Ron Louis,David Copeland

Connecting With Your Ancestors Monique Joiner Siedlak,2020-05-01 How difficult is it to communicate with your ancestors? We sense their presence, instinctively, and wish to communicate with them. It's time to realize it is possible. There are numerous reasons you may want to learn how to communicate with your ancestors. For me, the main reason is for healing. To ultimately let go of old hurts and not transfer them on to the next generation. Within the pages of this short read, you will learn: • The Traditions of Ancestral Communication • Who is an Ancestor? • Spiritually Connect With Your Ancestors • How to create an ancestral shrine or altar as well as offerings and prayers. Just like any other relationship, you will need to work at it. Be consistent. Your ancestors will respond to you. By increasing your awareness, you may see the signs they are trying to show you. The best way to begin is now!

An Introduction to Communication Studies Sheila Steinberg,2007 In this introductory textbook, the author contextualises approaches and theories on communication studies by making use of local examples from the mass media, as well as relevant political and social experiences. The book is divided into two parts. The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies. Each chapter starts with the learning Outcomes and a short overview of the chapter. Students can monitor their learning by using the summaries and 'test yourself' questions at the end of every chapter. Scenarios provide examples of how the theory can be applied in practice. This makes for a learner-friendly and accessible book which will prove invaluable to Students and professionals alike. Beginner students majoring in Communication Studies, as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful.

How Animals Think and Feel Ken Cheng, 2016-10-03 This highly accessible book explains key scientific findings in the areas of animal cognition, emotion, and behavior in easy-to-understand language. Why do dogs get separation anxiety? Can a chimpanzee recognize itself in a mirror? Do animals in a zoo get neurotic? Do animals actually have emotions, or are humans simply anthropomorphizing them? *How Animals Think and Feel: An Introduction to Non-Human Psychology* answers these interesting questions and many more in its examination of animal psychology—particularly non-human primates (our closest relatives) and companion animals (the animals with which we spend the most time). Readers will learn about the history of the study of animals as well as the methodologies and applications of animal research, examples of higher-level thought and problem solving in animals, learning and memory, emotion, and basic behaviors such as feeding and mating. Chapters examine specific animal species or groups in greater depth to address particular behaviors and discuss characteristic traits. The book also includes sidebars that offer additional high-interest, ready-reference content; a bibliography of print and electronic sources for further study; and a glossary of unfamiliar terms.
