalisme. James D. Herbert capitalizes on the proximity of these disparate exhibits to show how they competed with and yet also complemented one another in visually rendering the full scope of human accomplishment through time and across

the globe. In this task, Herbert argues, they both succeeded and failed in interesting and productive ways. He asserts that the exhibitions projected and, in a sense, created (created precisely through the act of projection) the real world that they ostensibly only represented. In fact, Herbert argues, the exhibitions developed a particular sense of French national identity—one that, in managing to be at the same moment both inwardly focused and beneficently expansive, would present a vivid contrast to the growing German nationalism of the Third Reich. His epilogue takes a final look at these issues from the perspective of Jean Cocteau's 1950 film *Orphée*. A ground-breaking work in cultural history, Paris 1937, with its insightful examination of objects from a variety of fields, is a pioneering text in the field of visual studies.
